AGENCY IMPACT DETERMINATION

The Solid Waste Management Bureau has conducted an environmental review of Charles Evans' motor vehicle wrecking facility, D & B Foreign Auto Parts and Service, Missoula, Montana.

The motor vehicle wrecking facility is located northeast of the Hoerner Waldorf mill and is north of the frontage road between Missoula and Frenchtown in Missoula County. Approximately two acres of the tract have been set aside as the motor vehicle wrecking facility location. Attached is a map showing the exact location.

Screening of the wrecking facility from public view will be attained by constructing a board fence approximately eight feet high. Shielding must be accomplished in compliance with Rule 16-2.14(2)-S14261, Motor Vehicle Wrecking Facilities, prior to May 4, 1975.

The Solid Waste Management Bureau will periodically inspect the motor vehicle wrecking facility for compliance with all the applicable laws and rules governing such operations.

The Solid Waste Management Bureau has the responsibility of approving applications to operate a motor vehicle wrecking facility, along with the approval of the facility site location, before a license will be issued. The proposed facility site location was inspected by a representative of this office and field approval granted on March 12, 1975.

After careful review of the motor vehicle wrecking facility site location, our conclusion is that the facility will not have a significant impact on the area.

Respectfully submitted,

Vic R. Andersen, R.S.
