Ladies and Gentlemen:

To comply with the Administrative Rules of Montana, 17.4.607(2) and 17.4.609(2), the Department of Environmental Quality (Department) prepared the enclosed checklist Environmental Assessment (EA). The attached checklist EA is for the disposal of septage, portable toilet/vault toilet type waste, grease trap waste, and car wash sump waste in Lincoln County, Montana. Disposal would occur at this site on an as-needed basis.

The purpose of the checklist EA is to inform all interested governmental agencies, public groups, and individuals of the action and to determine whether or not the action may have a significant effect on human health and the environment. The Department will issue a license after publication of the checklist EA.

If you have any questions or need additional information, please contact me at the Permitting and Compliance Division, Waste and Underground Tank Management Bureau, Solid Waste Section, (406) 444-1434 or e-mail renhill@mt.gov.

Sincerely,

Renai Hill
Environmental Science Specialist
Waste & Underground Tank Management Bureau

***CHECKLIST ENVIRONMENTAL ASSESSMENT
SEPTIC TANK PUMPERS***

1. PROJECT PURPOSE AND NEED FOR AGENCY ACTION:

Mr. Gerald Bennett of J M F SERVICES (STP License S-856) has submitted an application for a land application site. J M F SERVICES is located in Lincoln County at 650 Taylor Rd., Libby, MT and conducts business in Lincoln, Flathead, and Sanders counties.

The purpose of this checklist Environmental Assessment (EA) is to document environmental issues related to the disposal of septage, portable toilet/vault toilet type waste, grease trap waste, and car wash sump waste on the Lee A. Disney Property located in Lincoln County at Section 26, T29N, R31W.

2. DESCRIPTION OF PROPOSED ACTION:

Septic Tank Pumper Disposal site application for a:

(check one only and complete a separate assessment for each site)

- Wastewater Treatment Facility
- Land Application Site
- Septage Processor or Composter
- Class II Landfill
- other (specify)

3. OPERATION & MAINTENANCE (O&M) PLAN:

Source, Types and Amount of Wastes:

- Septage – estimated total gal/year **350,000**
- Portable Toilet/Vault Toilet Type Waste – estimated total gal/year **25,000**
- Grease Trap Waste - estimated total gal/year **8,000**
- Sump Pumpings *(specify type below)*
 - Automatic Car Wash Bay Sump - estimated total gal/yr
 - Attended Car Wash Bay Sump - estimated total gal/yr
 - Unattended Car Wash Bay Sump - estimated total gal/yr **2,000**
 - Other Sump, specify: _____ estimated total gal/yr

5. DESCRIPTION AND ANALYSIS OF REASONABLE ALTERNATIVES WHENEVER ALTERNATIVES ARE REASONABLY AVAILABLE AND PRUDENT TO CONSIDER:

The Department considered three alternatives:

1. Approve the disposal site. The site meets all of the requirements of the Cesspool, Septic Tank, and Privy Cleaners Act (Act). The site soils, slope, depth to ground water, approvals, and setback requirements have been met.
2. Not approved. The land application site fails to meet the requirements of the Act.
3. Have the applicant seek an alternative site. If this alternative is chosen, the applicant will have to seek another site for land application and could spend a large amount of time and potentially money to locate, study, and license another site suitable for septage land application.

6. EVALUATION OF MITIGATION, STIPULATIONS AND OTHER CONTROLS ENFORCEABLE BY THE AGENCY OR ANOTHER GOVERNMENT AGENCY:

The proposed land application site and operation and maintenance plan must meet the requirements of the Montana Septic Tank, Cesspool, and Privy Cleaners Act, Air and Water Quality Acts and other Montana environmental laws and regulations as well as County ordinances. Compliance with these laws and regulations should keep any environmental effects to a minimum. The licensee will operate the site under the guidelines of the approved Operations Plan.

7. FINDINGS:

The Department finds that there would be little or no impacts to the physical and human environment if the septage is treated in a manner consistent with the rules and regulations. Therefore, a checklist EA is the appropriate level of analysis and an Environmental Impact Statement is not needed. This treatment option is a beneficial reuse of a waste product.

EA prepared by: Renai Hill

Date: January 30, 2008

TABLE 1. Predicted Impacts of the Proposed Project on the Physical & Biological Environments.

RESOURCE	LEVEL OF IMPACT ¹					
	Major	Moderate	Minor	None	Unknown	Appendix
1. Terrestrial and Aquatic Life and Habitat				✓		
2. Water Quality, Quantity, and Distribution				✓		
3. Geology and Soil Quality, Stability and Moisture				✓		
4. Vegetation Cover, Quantity and Quality				✓		
5. Aesthetics				✓		
6. Air Quality				✓		
7. Unique, Endangered, Fragile or Limited Environmental Resources				✓		
8. Demands on Environmental Resources of Water, Air, and Energy				✓		
9. Historical and Archaeological Sites				✓		

¹ CUMULATIVE IMPACTS: None for the Proposed Project, because compliance with the Montana Cesspool, Septic Tank, and Privy Cleaners Act mitigates impacts on human health and the environment and no other projects affect the area.

