

**ENVIRONMENTAL ASSESSMENT FOR MINOR REVISION
COAL AND URANIUM PROGRAM
MONTANA DEPARTMENT OF ENVIRONMENTAL QUALITY**

COMPANY NAME: Signal Peak Energy

DATE: 5/12/2009

OPERATING PERMIT#: 93017

MR#: 09-17-07

LOCATION: Facilities Area

Type and Purpose of Action:

The operator proposed to relocate the access road to the prep plant. The original route under the conveyer did not allow sufficient clearance for equipment. The proposed route was a minor adjustment to allow the road to cross under the conveyer in an area with greater overhead clearance.

Potential Impacts and Mitigation Measures:

The total amount of disturbance would change insignificantly. The proposed route would provide for safer equipment operation in the vicinity of the overhead conveyer.

Alternative Actions:

None
