

MONTANA DEPARTMENT OF NATURAL RESOURCES AND CONSERVATION
WATER RESOURCES DIVISION
WATER RIGHTS BUREAU

ENVIRONMENTAL ASSESSMENT

PART I. PROPOSED ACTION DESCRIPTION

1. **Type of action:** Water use permit application no. 41I-P104254-00
2. **Applicant/Contact name and address:** McHUGH MOBILE HOME PARK PARTNERSHIP
3000 VILLARD #60
HELENA, MT 59601
3. **Water source name:** GROUNDWATER WELL
4. **Location affected by action:** SENWNE OF SEC 19, TWP 10N, R03W
5. **Narrative summary of the proposed project and action to be taken:** McHugh Mobile Home Park has approximately 279 lots and most of the park is already developed. This application for permit is only to supply additional volume (5.33 AF) necessary to irrigate 6 acres of lawn and garden; it is the same well as 41I-C082328-00 which has a volume of 9.67 AF.
6. **Agencies consulted during preparation of the environmental assessment:** None

PART II. ENVIRONMENTAL REVIEW

1. Environmental Impact Checklist:

PHYSICAL ENVIRONMENT

Soils/Geologic Features:

Degradation of soil quality or alteration of soil stability, moisture content, geologic substructure, unique geologic features, archeological sites?

None

Erosion:

Alteration of erosion or siltation patterns which modify stream beds or lake shores?

None

Vegetation/Noxious weeds:

Change in or adverse affect on diversity and production of local plant species including any unique or endangered species (including trees, shrubs, grass, and aquatic plants)? Establishment or spread of noxious weeds?

None

Air:

Deterioration of air quality, or adverse effects on vegetation due to increased air pollutants.

None

Water:

Alteration of surface water or groundwater quality including but not limited to temperature, dissolved oxygen or turbidity or quantity or distribution?

None

Floodplain:

Changes in drainage patterns, course or magnitude of flood flows, or exposure of people/property to hazards (flood)?

None

Wildlife Habitat/Migration:

Deterioration of critical fish or wildlife habitat? Creation of a barrier to the migration or movement of fish or wildlife?

None

Endangered Species:

Adverse effects on any unique or endangered species?

None

HUMAN ENVIRONMENT

Existing Land Use:

Alteration of or interference with the productivity or profitability of the existing land use of an area?

None

Historical Significance:

Destruction or alteration of a natural area of scientific or educational value or prehistoric or paleontological importance?

None

Populace:

Alteration of the location, distribution, density, or growth rate of the human population of an area? Alteration of social structure of community?

Because the lots are already developed there will not be any alteration to the populace or the community structure.

Transportation:

Increased traffic hazards or effects on existing transportation facilities or patterns of movement of people and goods?

None

Safety:

Creation of any health hazard or affect on existing emergency response or evacuation plans?

None

Public Services:

Have an effect upon or result in a need for new or altered governmental services in any of the following areas: fire or police protection, schools, parks/recreational facilities, roads or other public maintenance, water supply, sewer or septic systems, solid waste disposal, health, or other governmental services? Have an effect upon local or state tax base?

None

Utilities:

Creates need for new or altered facilities for any of the following utilities: electric power, natural gas, other fuel supply or distribution systems, or communications?

None

Aesthetics:

Alteration of any scenic vista or recreation opportunity or creation of an aesthetically offensive site to the public?

None

Other:

None

2. Secondary and cumulative impacts: None

3. Reasonable alternatives to the proposed action, including the no action alternative:

The only alternative is the no action alternative. However, the lots and an existing water system are already developed. However, the water system that provides domestic supply is inadequate and is not able to provide lawn irrigation for the lots.

PART III. CONCLUSION

Based on the significance criteria evaluated in this EA, is an EIS required? No

If an EIS is not required, explain why the EA is the appropriate level of analysis for this proposed action:

The proposed project will not have any adverse effects on the environment or the surrounding community. Therefore, the EA is an appropriate level of analysis.
