T-K Farms Weirs & bank Armoring LUL# 6213	Spring 2013	EA CK	AG	The Proponent has applied to the DNRC for a Land Use License (LUL) for the purpose of rebuilding three (3) 40' bendway weirs and constructing two new weirs between the existing ones while also placing 50 cubic yards of rock to replace and supplement existing bank armoring at an irrigation pumphouse in the Yellowstone River near Pompeys Pillar in Yellowstone County. The purpose of the project is to stabilize the north/west bank of the Yellowstone River that has become unstable due to flooding in 2011. The Yellowstone River is currently eroding this bank and is beginning to threaten the private land north of it. The reconstructed weirs would have their angle changed slightly to help better redirect river flow as well as adding two new weirs between the existing ones. All of the weirs would extend 40' into the channel. Additionally, 50 cubic yards of rock would be placed along the river bank to supplement existing armoring that protects an irrigation pumphouse. Project activities are expected to occur in early spring 2013 during low water flow. MDT Hwy 200 Lincoln-East Improvements	April 1, 2013	EA CK	ROW	Montana Department of Transportation is proposing a widening and realigning of approximately 7.5 miles of US Hwy 200 east of Lincoln, MT. Project follows existing alignments and is proposed to address highway safety issues associated with limited sight distances and passing opportunities. It will provide a 36 foot paved roadway surface, updated hydraulic features and better domestic and wild-animal accommodations. The specific activity on DNRC lands involves granting additional easement area to MDT on 2 parcels of school trust land sections 12 T14N-R8W and 6 T14N-R7W. NorthWestern Energy Wicks Lane Substation Easement Expansion	Spring 2013	EA CK	ROW	NorthWestern Energy is proposing a minor expansion of 0.096 acres to an existing 5.74 acre easement they currently have on Trust land. NorthWestern is proposing to make some upgrades to the substation to improve its reliability and to do this they need to expand the existing fenced area that surrounds the entire substation. Good Shepherd Timber Sale	June 2013-Oct 2015	EA	TS	The Montana Department of Natural Resources and Conservation (DNRC) is proposing timber management activities on up to 4,899 acres in the Blackfoot Clearwater Game Range. The proposed projects would include commercial timber harvests that would produce approximately 6 million board feet of timber, pre-commercial thinning projects and aspen restoration projects. The proposed treatments would emulate disturbances caused by natural wildfire events, bring stands closer to the desired future condition, remove overstory trees with high defect and improve overall health and vigor. This would result in an overall reduction in stand density which would allow the residual stand to utilize additional sunlight, nutrients and water and thereby promote growth. Environmental Assessment for the Thompson Face Timber Sale	July 2013	Categorical Exclusion	TS	The Department of Natural Resources and Conservation (DNRC) is proposing to harvest approximately 7,000 tons (1.3 MMBF) of timber in the Thompson River drainage, roughly 25 air miles Northwest of Plains, Montana, in Sanders County. The project would involve ground and cable based harvest systems, mechanical slash piling and slash pile burning over 165 acres. This action would produce an estimated \$140,000.00 for the Common Schools (CS) Trust Grant, and approximately \$33,000.00 in Forest Improvement Fees. The proposed action would reduce fuel loading and related wildfire risk, maintain and improve forest health, promote historic timber types and increase forest productivity beneficial to future trust actions	Common Schools		DNRC Plains Unit	T24N R27W Sec 26	Sanders	TLMD	Kyle Johnson	Larry Ballantyne
