To comply with the Administrative Rules of Montana, 17.4.607(2) and 17.4.609(2), the Department of Environmental Quality (Department) prepared the enclosed checklist Environmental Assessment (EA). The attached checklist EA is for the disposal of septage in Gallatin County, Montana. Disposal would occur at this site on an as-needed basis.

The purpose of the checklist EA is to inform all interested governmental agencies, public groups, and individuals of the action and to determine whether or not the action may have a significant effect on human health and the environment.

If 'NO' checked for one or more items, provide explanation below

AAR calculated by Department based on licensee information.

5. DESCRIPTION AND ANALYSIS OF REASONABLE ALTERNATIVES WHENEVER ALTERNATIVES ARE REASONABLY AVAILABLE AND PRUDENT TO CONSIDER:

The Department considered three alternatives:

1. Approve the disposal site. The site meets all of the requirements of the Cesspool, Septic Tank, and Privy Cleaners Act (Act). The site soils, slope, depth to ground water, approvals, and setback requirements have been met.
2. Not approve the land application site. The site fails to meet the requirements of the Act.
3. Have the applicant seek an alternative site. If this alternative is chosen, the applicant will have to seek another site for land application and could spend a large amount of time and potentially money to locate, study, and license another site suitable for septage land application.

6. EVALUATION OF MITIGATION, STIPULATIONS AND OTHER CONTROLS ENFORCEABLE BY THE AGENCY OR ANOTHER GOVERNMENT AGENCY:

The proposed land application site and operation and maintenance plan must meet the requirements of the Montana Septic Tank, Cesspool, and Privy Cleaners Act, Air and Water Quality Acts and other Montana environmental laws and regulations as well as County ordinances. Compliance with these laws and regulations should keep any environmental effects to a minimum. The licensee will operate the site under the guidelines of the approved Operations Plan.

7. FINDINGS:

The Department finds that there would be little or no impacts to the physical and human environment if the septage is treated in a manner consistent with the rules and regulations. Therefore, a check list EA is the appropriate level of analysis and an Environmental Impact Statement is not needed. This treatment option is a beneficial reuse of a waste product.
