

**SUPPLEMENTAL ENVIRONMENTAL ASSESSMENT**  
**September 2009**

**Proponent:** Riverside Contracting, Inc.

**Site:** Reinoehl

**Location:** Section 34, T15N, R14W, Missoula County

**Type and Purpose of Action:** Riverside Contracting has applied for an amendment to its Opencut Mining Permit # RCI-147 that, if approved, would modify the mined acreage level from 4.1 acres to 9.1 and facility level from 9.0 to 8.8 and would add an undisturbed parcel of 3.5 acres for a total of 21.4 acres. This would essentially result in mining the previous facility area and using the previous mining area for facilities.

The final estimated reclamation date would be extended to November 2017.

**Impacts:** The impacts of this action would be minimal, but would increase the total footprint. The impacts identified and analyzed in the original 4/29/05 Environmental Assessment would be mimicked in this action and would result in no significant, added impacts.

**Prepared by:** Steve Welch, Opencut Mining Program Environmental Specialist
