

**Montana Board of Oil and Gas Conservation
Environmental Assessment**

Operator: Klabzuba Oil & Gas, Inc.
Well Name/Number: Pleskac 35-1-37-15D
Location: NE NE Section 35 T37N R15E
County: Hill, MT; **Field (or Wildcat)** St. Joe Road

Air Quality

(possible concerns)

Long drilling time: No, 3 to 4 days drilling time

Unusually deep drilling (high horsepower rig): No, 2700' TD, single derrick drilling rig.

Possible H₂S gas production: No

In/near Class I air quality area: No

Air quality permit for flaring/venting (if productive): Yes, DEQ air quality permit required under 75-2-211.

Mitigation:

Air quality permit (AQB review)

Gas plants/pipelines available for sour gas

Special equipment/procedures requirements

Other: _____

Comments: No special concerns – using small rig to drill to 2700'.

Water Quality

(possible concerns)

Salt/oil based mud: No, freshwater and freshwater mud system for surface and mainhole.

High water table: No

Surface drainage leads to live water: Yes, closest drainage is an unnamed ephemeral tributary drainage to Creedman Coulee, about 1/4 mile to the north of this location. In this ephemeral drainage is what appears to be a stock pond.

Water well contamination: None, no water wells within 1 mile of this location.

Porous/permeable soils: No, silty sandy bentonitic soils

Class I stream drainage: No

Mitigation:

Lined reserve pit

Adequate surface casing

Berms/dykes, re-routed drainage

Closed mud system

Off-site disposal of solids/liquids (in approved facility)

Other: _____

Comments: 200' of surface casing cemented to surface adequate to protect freshwater zones. Also, fresh water mud systems to be used.

Soils/Vegetation/Land Use

(possible concerns)

Stream crossings: None

High erosion potential: No, small cut, up to 1.8' and small fill, up to 2.3', required.
Loss of soil productivity: No, location will be restored after drilling, if nonproductive. If productive, unused portion of drillsite will be reclaimed.

Unusually large wellsite: No, 200'X200' location size required.

Damage to improvements: Slight.

Conflict with existing land use/values: Slight

Mitigation

- Avoid improvements (topographic tolerance)
- Exception location requested
- Stockpile topsoil
- Stream Crossing Permit (other agency review)
- Reclaim unused part of wellsite if productive
- Special construction methods to enhance reclamation
- Other _____

Comments: Access will be over existing state highway, St. Joe Road, #233 and existing section line trail. About 1200' of new access road will be built off existing state section line trail into this location. Cuttings and mud solids will be buried in the earthen pits. Drilling fluids will be hauled to a nearby stock pond with surface owner approval. Pit will be backfilled after allowing pit to dry. No special concerns

Health Hazards/Noise

(possible concerns)

Proximity to public facilities/residences: None, nearby

Possibility of H2S: None

Size of rig/length of drilling time: Small drilling rig/short 3 to 4 days drilling time

Mitigation:

- Proper BOP equipment
- Topographic sound barriers
- H2S contingency and/or evacuation plan
- Special equipment/procedures requirements
- Other: _____

Comments: No concerns

Wildlife/recreation

(possible concerns)

Proximity to sensitive wildlife areas (DFWP identified): Creedman Coulee National Wildlife Refuge boundary about 1.74 miles to the northwest of this location.

Proximity to recreation sites: None identified.

Creation of new access to wildlife habitat: No

Conflict with game range/refuge management: No

Threatened or endangered Species: None identified.

Mitigation:

- Avoidance (topographic tolerance/exception)
- Other agency review (DFWP, federal agencies, DSL)
- Screening/fencing of pits, drillsite
- Other: _____

Comments: Private surface lands. No concerns

Historical/Cultural/Paleontological

(possible concerns)

Proximity to known sites: None identified

Mitigation

 avoidance (topographic tolerance, location exception)

 other agency review (SHPO, DSL, federal agencies)

 Other: _____

Comments: On private surface lands. No concerns.

Social/Economic

(possible concerns)

 Substantial effect on tax base

 Create demand for new governmental services

 Population increase or relocation

Comments: No concerns. A development well in an existing gas field, St. Joe Road Gas Field.

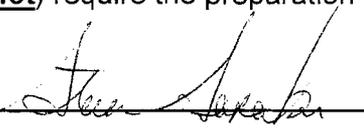

Remarks or Special Concerns for this site

Well is a 2700' Second White Specks Formation development gas well.

Summary: Evaluation of Impacts and Cumulative effects

No long term impacts expected. Some short term impacts will occur, but can be mitigated in time.

I conclude that the approval of the subject Notice of Intent to Drill (does/**does not**) constitute a major action of state government significantly affecting the quality of the human environment, and (does/**does not**) require the preparation of an environmental impact statement.

Prepared by (BOGC): Steven Sasaki 

(title:) Chief Field Inspector

Date: April 14, 2008

Other Persons Contacted:

Montana Bureau of Mines and Geology, GWIC website.

(Name and Agency)

Hill County water wells.

(subject discussed)

April 14, 2008

(date)

If location was inspected before permit approval:

Inspection date: _____

Inspector: _____

Others present during inspection: _____
