CHECKLIST ENVIRONMENTAL ASSESSMENT

Project Name: Pipeline
Implementation Date: Spring 2004
Proponent: Burlington Resources Oil & Gas Company
Type and Purpose of Action: Constructing pipeline from ELOB 11C-25NH to Central Battery Facilities

Location: W2Sec36 7N60E

County: Fallon

I. PROJECT DEVELOPMENT

Table with 2 columns: Question/Requirement and Answer. Rows include: 1. PUBLIC INVOLVEMENT... Burlington request for pipeline route inspection; 2. OTHER GOVERNMENTAL AGENCIES WITH JURISDICTION... Board of Oil and Gas; 3. ALTERNATIVES CONSIDERED: None

II. IMPACTS ON THE PHYSICAL ENVIRONMENT

Table with 2 columns: RESOURCE and [Y/N] POTENTIAL IMPACTS. Includes a 'RECEIVED' stamp dated APR 12 2004 from LEGISLATIVE ENVIRONMENTAL POLICY OFFICE. Rows include: 4. GEOLOGY AND SOIL QUALITY... [Y] Temporary damage to forage base on site will occur; 5. WATER QUALITY... [N]; 6. AIR QUALITY... [N]; 7. VEGETATION COVER... [N] Plant community will not be permanently altered.

II. IMPACTS ON THE PHYSICAL ENVIRONMENT	
permanently altered? Are any rare plants or cover types present? Are cumulative impacts likely to occur as a result of this proposed action?	observed on date of inspection.
8. TERRESTRIAL, AVIAN AND AQUATIC LIFE AND HABITATS: Is there substantial use of the area by important wildlife, birds or fish? Are cumulative impacts likely to occur as a result of this proposed action?	[N]
9. UNIQUE, ENDANGERED, FRAGILE OR LIMITED ENVIRONMENTAL RESOURCES: Are any federally listed threatened or endangered species or identified habitat present? Any wetlands? Sensitive Species or Species of special concern? Are cumulative impacts likely to occur as a result of this proposed action?	[N]
10. HISTORICAL AND ARCHAEOLOGICAL SITES: Are any historical, archaeological or paleontological resources present?	[N] No known archeological, historical or pale ontological resources known to be present on or near the site.
11. AESTHETICS: Is the project on a prominent topographic feature? Will it be visible from populated or scenic areas? Will there be excessive noise or light? Are cumulative impacts likely to occur as a result of this proposed action?	[N]
12. DEMANDS ON ENVIRONMENTAL RESOURCES OF LAND, WATER, AIR OR ENERGY: Will the project use resources that are limited in the area? Are there other activities nearby that will affect the project? Are cumulative impacts likely to occur as a result of this proposed action?	[N]
13. OTHER ENVIRONMENTAL DOCUMENTS PERTINENT TO THE AREA: Are there other studies, plans or projects on this tract? Are cumulative impacts likely to occur as a result of other private, state or federal actions that are under MEPA review (scoping) or permitting review by any state agency w/n the analysis area?	[N]

III. IMPACTS ON THE HUMAN POPULATION

RESOURCE	[Y/N] POTENTIAL IMPACTS AND MITIGATION MEASURES
14. HUMAN HEALTH AND SAFETY: Will this project add to health and safety risks in the area?	[N]
15. INDUSTRIAL, COMMERCIAL AND AGRICULTURAL ACTIVITIES AND PRODUCTION: Will the project add to or alter these activities?	[N] Livestock and wildlife have historically coexisted successfully with similar projects in the area.
16. QUANTITY AND DISTRIBUTION OF EMPLOYMENT: Will the project create, move or eliminate jobs? If so, estimated number. Are cumulative impacts likely to occur as a result of this proposed action?	[Y] The project should add or support employment in the area.
17. LOCAL AND STATE TAX BASE AND TAX REVENUES: Will the project create or eliminate tax revenue? Are cumulative impacts likely to occur as a result of this proposed action?	[Y] The completed project will support the local and state tax base and state school trust.
18. DEMAND FOR GOVERNMENT SERVICES: Will substantial traffic be added to existing roads? Will other services (fire protection, police, schools, etc) be needed? Are cumulative impacts likely to occur as a result of this proposed action?	[N]
19. LOCALLY ADOPTED ENVIRONMENTAL PLANS AND GOALS: Are there State, County, City, USFS, BLM, Tribal, etc. zoning or management plans in effect?	[N] None to my knowledge.
20. ACCESS TO AND QUALITY OF RECREATIONAL AND WILDERNESS ACTIVITIES: Are wilderness or recreational areas nearby or accessed through this tract? Is there recreational potential within the tract? Are cumulative impacts likely to occur as a result of this proposed action?	[N]
21. DENSITY AND DISTRIBUTION OF POPULATION AND HOUSING: Will the project add to the population and require additional housing? Are cumulative impacts likely to occur as a result of this proposed action?	[N]
22. SOCIAL STRUCTURES AND MORES: Is some disruption of native or traditional lifestyles or communities possible?	[N]
23. CULTURAL UNIQUENESS AND DIVERSITY: Will the action cause a shift in some unique quality of the area?	[N]

Basic Stipulations

- 1) If a good producing well is discovered, areas of the pad site that are no longer used or needed for normal maintenance activities must be seeded back to native grass species per DNRC Eastern Land Office specifications.
- 2) Drilling pits must be constructed on cut (as opposed to fill) areas only. When drilling pits are constructed, the topsoil located on each individual pit location, to a depth of approximately 10 inches, must be removed and stored in a separate pile. The topsoil then must be replaced and spread evenly over the surface when each drilling pit is closed and reclaimed. The pit must be dry prior to replacement of soil and topsoil. The replaced topsoil surface then must be reseeded to native grass species per DNRC Eastern Land Office specifications.
- 3) Edges of the pad site must be contoured, shaped, and reseeded to prevent erosion or invasion by weeds.
- 4) When drilling pads are constructed, the topsoil from each location to a depth of approximately 10 inches must be removed and stored in a separate pile. When pads sites are reclaimed the topsoil must be replaced and spread evenly over the surface of the location. The location must be dry when replacement of the topsoil takes place. The location must then be reseeded. The DNRC Eastern Land Office must be contacted for specifications including but not limited to grass seed mixtures.
- 5) The applicant must contact existing users to avoid conflict or damage to existing infrastructure, improvements or facilities.
- 6) If pipelines create surface disturbance more than four feet in width, the disturbed surface must be reseeded to native grasses per DNRC Eastern Land Office specifications.