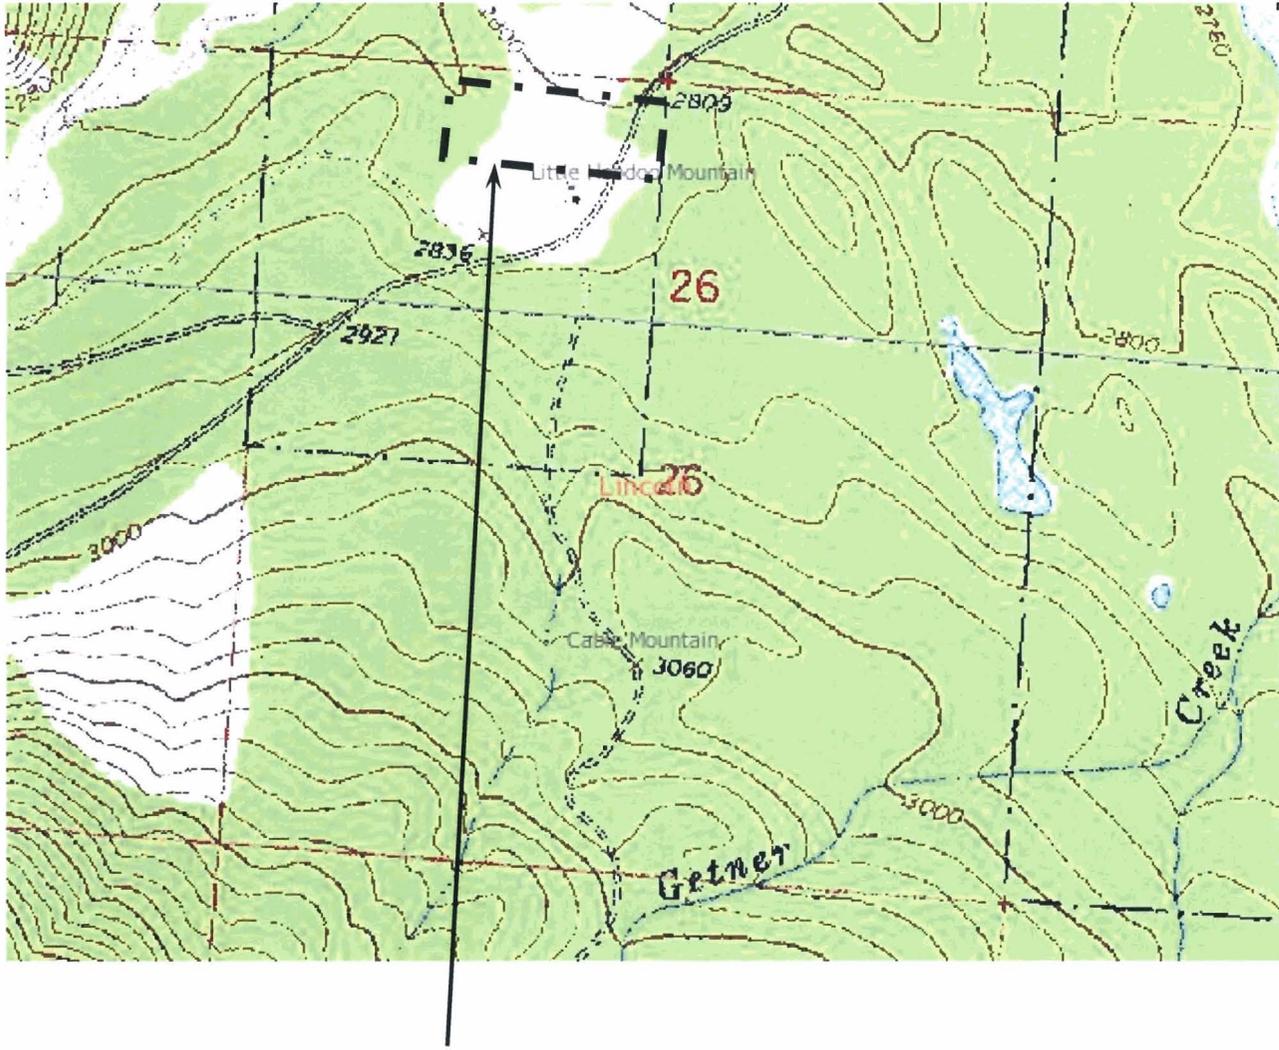

TABLE 2. Predicted Impacts of the Proposed Project on the Social & Economic Environments.

RESOURCE	LEVEL OF IMPACT ¹					
	Major	Moderate	Minor	None	Unknown	Appendix
1. Social Structure and Mores				✓		
2. Cultural Uniqueness and Diversity				✓		
3. Local and State Tax Base and Tax Revenue				✓		
4. Agricultural or Industrial Production				✓		
5. Human Health				✓		
6. Access to and Quality of Recreational and Wilderness Activities				✓		
7. Quantity and Distribution of Employment				✓		
8. Distribution of Population				✓		
9. Demands for Government Services				✓		
10. Industrial and Commercial Activity				✓		
11. Locally Adopted Environmental Plans and Goals				✓		

¹ CUMULATIVE IMPACTS: None for Proposed Project, because compliance with the Montana Cesspool, Septic Tank, and Privy Cleaners Act mitigates impacts on human health and the environment and no other projects affect the area.
