

## Montana University System Historical Student Enrollment and Annual Enrollment Growth by Institution Type

**Source: Montana University System FY 2011 Enrollment Report**  
**Data reported includes enrollment in the Montana University System and Community Colleges**

Full-time equivalent student enrollment in Montana public postsecondary education institutions is at an historic all-time high. This chart shows total enrollment at campuses within the Montana University System and Community Colleges from FY 2001 through FY 2011 and the annual change in FTE enrollment from FY 2002 through FY 2011 at 4-year and 2-year campuses. Most of the enrollment gain realized over the last 10 years has occurred during the most recent three fiscal years, FY 2009 through FY 2011. In addition, although enrollment in 2-year institutions (community colleges and colleges of technology) accounted for only 22% of total FTE enrollment in FY 2011, just over one-half of the 10-year enrollment growth has been at the 2-year institutions.
