Federal Highway Administration  
Helena, Montana 59601

Gentlemen:

This Agency Impact Determination is being submitted for your concurrence that an Environmental Impact Statement or Negative Declaration is not required for this nonmajor action.

The proposed project is located approximately 2 miles west of Havre, Montana, at the junction of U.S. 2 and U.S. 87. Three 250 watt sodium vapor luminaires with a mounting height of 40 feet are proposed at this junction.

The junction presently has some raised median for channelization and needs to be lighted so drivers can more easily see the median. Thus, improving a potentially hazardous junction.

The power which will be used by the three luminaries will be 180 kilo-watt hours per month. This is approximately 1/3 the power used by the average home per month.

There will be no significant effect upon the natural and cultural resources of the area. Soil erosion, park, recreational areas, wildlife, water fowl refuges, historic and natural landmarks are not involved in this project.

The water quality of the area will not be affected. The Department of Health and Environmental Sciences has reviewed this project and assured us that this project will not affect the air quality of the area. The noise levels should not change due to this project.

Based on the foregoing, it is felt that the proposed project will not significantly affect the environment and does not warrant the preparation of an Environmental Impact Statement or a Negative Declaration.

Re: 36-SCK Flasher, Sign  
and Lighting Projects

Dear Mr. Kologi:

We concur that flasher, signing and/or lighting projects should have no adverse effects on air quality. Until further notice, we will not need to be advised of action on these projects.

Sincerely,

*R. Clark Neilson*
