- 14 **Jobs Jobs Jobs**
- Public Works Projects led to Jobs. Engineering, Construction, Suppliers.
 -
 - Good Public Works projects lead to good infrastructure that attracts Growth; which is more jobs
 -
 - Jobs and public works projects lead to good quality of life
 -
 -
- 15 **Municipal problems**
- Increased DEQ rules
 - Uncertainty in the Federal programs
 - RD
 - CDBG
 - State TSEP on the chopping block
 - Municipal Bond market under currents
 -
- 16 **Solution**
- Fund TSEP – the buying power in today’s construction market allows the State to get big bang for the buck
 - Allow municipalities to barrow from the Coal Trust eliminating the uncertainty of the Bond Market.
 - Montanan’s paying interest to themselves
 -
- 17 **DEQ and the private sector**
- Private sector construction jobs for the next two years will be energy development
 - DEQ’s complex approach to permits are detouring companies from investing here.
 -
 -
- 18 **Solution**
- The reviewer of the permit can not be the enforcer of it. Major conflict
 - The process of acquiring a permit needs to be a concise process. The process can not be influenced by a regulators option of the project.
 -
- 19 **The courts and the private sector**

- A lot of ground has been made my requiring that litigation be in the county that the project is located
- More has to be done to protect private companies that wish to do activities in Montana from legal action and legal delays.

20 **Solution**

- When a permit is issued, limit the legal action.
- If a group or citizen wishes to bring legal action require a monetary risk with that legal action
- Tort reform
