Ladies and Gentlemen:

An environmental assessment (EA) was prepared and sent out for 30-day review on August 3, 2000, for improvements to the Duck Creek Fishing Access Site on Fort Peck Reservoir, Valley County. FWP proposes to expand the existing boat ramp and parking area and add a latrine. Construction at the site was proposed to begin on September 6, 2000.

No negative comments were received by FWP during the review period and it is my recommendation that this project proceed as described in the EA.

Fish, Wildlife and Parks thanks you for your interest, any questions or comments regarding completion of this project should be addressed to Bill Wiedenheft, Regional Fisheries Program Manager, RT 1- 4210, Glasgow, MT 59230.

Sincerely,

Jim Satterfield
Regional Supervisor
