

**ENVIRONMENTAL ASSESSMENT FOR MINOR REVISION
COAL AND URANIUM PROGRAM
MONTANA DEPARTMENT OF ENVIRONMENTAL QUALITY**

COMPANY NAME: Western Energy Company

DATE: December 15, 2011

PERMIT#: C1986003A

REVISION NO: MR56

LOCATION: Rosebud Coal Mine – Area A, T1N R41E Section 4

Type and Purpose of Action:

The permittee proposed a minor revision to SMP C1986003A: remove the existing guard shack, septic tank and leach field and install a new guard shack with a pumpable sewage holding tank.

Potential Impacts and Mitigation Measures:

All new construction would be within currently parking area. There would be less impacts to the environment because the existing sewage leach field would be removed and future sewage would be taken to the city treatment facility. Mitigation would include complete removal of all proposed facilities and complete reclamation of the site.

Alternative Actions:

No alternative were considered.
