ENVIRONMENTAL ASSESSMENT
For Routine Actions with Limited Environmental Impact

Part I. Proposed Action Description

1. Applicant/Contact name and address: Camp Winnakee LLC, PO Box 330, West Glacier MT 59936
2. Type of action: Permit to Appropriate water 76I-30049990
3. Water source name: Ground water well
4. Location affected by project: SW¹/₄ NW¹/₄ of Section 36, Township 32N, Range 19W, Flathead County.
5. Narrative summary of the proposed project, purpose, action to be taken, and benefits:
The DNRC shall issue a water use permit if an applicant proves the criteria in 85-2-311 MCA are met.

This application is to obtain a water use permit for a well located in the Glacier National Park Compact Area in the above-described location. The applicant proposes to divert water using a 3 horsepower pump at a rate of 30 GPM up to 2 acre-feet per year. The proposed use is for commercial use from January 1 through December 31 for a 12-room lodge with caretaker's room inclusive of each year.

6. Agencies consulted during preparation of the Environmental Assessment:
(include agencies with overlapping jurisdiction)

The National Park Service is being notified per compact requirement.
Montana Natural Heritage Program
Natural Resources and Conservation Service soil maps
United States Fish and Wildlife Wetland Mapper

Part II. Environmental Review

1. Environmental Impact Checklist:

PHYSICAL ENVIRONMENT

WATER QUANTITY, QUALITY AND DISTRIBUTION

Water quantity - Assess whether the source of supply is identified as a chronically or periodically dewatered stream by DFWP. Assess whether the proposed use will worsen the already dewatered condition.

Determination: Not applicable, the source is ground water.

Water quality - Assess whether the stream is listed as water quality impaired or threatened by DEQ, and whether the proposed project will affect water quality.

Determination: Not applicable, the source is ground water.

Groundwater - Assess if the proposed project impacts ground water quality or supply. If this is a groundwater appropriation, assess if it could impact adjacent surface water flows.

Determination: The applicant will derive ground water from the aquifer at a rate up to 30 GPM. The well was completed to a depth of 362 feet below ground surface (bgs) and has a static water level of 77.4 feet. The well log shows shows fractured rock at 52 feet.

DIVERSION WORKS - Assess whether the means of diversion, construction and operation of the appropriation works of the proposed project will impact any of the following: channel impacts, flow modifications, barriers, riparian areas, dams, well construction.

Determination: The well was constructed with a 6.63-inch casing to a depth of 54 feet bgs, and then a 4-inch casing down to 361 feet with an open bottom. The well was completed by a licensed Montana state driller, license WWC-655, in April of 2010. No significant impacts have been noted.

UNIQUE, ENDANGERED, FRAGILE OR LIMITED ENVIRONMENTAL RESOURCES

Endangered and threatened species - Assess whether the proposed project will impact any threatened or endangered fish, wildlife, plants or aquatic species or any "species of special concern," or create a barrier to the migration or movement of fish or wildlife. For groundwater, assess whether the proposed project, including impacts on adjacent surface flows, would impact any threatened or endangered species or "species of special concern."

Determination: The Gray Wolf, Wolverine, Canada Lynx, Fisher and Grizzly Bear frequent this area of Flathead County. The well is drilled and should not impact area wildlife. Other species of concern include the Northern Goshawk, Golden Eagle, Great Blue Herron, Cassin's Finch, Brown Creeper, Pileated Woodpecker, Common Loon, Harlequin Duck, Clark's Nutcracker, Pacific Wren, Westslope Cutthroat Trout, Pygmy Whitefish, Bull Trout, Lake Trout, Brush-tipped Emerald, Reticulate Talidropper, Western Moonwort, Mountain Moonwort, Treelike Clubmoss, Pale Corydalis, Velvetleaf Blueberry and Douglas. Nechera Moss.

Wetlands - Consult and assess whether the apparent wetland is a functional wetland (according to COE definitions), and whether the wetland resource would be impacted.

Determination: There are no wetlands in the area of this project.

Ponds - For ponds, consult and assess whether existing wildlife, waterfowl, or fisheries resources would be impacted.

Determination: Not applicable, the project does not involve a pond.

GEOLOGY/SOIL QUALITY, STABILITY AND MOISTURE - Assess whether there will be degradation of soil quality, alteration of soil stability, or moisture content. Assess whether the soils are heavy in salts that could cause saline seep.

Determination: No impact.

VEGETATION COVER, QUANTITY AND QUALITY/NOXIOUS WEEDS - Assess impacts to existing vegetative cover. Assess whether the proposed project would result in the establishment or spread of noxious weeds.

Determination: The land use will not change so no impact is anticipated.

AIR QUALITY - Assess whether there will be a deterioration of air quality or adverse effects on vegetation due to increased air pollutants.

Determination: No impact.

HISTORICAL AND ARCHEOLOGICAL SITES - Assess whether there will be degradation of unique archeological or historical sites in the vicinity of the proposed project if it is on State or Federal Lands. If it is not on State or Federal Lands simply state NA-project not located on State or Federal Lands.

Determination: Not applicable; project not located on State or Federal Lands.

DEMANDS ON ENVIRONMENTAL RESOURCES OF LAND, WATER, AND ENERGY - Assess any other impacts on environmental resources of land, water and energy not already addressed.

Determination: None

HUMAN ENVIRONMENT

LOCALLY ADOPTED ENVIRONMENTAL PLANS AND GOALS - Assess whether the proposed project is inconsistent with any locally adopted environmental plans and goals.

Determination: The project is consistent with planned land use.

ACCESS TO AND QUALITY OF RECREATIONAL AND WILDERNESS ACTIVITIES - Assess whether the proposed project will impact access to or the quality of recreational and wilderness activities.

Determination: The well is drilled on private property. It will not impact recreation or effect wilderness activities.

HUMAN HEALTH - Assess whether the proposed project impacts on human health.

Determination: No impact.

PRIVATE PROPERTY - Assess whether there are any government regulatory impacts on private property rights.

Yes ___ No **XX** If yes, analyze any alternatives considered that could reduce, minimize, or eliminate the regulation of private property rights.

Determination: No impact.

OTHER HUMAN ENVIRONMENTAL ISSUES - For routine actions of limited environmental impact, the following may be addressed in a checklist fashion.

Impacts on:

- (a) Cultural uniqueness and diversity? No
- (b) Local and state tax base and tax revenues? Values already assessed.
- (c) Existing land uses? No
- (d) Quantity and distribution of employment? No
- (e) Distribution and density of population and housing? No
- (f) Demands for government services? No
- (g) Industrial and commercial activity? No
- (h) Utilities? No
- (i) Transportation? No
- (j) Safety? No
- (k) Other appropriate social and economic circumstances? None

2. Secondary and cumulative impacts on the physical environment and human population:

Secondary Impacts: None

Cumulative Impacts: None

3. Describe any mitigation/stipulation measures: None

4. **Description and analysis of reasonable alternatives to the proposed action, including the no action alternative, if an alternative is reasonably available and prudent to consider:**

PART III. Conclusion

1. **Preferred Alternative:** As proposed

2. **Comments and Responses:** None

3. **Finding:**

Yes___ NoXX_ Based on the significance criteria evaluated in this EA, is an EIS required?

If an EIS is not required, explain why the EA is the appropriate level of analysis for this proposed action: No significant impacts have been identified; therefore, no EIS is necessary.

Name of person(s) responsible for preparation of EA:

Name: Kathy Olsen
