Daikibo Methodology –Design sessions under this new approach began on April 23, 2014. PK has developed a survey for DPHHS BA/PMs and DPHHS SMEs to monitor the progress and quality of the design sessions. Survey results will be collected bi-weekly. Following are BA/PM and SME survey results from the week ending 3/13/15.

Xerox Corrective Action Plan (CAP) – DPHHS delivered a requirement for corrective action to Xerox on 11/26/14. The document outlines the deficiencies in the areas of project schedule management, design session preparation, design session execution, project staffing, design documentation, and deliverable quality. A primary resolution for the Xerox corrective action plan is for DPHHS to move to the Xerox Health Enterprise (HE) Platform. DPHHS approved the Platform CR and the Corrective Action Plan on 2/10/15. Measurement of the Corrective Action Plan began on 3/12/15. Due to a Blueworks database corruption, Xerox was not able to deliver CAP Item A – Documentation. Xerox is currently working with IBM to resolve the corruption issue. DPHHS will continue monitoring Xerox performance on CAP Items F – Project Management Metrics and G – Project Staffing.

Staffing Attrition – The subcontract between Xerox and Cognizant was executed in June 2013. Since the contract execution and the rebadging of Xerox staff to Cognizant, there has been attrition of key project staff. The following 42 Xerox project staff have resigned since July 2013.  - This methodology does not allow proactive participation by DPHHS SMEs in design decisions
 - The Sprint Release Plan delivered on 4/12/14 does not appear to have a reasonable number of use cases allocated to Concept Sprint 1
 - Xerox has indicated that concept work not completed in Sprint 1 will be moved to a later sprint
 - As part of the cure for the material breach, Xerox has 90 days to correctly implement dependencies for the concept and delivery sprints, and correctly align the dependencies in the Concept Release Plan and JIRA

The table and graphic on the following page show the Delivery metrics reported in the Xerox PM Metrics portal as of 3/18/15. This portal was updated on 3/11/15 to address CAP item F, Project Management Metrics Portal. With this portal update, there were significant changes to Planned, Committed and Actual numbers previously reported for Sprints 9 – 26. Changes to numbers for past sprints were not expected with this update. DPHHS has requested an explanation from Xerox about why these numbers changed, but the explanation has not yet been provided.

Schedule Performance Index (SPI)

In early December 2014, DPHHS questioned the Xerox work plan progress reporting methodology. Xerox stated that they were using a time-based reporting approach, rather than reporting on actual progress. Xerox delivered one status report in early December based on actual progress, rather than the time-based approach, then stated that they discovered many problems in JIRA with dependencies and task mapping to Microsoft Project. They went back to the time-based reporting approach until 12/16/14, when they began reporting on actual task progress again.

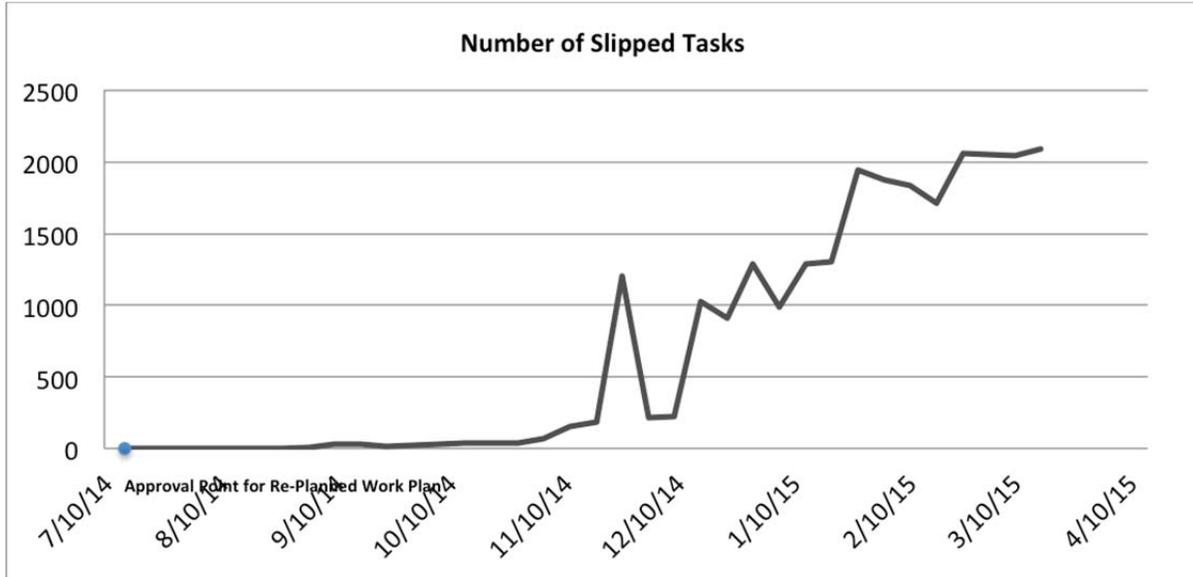

The PK calculated SPI may vary from Xerox reported number based on the following difference in Planned / Earned Value measurement:

