

The black line on the chart demonstrates the actual revenue collected from FY 2008 to FY 2012. The blue line shows the revenue anticipated at the end of the 2011 session. The green line shows the revenue estimated for FY 2013 to FY 2015 and contained in the 2015 Biennium SJ2 Revenue Estimate. While state revenues declined in FY 2009 and FY 2010, the last two years have brought stability to the general fund revenues. The next two years anticipate continued growth in the general fund revenue and growth patterns are anticipated to even out to just under the long term growth trend in FY 2014 and FY 2015. For further information, please refer to the general fund revenue update provided to the legislature on January 17, 2013.
