Gentlemen:

This is to request your concurrence that neither an Environmental Impact Statement nor a Negative Declaration is required for the subject project and that this Agency Impact Determination is appropriate.

This project is located on South River Road in Great Falls between 10th Avenue South and Central Avenue. The attached map shows the location of the project. The work to be performed will consist of removing the existing wooden guardrail along the roadway and replacing it with new metal guardrail.

The project is not a major action and it is our opinion that the effect on the environment will be insignificant. There will be no alteration of land use or traffic flow patterns. The major impact of the project will be to provide a safer transportation facility for the traveling public.

The project will not have any air or water quality impact and noise standards are not applicable to this type of work.

No acquisition of new right-of-way is anticipated for this project.

We also at this time request your approval to waive the requirements for public hearings and location and design approval.

Very truly yours,

H. J. ANDERSON  
DIRECTOR OF HIGHWAYS