- Xerox calculates planned value at the task level while evenly distributing planned hours over the lifetime of the task. As of the July 18, 2014 Monthly Report, Xerox performs a manual calculation for earned value by multiplying the total Baseline Cost by the % work complete. This manual calculation is necessary as the MS Project Server was not able to accurately “roll-up” the values from the thirty-five sub-plans into the “Master Project Sprint Schedule” work plan.
- PK calculates planned value by the hours scheduled to have been completed to date.
- PK continues to use the earned value calculations reported by Xerox in the SPI calculation.

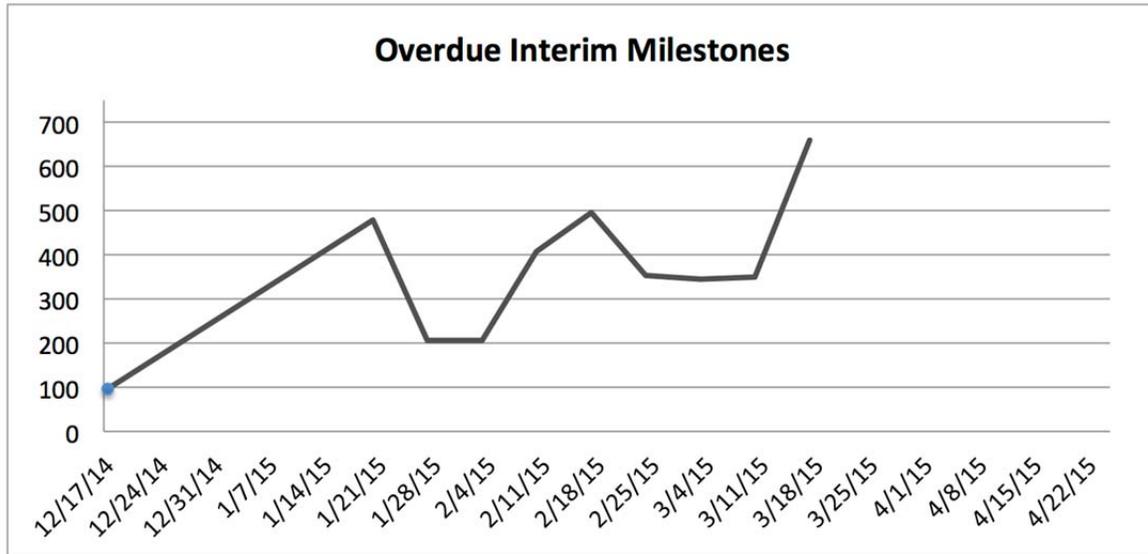

Slipped Tasks

Slipped tasks are tasks whose baseline start and/or finish dates have passed.

There were 2,092 slipped tasks reported by Xerox on 3/17/15, for the period ending 3/13/15.

