

FINANCIAL-COMPLIANCE AUDIT

Montana Board of Investments

For the Fiscal Year Ended June 30, 2014

JANUARY 2015

14-04A

REPORT SUMMARY

The Montana Board of Investments invests public funds, public retirement system funds, and state compensation insurance fund assets. In addition, the board manages the investments of state agencies and certain investments of local governments, such as cities, counties, and school districts. The board managed and invested \$16.2 billion at June 30, 2014, and \$14.8 billion at June 30, 2013, of the state's funds.

### Context

To manage the Unified Investment Program, the Montana Board of Investments (board) created seven investment pools that operate similar to mutual funds. Those pools are: Retirement Funds Bond Pool, Trust Funds Investment Pool, Montana Domestic Equity Pool, Montana International Equity Pool, Montana Private Equity Pool, Montana Real Estate Pool, and Short Term Investment Pool. The board also manages direct investments in fixed income securities, equity index funds, and commercial loans for approximately 20 state agencies. Those investments are reported collectively in the board's financial statements as All Other Funds. The board also provides the option for local government entities to invest in the Short Term Investment Pool.

We are required by Article VIII, Section 13 of the Montana Constitution and §17-6-321, MCA, to audit the board each fiscal year. To audit the board's Consolidated Unified Investment Program, we compared the investment transactions recorded by the board to the reports from the custodial bank. We analyzed the financial statements and examined the underlying transactions. The audit also included testing the board's compliance with selected state laws and regulations related to investments.

The board also administers the state's Municipal Finance Consolidation Act and Economic Development Bond Act programs, known as the Enterprise Fund Program. Under the Municipal Finance Consolidation Act, the board is authorized to issue up to \$190 million in Intermediate Term Capital Program (INTERCAP) bonds which are used to provide loans to eligible Montana governments to finance capital expenditures for up to 15 years. The Board makes firm commitments to fund loans from the INTERCAP loan program. The outstanding commitments to eligible Montana governments as of June 30, 2014, total \$39,745,453. Economic Development Bond Act programs provide access to financing through issuance of conduit debt. The board is authorized to issue stand-alone industrial revenue as conduit (no commitment) debt. Assets and revenues of the borrower are pledged to repay the bonds. Because the Board has no obligation for this debt, these bond issues are not reflected on the Board's financial statements.

We are required to audit the Municipal Finance Consolidation Act by §17-5-1529, MCA, and the Economic Development Bond Act programs

by §17-5-1649, MCA. To audit this activity, we reviewed loan documents and payments. We compared the underlying transactions related to the loans to bank statements. We also tested the board's compliance with selected state laws and regulations related to the issuance of bonds and notes.

## Results

There were no prior audit recommendations; and there are no current audit recommendations.
