Amy Bamber	Threatened & Endangered Species	Acceptable	Yes: <input type="checkbox"/> No: <input checked="" type="checkbox"/> Date:	Date:	Moderate	2/5/07	The reason I classified the potential impact on the environment as moderate is because the species in this area rely heavily on vegetation for survival. The choices and rates of chemical, combined with no revegetation plan, could negatively affect the species. Otherwise, the mitigation measures and species knowledge offered up by the applicant was appropriate.