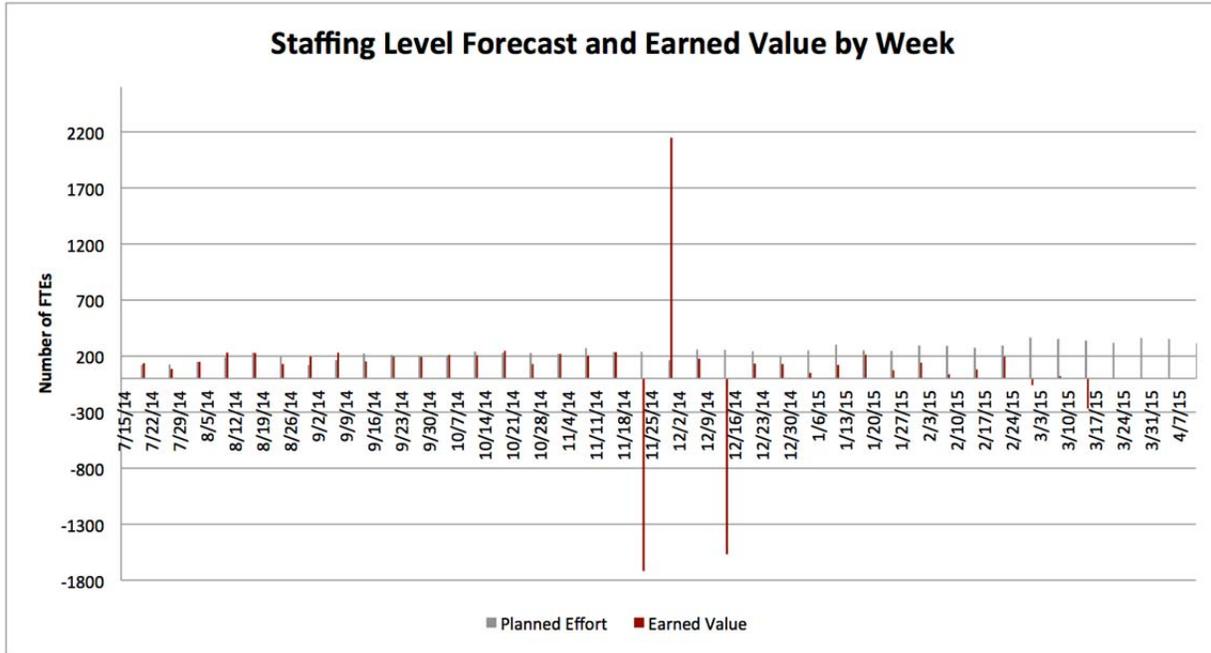

Overdue Interim Milestones

There are 660 past due interim milestones, as of 3/17/15.

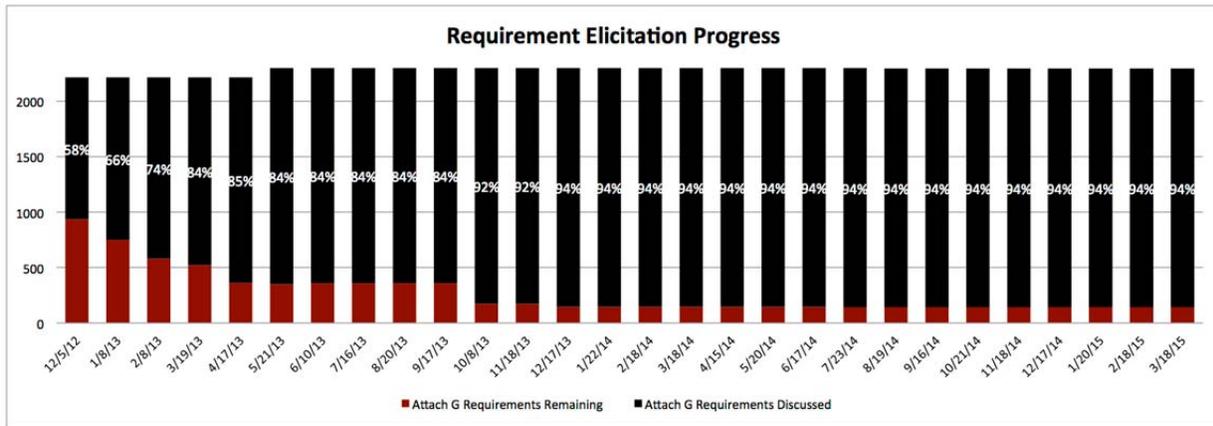

Please note that the overdue interim milestone count reported by Xerox for the weeks of 1/28/15 and 2/4/15 were missing counts for some of their work plans, so the number was under-reported. Xerox has corrected the reporting error and will report overdue interim milestones for all work plans, going forward.

