III. Regulatory Impact Analysis

The Sanitation in Subdivisions Act imposes regulatory restrictions on this subdivision which require department review and approval of designs for water supply, wastewater treatment, storm water and solid waste disposal systems. Private property may not be developed for activities that require water supply or wastewater disposal until approval is issued by the Department of Environmental Quality. The impact on this private property is that the systems must be constructed at a cost to the applicant, and that several limitations may be imposed regarding the number of lots which may be created, treatment technologies which may be considered, and/or locations of buildings and sanitary facilities. These requirements have been established to protect public health and water quality.

**Alternatives/Rationale:**

X The systems were proposed by the applicant in the initial application. The department accepts the systems proposed by the applicant as the most economically feasible approach.

SWUC Rather than proposing advanced wastewater treatment to meet Nondegradation requirements, the applicant may consider requesting an authorization to degrade state waters. This alternative is dependent on several variables including site characteristics and the time costs associated with obtaining agency approval. Therefore it is not reasonable to quantify the economic impact of this action.
