

DEQ OPENCUT MINING PROGRAM

ENVIRONMENTAL ASSESSMENT

Project Name: Bull Mountain Parks Gravel Site.

Proposed Implementation Date: 4/99.

Proponent: Sandstone Properties.

Type and Purpose of Action: Proponent has applied for a 4-acre Mined Land Reclamation Contract where they propose to remove 17,000 cubic yards of gravel from two 2-acre pits. Mobile equipment will be used in the operation. Proponent has submitted all application materials required under the Opencut Mining Act and the Rules and Regulations governing the Act. Proponent proposes to properly prepare, mine, and reclaim the site to a postmining land use of grassland within a new subdivision. Proponent is legally bound through their reclamation contract with the state to reclaim the site. The estimated date for completion of final reclamation is 10/00.

Location: NE19, T8N, R26E **County:** Musselshell County, Montana.

N = Not present or no impact will occur.

Y = Impacts may occur (explain under Potential Impacts).

IMPACTS ON THE PHYSICAL ENVIRONMENT	
RESOURCE	[Y/N] POTENTIAL IMPACTS AND MITIGATION MEASURES
<p>1. GEOLOGY AND SOIL QUALITY, STABILITY, AND MOISTURE: Are fragile, compactible, or unstable soils present? Are there unusual geologic features? Are there special reclamation considerations?</p>	<p>[Y] Geology. The proposed site is in the sedimentary plains portion of the state.</p> <p>Soils. There are 6 inches of soil material over the gravel. After grading, soil material will be evenly replaced.</p> <p>Removal of mineral will alter the topography; however, operator is required properly grade the site and blend it into the surrounding topography. There are no special reclamation considerations.</p>
<p>2. WATER QUALITY, QUANTITY, AND DISTRIBUTION: Are important surface or groundwater resources present? Is there potential for violation of ambient water quality standards, drinking water maximum contaminant levels, or degradation of water quality?</p>	<p>[N] Surface Water. It does not appear that surface water is a factor for consideration at this site.</p> <p>Groundwater. It does not appear that groundwater is a factor for consideration at this site.</p> <p>Wells. No wells were seen within or near the site.</p> <p>Surface and groundwater resources should not be adversely affected by the operation. Proponent has committed to protecting surface water and groundwater resources.</p>
<p>3. AIR QUALITY: Will pollutants or particulate be produced? Is the project influenced by air quality regulations or zones (Class I airshed)?</p>	<p>[N] Pollutants and particulates may be produced on a temporary basis by this operation. The site is relatively small and in a remote location. Proponent is required to comply with state air quality regulations.</p>
<p>4. VEGETATION COVER, QUANTITY, AND QUALITY: Will vegetative communities be permanently altered? Are any rare plants or cover types present?</p>	<p>[Y] Premine Vegetation. The site is currently rangeland.</p> <p>Postmining Vegetation. The site will be reclaimed to grassland.</p> <p>Weed Control. Proponent has committed to appropriate weed control measures. The county weed control district has been notified.</p>

	The Montana Natural Heritage Program reports no element occurrences within or near the site. Abundant similar habitat exists in the area.
5. TERRESTRIAL, AVIAN, AND AQUATIC LIFE AND HABITATS: Is there substantial use of the area by important wildlife, birds, or fish?	[N] The site consists of common pine and sandstone breaks habitat. A site visit did not reveal extraordinary use by wildlife or use by unique wildlife.
6. UNIQUE, ENDANGERED, FRAGILE, OR LIMITED ENVIRONMENTAL RESOURCES: Are any federally listed threatened or an endangered species or identified habitat present? Any wetlands? Species of special concern?	[N] None of the mentioned resources appear to be present. Similar habitat is abundant in the area. No wetland, riparian, or other less common habitat will be affected. The Montana Natural Heritage Program reports no element occurrences within or near the site.
7. HISTORICAL AND ARCHAEOLOGICAL SITES: Are any historical, archaeological, or paleontological resources present?	[N] A walk of the area revealed none of the mentioned resources. If cultural resources are found during mining and reclamation operations, proponent has committed to promptly notifying the State Historic Preservation Office and routing the operation around the site of discovery for a reasonable time until salvage can be made.
8. AESTHETICS: Is the project on a prominent topographic feature? Will it be visible from populated or scenic areas? Will there be excessive noise or light?	[Y] The aesthetic impact will be temporary. The site is located in a remote area. There are no nearby residences.
9. DEMANDS ON ENVIRONMENTAL RESOURCES OF LAND, WATER, AIR, OR ENERGY: Will the project use resources that are limited in the area? Are there other activities nearby that will affect the project?	[N] The operation will not use resources that are limited in the area, and it should not impact or be affected by area activities.
10. IMPACTS ON OTHER ENVIRONMENTAL RESOURCES: Are there other studies, plans, or projects on this tract?	[N] Any affect on other environmental resources will be temporary, and the operation should not affect any environmental studies.

IMPACTS ON THE HUMAN POPULATION

RESOURCE	POTENTIAL IMPACTS AND MITIGATION MEASURES
11. HUMAN HEALTH AND SAFETY: Will this project add to health and safety risks in the area?	[N] This project should not significantly increase health and safety risks in the area if the proponent and landowner manage the operation and site in a responsible manner. Proponent is required to comply with OSHA and MSHA regulations.
12. INDUSTRIAL, COMMERCIAL, AND AGRICULTURAL ACTIVITIES AND PRODUCTION: Will the project add to or alter these activities?	[N] No significant impacts are anticipated.
13. QUANTITY AND DISTRIBUTION OF EMPLOYMENT: Will the project create, move, or eliminate jobs? If so, estimated number.	[N] No significant impacts are anticipated.
14. LOCAL AND STATE TAX BASE AND TAX REVENUES: Will the project create or eliminate tax revenue?	[N] Tax revenues have not been significantly affected by similar projects in the state.
15. DEMAND FOR GOVERNMENT SERVICES: Will substantial traffic be added to existing roads? Will other services (fire protection, police, schools, etc) be needed?	[N] The proponent will use local roads to distribute their product. No other government services should be significantly affected.
16. LOCALLY ADOPTED ENVIRONMENTAL PLANS AND GOALS: Are there State, County, City, USFS, BLM,	[N] Author is not aware of any other environmental plans or goals. The local zoning authority has been contacted and clearance obtained.
