

2013 Biennium Legislative Budget By Function - Federal Special (Millions)

Last week, the chart of the week showed how much of the 2013 biennium budget is funded with federal funds. The above chart shows which state agencies use federal monies for the delivery of services to the citizens of Montana. State human service and transportation programs use over 81 percent of the total federal monies received from federal programs. The budgeted amounts for HB2 (general appropriations act) are shown in “blue” text and other budget amounts are shown in “red” text. The sum of the two amounts equals the total budgeted amount of \$4.3 billion for the 2013 biennium.
