

-PUBLIC NOTICE-
Montana Department of Environmental Quality
announces
Montana Materials, Inc.
(d.b.a. LS Jensen Construction & Ready Mix)
Mullan Road Site
HOURS OF OPERATION EXTENDED

The Department of Environmental Quality has approved a request from Montana Materials, Inc. to temporarily extend its hours of operation to operate its asphalt batch plant 24 hours per day over a four-day period in late September-early October. The request was made to do a special project to provide the City of Missoula with asphalt products necessary to complete a paving project on Miller Creek Road, Highway 93 to Briggs. Montana Materials will be supplying the asphalt products, but it will be the City of Missoula that will haul the materials and perform the work. This project will require batching and hauling asphalt 24 hours per day from their plant on Mullan Road to the Miller Creek project on or about September 29th through October 2nd, 2008.

A supplemental environmental assessment (EA) has been prepared and is available on the DEQ website at <http://deq.mt.gov/ea/opencut.asp>. Also, hard copies of the application and the EA are available from the DEQ at the addresses below.
