RE: Osprey Subdivision
Missoula County

Dear Sir/Madam:

Enclosed please find an Environmental Assessment (EA) completed by this Program for the above referenced subdivision. Due to the minimal impacts anticipated from this proposal, this EA has not been circulated to all departments for comment, but has only been forwarded to yourselves and copied to the below.

If you have any questions or comments on the above or I can be of further assistance, please feel free to call on us at the Permitting and Compliance Division at 444-3080.

Sincerely,

ENVIRONMENTAL ASSESSMENT (EA)

Division/Bureau Department of Environmental Quality, Permitting and Compliance Division

Project or Application Osprey Subdivision

Location Southeast 1/4 of Section 21, Township 13 North, Range 20 West

Description of Project This project is a 7 lot subdivision in Missoula County

Water Supply Two lots of the subdivision are supplied with water service through connection to the Hidden Heights Water system, and the other five lots are supplied by individual wells.

Sewage Treatment One lot is served by an existing septic tank and drain field. The remaining six lots will be served by a multiple family wastewater treatment system, consisting of a common septic tank, a dosing tank, and common drain field.

Benefits and Purpose of Proposal This proposal will develop a 33.7 acre parcel into 7 single family residential lots.

Regulatory Impact Analysis

The Sanitation in Subdivisions Act imposes regulatory restrictions on this subdivision which require department review and approval of designs for water supply, wastewater treatment, storm water and solid waste disposal systems. Private property may not be developed for activities that require water supply or wastewater disposal until approval is issued by the Department of Environmental Quality. The impact on this private property is that the systems must be constructed at a cost to the applicant, and that several limitation may be imposed regarding the number of lots which may be created, treatment technologies which may be considered, and/or locations of buildings and sanitary facilities. These requirements have been established to protect public health and water quality.

Alternatives/Rationale:

The systems were proposed by the applicant in the initial application. The department accepts the systems proposed by the applicant as the most economically feasible approach.
