See Figure 1.

9. **Narrative Summary of the Proposed Action or Project including the Benefits and Purpose of the Proposed Action.**

The purpose of this proposed action is to translocate swift fox from within FWP Administrative Region 6 in northeast Montana to suitable habitat on the Fort Peck Indian Reservation (FPIR). Swift fox currently exist on FPIR at very low densities. This translocation is a population augmentation to facilitate establishment of a resident population of swift fox on FPIR. This action will provide additional wildlife viewing, assist Tribal officials to restore a culturally important species to the reservation, increase species diversity on the reservation, and facilitate range expansion of swift fox in the state. A one-time translocation of 10 juvenile swift fox, 5 female and 5 male, would be conducted in concert with the International Swift Fox Census. Juvenile swift fox captured on the final day of trapping individual townships would be made available to tribal wildlife officials for soft release to suitable habitat on Fort Peck Indian Reservation. Two swift fox would come from the Theony area, 5 swift fox from the Whitewater area and 3 swift fox would come from the Chinook area. All adult or a combination of adult and juvenile swift fox would be made available if 10 juveniles are unavailable. If weather conditions prevent the release, capture efforts would be completed in the spring prior to whelping. Fort Peck wildlife officials have agreed to the terms of this translocation.

5b. The proposed action will result in removal of 10 swift fox from the northern portion of region 6. The last census of the area, 2000-2001 indicated a minimum of 225 swift fox in the area. All scientific data, and incidental reports indicate an expanding swift fox population. The current census period, 2005-2006, will yield a more current estimate. It is unlikely removal of 10 juvenile or adult swift fox will have any negative impact on the species. The abundance of swift fox will increase on Fort Peck Indian Reservation.

PART II. ENVIRONMENTAL REVIEW, CONTINUED

- 1. Description and analysis of reasonable alternatives (including the no action alternative) to the proposed action whenever alternatives are reasonably available and prudent to consider and a discussion of how the alternatives would be implemented:**

There are two reasonable alternatives to this proposal. No action would result in no changes and no increased aesthetic, cultural, or viewing opportunities. The proposed action of translocating swift fox to the project area can improve aesthetic, cultural, and viewing opportunities. This action would be implemented by the capture of wild swift fox as they become available during the International Swift Fox Census and their subsequent release in the project area.

- 2. Evaluation and listing of mitigation, stipulation, or other control measures enforceable by the agency or another government agency:**

PART III. NARRATIVE EVALUATION AND COMMENT

PART IV. EA CONCLUSION SECTION

- 1. Based on the significance criteria evaluated in this EA, is an EIS required? NO. If an EIS is not required, explain why the EA is the appropriate level of analysis for this proposed action:**

No, an EIS is not required. The EA Checklist is the appropriate level of analysis because the primary effects are beneficial and potentially negative effects can be mitigated.

- 2. Describe the level of public involvement for this project if any and, given the complexity and the seriousness of the environmental issues associated with the proposed action, is the level of public involvement appropriate under the circumstances?**

This project has been discussed with tribal wildlife officials, members of the scientific community, and local trappers. The project appears to have local support and few concerns have been expressed. This project is unlikely to produce negative environmental impacts. Therefore, the level of public involvement is appropriate.

3. Duration of comment period if any:

Comment period will end 5:00 PM, October 28, 2005 (a period of more than 20 days from EA release)
