

Coal Trust Interest

Revenue Description

The coal trust is one of several trusts set up with money from the Coal Severance Tax. The interest money from this fund is for a variety of purposes with the majority going to fund the Public Employees Retirement System.

[Article IX, Section 5](#) of the Montana Constitution requires that 50% of all coal severance tax revenue be deposited in a permanent coal trust fund in which appropriation of the principal requires a three-fourths vote of each house of the legislature. Coal severance tax funds flowing into the trust fund are first used to secure and subsidize state bonds issued to finance water resource and renewable resource development projects and activities. The remaining funds are then split 50% (25% of total revenue) to the Treasure State Endowment trust fund, 25% (12.5% of total revenue) to the Treasure State Endowment Regional Water System trust fund, and 25% (12.5% of total revenue) to the Big Sky Economic Development trust fund.

The permanent trust fund currently does not receive coal severance tax revenue; however, the distributions to the treasure state endowment trust fund and the treasure state endowment regional water system trust fund terminate on June 30, 2016. After this date, amounts that had been distributed to the two treasure state trust funds will be distributed to the permanent fund. By statute, interest earned on the coal severance tax permanent trust that is not earmarked to other programs is deposited to the general fund.

For more information on the coal permanent trust earnings and distributions, see the chart in the [Coal Severance Tax](#) section.

Statutory Reference

Distribution – [Montana Constitution, Article IX, Section 5](#); [17-5-704, MCA](#); [15-35-108, MCA](#)

Applicable Tax Rates: N/A

Collection Frequency: Monthly

Distribution

Interest earned on the coal severance tax permanent trust fund that is deposited to the general fund is statutorily appropriated as follows:

- \$65,000 to the cooperative development center;
- \$625,000 for the growth through agriculture program provided for in [Title 90, chapter 9](#);
- \$1.275 million to the research and commercialization account created in [90-3-1002](#);
- to the Department of Commerce for specific projects:
 - \$125,000 for a small business development center;
 - \$50,000 for a small business innovative research program;
 - \$425,000 for certified regional development corporations;
 - \$200,000 for the Montana manufacturing extension center at MSU-Bozeman; and
 - \$300,000 for export trade enhancement
- After the above payments, up to \$21 million is appropriated to the public employees' retirement system defined benefit plan trust fund

Comparison of Legislative and Executive Forecasts

The difference between the legislative and executive forecasts is due to the difference in the estimated balance in FY 2017, as the legislative estimate assumes that the coal permanent trust

Interest Earnings

Coal Trust Interest

balance will receive the current principle of regional water trust fund once the trust sunsets at the end of FY 2016.

Coal Trust Interest (\$ Millions)				
	FY 2015	FY 2016	FY 2017	Total
Executive Forecast	\$20.550	\$19.870	\$20.050	\$60.470
Legislative Forecast	20.473	19.849	22.491	62.813
Difference	\$0.077	\$0.021	(\$2.441)	(\$2.343)
% Difference	0.4%	0.1%	-10.9%	-3.7%

Forecast Risks

- Short and long term interest rates
- Bond rates

Revenue Estimate Methodology

Data

The Board of Investments (BOI) provides information on historic interest rates as well as the gains and losses from the sale of securities. Projections of future long-term interest rates are provided by the BOI and short-term rates are provided by IHS.

Analysis

The coal trust was created from distributions of the coal severance tax. The Constitution requires that 50% of the coal severance tax collections be distributed into the permanent coal trust; currently, the required coal tax revenue flows into the three sub-trusts and none of the tax revenue is deposited into the permanent coal trust.

Each of the following interest or income components are estimated independently and combined to produce the estimate:

- Trust funds bond pool (TFBP)
- In-state investments
- Short-term investment pool (STIP)

The TFBP was formed in 1995 to manage the fixed investments held in the state's major trust funds. Each trust owns "shares" of the pool and interest earnings are paid to each trust on a per-share basis. Yearly return rate estimates provided by the BOI are applied to the current and estimated future trust balance to produce a TFBP earnings estimate.

Interest Earnings**Coal Trust Interest**

The BOI is required by statute to invest 25% of the coal tax trust in the Montana economy. In-state investments primarily consist of loans to Montana business entities and earnings are equal to the interest charged on the loans.

STIP interest (including other interest) is earned on cash, prior to investment in long-term investments. Funds are acquired from new deposits and maturing securities in the forecast period. Funds are held in STIP until the BOI determines that conditions are favorable for investment in the TFBP. STIP earnings are modeled on an average short-term interest rate based on IHS projections of three short-term investments

After the estimates are calculated, the projected earnings the sources are combined to reach total coal trust interest revenue, and the revenues are distributed as described above.
