AGENCY IMPACT DETERMINATION

The Solid Waste Management Bureau has conducted an environmental review of the Julius Olson motor vehicle wrecking facility.

The motor vehicle wrecking facility is located in the old Three Forks town site which is approximately 1½ miles northeast of Three Forks. Attached is a map showing the exact location.

The ground surface is level, thus making it possible to shield the facility from the adjacent public roadways.

The Solid Waste Management Bureau will periodically inspect the private motor vehicle wrecking facility for compliance with all the applicable laws and rules governing such operations.

The Solid Waste Management Bureau has the responsibility of approving all new wrecking facility locations before a license will be issued. The wrecking facility location was inspected by a representative of this office and field approval granted on March 3, 1975.

After careful review of the disposal site location, our conclusion is that this motor vehicle wrecking facility will not have a significant impact on the area.

Respectfully submitted,