Staffing Level Forecast and Earned Value

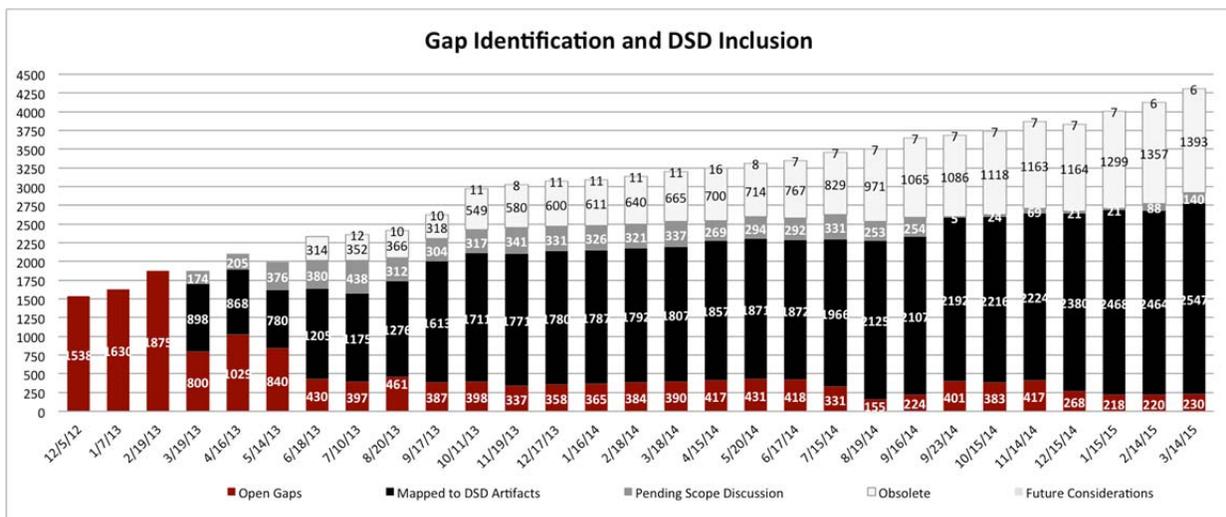

Earned Value variance last reporting period was 923.35 and this reporting period is -10,721.87.

Requirement Elicitation Progress

There are 6% of the Attachment G requirements that have not yet been discussed in all relevant requirements sessions.

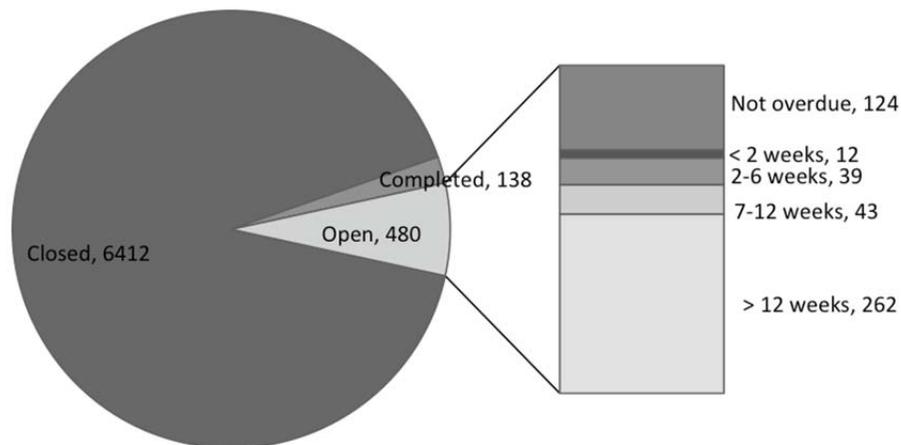

Gap Identification and Design

Note: The number at the top of each column (starting in July 2013) is the count of gaps with the status "Future Consideration".

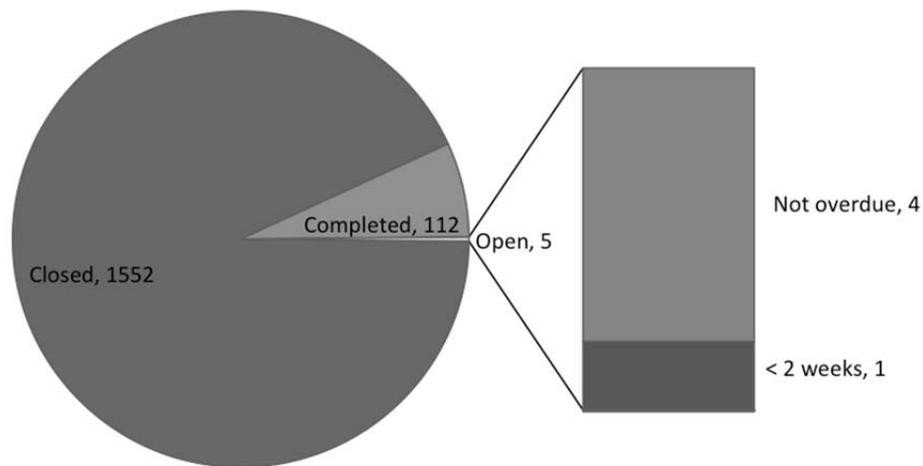

- There are 112 gaps in a "New" status in DOORS
- There are 28 gaps in a "Pending" status in DOORS
- 32% of identified gaps have been assigned a status of "Obsolete" in DOORS
- The Obsolete Gap count has increased by 36 since the February 2015 monthly report
- There are a large number of gaps (230) that have not been mapped to a DSD artifact. This number has increased by 10 since the February 2015 report
- Total gaps are 4,316, and increase of 181 from the February 2015 report
