

**Montana Board of Oil and Gas Conservation  
Environmental Assessment**

**Operator:** Klabzuba Oil & Gas, Inc.  
**Well Name/Number:** Pleskac 35-15-37-15B  
**Location:** SW SE Section 35 T37N R15E  
**County:** Hill, MT; **Field (or Wildcat) W/C**

**Air Quality**

(possible concerns)

Long drilling time no, 3 to 4 days drilling time  
Unusually deep drilling (high horsepower rig) no, 2700' TD  
Possible H2S gas production no  
In/near Class I air quality area no  
Air quality permit for flaring/venting (if productive) Yes, DEQ air quality permit required.

Mitigation:

Air quality permit (AQB review)  
 Gas plants/pipelines available for sour gas  
 Special equipment/procedures requirements  
 Other: \_\_\_\_\_  
Comments: no special concerns – using small rig to drill to 2700'

**Water Quality**

(possible concerns)

Salt/oil based mud no, freshwater and freshwater mud system.  
High water table no  
Surface drainage leads to live water no, closest drainage is 1/2 mile to the east. An unnamed ephemeral drainage to Creedman Coulee.  
Water well contamination none nearby.  
Porous/permeable soils no, bentonite soils  
Class I stream drainage no

Mitigation:

Lined reserve pit  
 Adequate surface casing  
 Berms/dykes, re-routed drainage  
 Closed mud system  
 Off-site disposal of solids/liquids (in approved facility)  
 Other: \_\_\_\_\_  
Comments: 200' of surface casing cemented to surface adequate to protect freshwater zones. Also, fresh water mud systems to be used.

**Soils/Vegetation/Land Use**

(possible concerns)

Stream crossings no  
High erosion potential no, small cut, up to 4.3' and small fill, up to 2.7', required.  
Loss of soil productivity no, location will be restored after drilling, if nonproductive. If productive, unused portion of drillsite will be reclaimed.  
Unusually large wellsite no, 200'X200' location size required.

Damage to improvements slight  
Conflict with existing land use/values Slight

Mitigation

- Avoid improvements (topographic tolerance)
- Exception location requested
- Stockpile topsoil
- Stream Crossing Permit (other agency review)
- Reclaim unused part of wellsite if productive
- Special construction methods to enhance reclamation
- Other \_\_\_\_\_

Comments: Access will be over existing country roads. About 1100' of new access road will be built off existing trails. Cuttings and mud solids will be buried in the earthen pits. Drilling fluids will be hauled to a nearby stock pond with surface owner approval. Pit will be backfilled after allowing pit to dry. No special concerns

---

### Health Hazards/Noise

(possible concerns)

Proximity to public facilities/residences None nearby

Possibility of H2S none

Size of rig/length of drilling time Small drilling rig/short 3 to 4 days drilling time

Mitigation:

- Proper BOP equipment
- Topographic sound barriers
- H2S contingency and/or evacuation plan
- Special equipment/procedures requirements
- Other: \_\_\_\_\_

Comments: no concerns

### Wildlife/recreation

(possible concerns)

Proximity to sensitive wildlife areas (DFWP identified) n/a Creedman Coulee National Wildlife Refuge boundary about 2 miles to the northwest of this location.

Proximity to recreation sites none identified.

Creation of new access to wildlife habitat no

Conflict with game range/refuge management no

Threatened or endangered Species no

Mitigation:

- Avoidance (topographic tolerance/exception)
- Other agency review (DFWP, federal agencies, DSL)
- Screening/fencing of pits, drillsite
- Other: \_\_\_\_\_

Comments: no concerns

---

---

---

### Historical/Cultural/Paleontological

(possible concerns)  
Proximity to known sites None identified  
Mitigation  
 avoidance (topographic tolerance, location exception)  
 other agency review (SHPO, DSL, federal agencies)  
 Other:  
Comments: on private land

**Social/Economic**

(possible concerns)  
 Substantial effect on tax base  
 Create demand for new governmental services  
 Population increase or relocation  
Comments: no concerns

**Remarks or Special Concerns for this site**

Well is a 2700' Second White Specks Formation test

**Summary: Evaluation of Impacts and Cumulative effects**

No long term impacts expected. Some short term impacts will occur, but can be mitigated in time.

I conclude that the approval of the subject Notice of Intent to Drill (does/**does not**) constitute a major action of state government significantly affecting the quality of the human environment, and (does/**does not**) require the preparation of an environmental impact statement.

Prepared by (BOGC): Steven Sasaki
