Helena, Montana 59601

Gentlemen:

This Agency Impact Determination is being submitted for your approval on ROS-63(1).

This project is located on Federal-aid Secondary Route 289 approximately 22 miles west of Bozeman at the Elk Creek Crossing. The project will replace a narrow, hazardous bridge with a large culvert of an appropriate size.

The project will not affect other public works activities or result in any alteration of land use. It will not affect traffic flow patterns. It appears that no new right-of-way will be required. The major impact of the project will be elimination of this roadside hazard.

We feel that this project is not a major action and will not significantly affect the environment, air, noise, or water quality of the area.

We also request waiver of a public hearing and location and design approval.

Very truly yours,

H. J. ANDERSON
DIRECTOR OF HIGHWAYS
