---

2.           **Secondary and cumulative impacts:** None
  
3.           **Reasonable alternatives to the proposed action, including the no action alternative:** the applicant is required to get a permit for surface water appropriation, should this not be possible, the applicant could drill a well and use water at a reduced flow not to exceed 35 GPM.

**PART III. CONCLUSION**

Based on the significance criteria evaluated in this EA, is an EIS required? NO  
If an EIS is not required, explain why the EA is the appropriate level of analysis for this proposed action:

I cannot foresee any current or future adverse environmental consequences as a result of the issuance of the applicants permit, nor the applicants use of water on his two lots (totaling .69 acres) that border the Missouri River.
