

**ENVIRONMENTAL ASSESSMENT FOR MINOR REVISION
COAL AND URANIUM PROGRAM
MONTANA DEPARTMENT OF ENVIRONMENTAL QUALITY**

COMPANY NAME: Signal Peak Energy

DATE: 05/12/2009

OPERATING PERMIT#: 93017

MR#: 08-17-12

LOCATION: Facilities Area

Type and Purpose of Action:

The operator proposes to construct a power substation at a new location within the facilities area and provide a revised route for the supply power line. The revised substation location would provide for efficient distribution of power within the facilities area. The proposed re-alignment of the powerline would route it around the majority of the facilities.

Potential Impacts and Mitigation Measures:

This would be an additional disturbance within the facilities area. Sediment control is provided for the entire facilities area.

Alternative Actions:

None
