

ENVIRONMENTAL ASSESSMENT

Project Name: REB Farms

Proposed Implementation Date: Summer 2000

Proponent: Fisher Sand & Gravel

Type and Purpose of Action: The proponent proposes to mine, crush and transport 20,000 cubic yards of sand & gravel from a 9.8-acre site for the reconstruction Highway 87. There would be an asphalt plant connected with this operation. The site would be reclaimed by recontouring, respreading the topsoil and reseeding the site with grasses. The reclaimed use would be rangeland. The site would be reclaimed by the Spring of 2001.

Location: SW¼, Sec. 14, T24N, R8E

County: Chouteau

N = Not present or No Impact will occur.

Y = Impacts may occur (explain under Potential Impacts).

IMPACTS ON THE PHYSICAL ENVIRONMENT	
RESOURCE	[Y/N] POTENTIAL IMPACTS AND MITIGATION MEASURES
<p>1. GEOLOGY AND SOIL QUALITY, STABILITY AND MOISTURE: Are fragile, compactible or unstable soils present? Are there unusual geologic features? Are there special reclamation considerations?</p>	<p>[N] The proposed operation is located on a bench approximately ¼ mile west of Fort Benton. The soils are approximately 12 inches deep and are of a sandy loam texture. There is 24 inches of silty sandy overburden. After regrading the overburden and then the soil would be replaced. The surrounding area has been extensively mined in the past and the majority of the area has been reclaimed. Microorganisms should invade the soil. There are no fragile, compactible or unstable soils present, no unusual geologic features, or special reclamation considerations.</p>
<p>2. WATER QUALITY, QUANTITY AND DISTRIBUTION: Are important surface or groundwater resources present? Is there potential for violation of ambient water quality standards, drinking water maximum contaminant levels, or degradation of water quality?</p>	<p>[N] There are no water wells or surface water sources with 1,000 feet. It is estimated that the groundwater table is approximately 34 feet below the current ground surface. The site would be mined to a depth of 18 feet. There would not be any bulk fuel storage at this site. Best Management Practices would be used to prevent any off site sedimentation or erosion. The proposed operation would not impact groundwater or any surface water sources.</p>
<p>3. AIR QUALITY: Will pollutants or particulate be produced? Is the project influenced by air quality regulations or zones (Class I airshed)?</p>	<p>[Y] Air quality would be degraded, but the proponent must comply with air quality standards and have Air Quality Permits from the Air and Waste Management Bureau of the Montana Dept. of Environmental Quality for the crusher and asphalt plant. To control dust, spray bars would be utilized on the crusher and a water truck on the haul road and the mine and facility area.</p>
<p>4. VEGETATION COVER, QUANTITY AND QUALITY: Will vegetative communities be permanently altered? Are any rare plants or cover types present?</p>	<p>[N] The land is in an old CRP field and is seeded in bluebunch and thickspike wheatgrasses. Native and non-native grasses would be seeded on the on the site after recontouring and retopsoiling. A literature search was done by the Montana National Heritage Program and no rare plants or cover types were identified as being present on the site and none were observed during a ground search.</p>
<p>5. TERRESTRIAL, AVIAN AND AQUATIC LIFE AND HABITATS: Is there substantial use of the area by important wildlife, birds or fish?</p>	<p>[N]</p>
<p>6. UNIQUE, ENDANGERED, FRAGILE OR LIMITED ENVIRONMENTAL RESOURCES: Are any federally listed threatened or endangered species or identified habitat present? Any wetlands? Species of special concern?</p>	<p>[N] The Montana Natural Heritage Program did a literature search and no threatened or endangered species or identified habitat was present and none were discovered during a ground search. No wetlands are present on the area of the proposed operation</p>
<p>7. HISTORICAL AND ARCHAEOLOGICAL SITES: Are any historical, archaeological or paleontological resources present?</p>	<p>[N] Steve Platt, archaeologist for the Montana Dept. of Transportation, did not require a cultural resource survey. If the operator of the proposed operation discovers any cultural resources the operation must</p>

	be routed around the site of discovery for a reasonable amount of time until salvage can be made. The State Historical Preservation Office must be promptly notified.
8. AESTHETICS: Is the project on a prominent topographic feature? Will it be visible from populated or scenic areas? Will there be excessive noise or light?	[N] The site is located within close proximity to three businesses and residences and near the City of Fort Benton. None of the residences or businesses is opposed to the operation. The operation is of a short term and would be fully reclaimed by the spring of 2001.
9. DEMANDS ON ENVIRONMENTAL RESOURCES OF LAND, WATER, AIR OR ENERGY: Will the project use resources that are limited in the area? Are there other activities nearby that will affect the project?	[N]
10. IMPACTS ON OTHER ENVIRONMENTAL RESOURCES: Are there other studies, plans or projects on this tract?	[N]
IMPACTS ON THE HUMAN POPULATION	
RESOURCE	POTENTIAL IMPACTS AND MITIGATION MEASURES
11. HUMAN HEALTH AND SAFETY: Will this project add to health and safety risks in the area?	[Y] There will be increased hazards because of equipment activity and hauling of the sand and gravel. The applicant must comply with OSHA and MSHA regulations however, proper precautions will be taken to avoid accidents.
12. INDUSTRIAL, COMMERCIAL AND AGRICULTURAL ACTIVITIES AND PRODUCTION: Will the project add to or alter these activities?	[N] There will be a temporary loss of grain production on 9.8 acres of land until the site is successfully reclaimed.
13. QUANTITY AND DISTRIBUTION OF EMPLOYMENT: Will the project create, move or eliminate jobs? If so, estimated number.	[N]
14. LOCAL AND STATE TAX BASE AND TAX REVENUES: Will the project create or eliminate tax revenue?	[N]
15. DEMAND FOR GOVERNMENT SERVICES: Will substantial traffic be added to existing roads? Will other services (fire protection, police, schools, etc) be needed?	[N] The site will require periodic site evaluations, but these will be done in conjunction with other operations in the area.
16. LOCALLY ADOPTED ENVIRONMENTAL PLANS AND GOALS: Are there State, County, City, USFS, BLM, Tribal, etc. zoning or management plans in effect?	[N]
17. ACCESS TO AND QUALITY OF RECREATIONAL AND WILDERNESS ACTIVITIES: Are wilderness or recreational areas nearby or accessed through this tract? Is there recreational potential within the tract?	[N]
18. DENSITY AND DISTRIBUTION OF POPULATION AND HOUSING: Will the project add to the population and require additional housing?	[N]
19. SOCIAL STRUCTURES AND MORES: Is some disruption of native or traditional lifestyles or communities possible?	[N]
20. CULTURAL UNIQUENESS AND DIVERSITY: Will the action cause a shift in some unique quality of the area?	[N]
21. OTHER APPROPRIATE SOCIAL AND ECONOMIC CIRCUMSTANCES:	[N]
