

Montana Board of Oil and Gas Conservation  
Environmental Assessment

Operator: Continental Resources, Inc  
Well Name/Number: Constance 1-7H  
Location: SW SW 7 T23-R56  
County: Richland, MT; Field (or Wildcat) W/C

Air Quality

(possible concerns)

Long drilling time no  
Unusually deep drilling (high horsepower rig) no  
Possible H2S gas production No  
In/near Class I air quality area no  
Air quality permit for flaring/venting (if productive) no

Mitigation:

    Air quality permit (AQB review)  
    Gas plants/pipelines available for sour gas  
    Special equipment/procedures requirements  
    Other: \_\_\_\_\_

Comments:    No special concerns

Water Quality

(possible concerns)

Salt/oil based mud Yes  
High water table no  
Surface drainage leads to live water no  
Water well contamination no  
Porous/permeable soils no  
Class I stream drainage no

Mitigation:

xx Lined reserve pit  
xx Adequate surface casing  
    Berms/dykes, re-routed drainage  
    Closed mud system  
    Off-site disposal of solids/liquids (in approved facility)  
    Other: \_\_\_\_\_

Comments:    will use pit liner, 1600' of surface casing is adequate.

Soils/Vegetation/Land Use

(possible concerns)

Stream crossings no  
High erosion potential no  
Loss of soil productivity no  
Unusually large wellsite no  
Damage to improvements no  
Conflict with existing land use/values no

Mitigation

    Avoid improvements (topographic tolerance)  
    Exception location requested  
xx Stockpile topsoil  
    Stream Crossing Permit (other agency review)  
xx Reclaim unused part of wellsite if productive  
    Special construction methods to enhance reclamation  
    Other \_\_\_\_\_

Comments:    No special concerns. Short access road and 13' cut

Health Hazards/Noise

(possible concerns)

Proximity to public facilities/residences about ¼ mile  
Possibility of H2S not likely  
Size of rig/length of drilling time

Mitigation:

xx Proper BOP equipment  
    Topographic sound barriers  
    H2S contingency and/or evacuation plan  
    Special equipment/procedures requirements

Other: \_\_\_\_\_  
Comments: no special concerns

**Wildlife/recreation**

(possible concerns)

Proximity to sensitive wildlife areas (DFWP identified) no  
Proximity to recreation sites none in immediate area  
Creation of new access to wildlife habitat no  
Conflict with game range/refuge management no  
Threatened or endangered Species no

Mitigation:

Avoidance (topographic tolerance/exception)  
 Other agency review (DFWP, federal agencies, DSL)  
 Screening/fencing of pits, drillsite  
 Other: \_\_\_\_\_

Comments: no special concerns in this area

**Historical/Cultural/Paleontological**

(possible concerns)

Proximity to known sites none identified

Mitigation

avoidance (topographic tolerance, location exception)  
 other agency review (SHPO, DSL, federal agencies)  
 Other: \_\_\_\_\_

Comments: no concerns -on private

**Social/Economic**

(possible concerns)

Substantial effect on tax base  
 Create demand for new governmental services  
 Population increase or relocation

Comments: no special concerns

**Remarks or Special Concerns for this site**

Well is a Bakken horizontal development well -1280 Acre TSU approved -Docket 363-2003

Summary: Evaluation of Impacts and Cumulative effects

Only minor, short term impacts associated with this project.

I conclude that the approval of the subject Notice of Intent to Drill (does/does not) constitute a major action of state government significantly affecting the quality of the human environment, and (does/does not) require the preparation of an environmental impact statement.
