

ENVIRONMENTAL ASSESSMENT

PROPONENT: Valley County Road Department

SITE NAME: Steve Page

LOCATION: Section 33, T30N, R38E

COUNTY: Valley

TYPE AND PURPOSE OF ACTION: Proponent has submitted an application to the Opencut Mining Program for a 6.5-acre permit to mine about 50,000 cubic yards of gravel. The site is within a large area used for gravel mining by many operators over several decades. Proponent plans to mine into the sloped face of a high bench left open by a previous operations. Because the bench is high, the quantity of mine material needed can be obtained with minimal horizontal advance, i.e., little new ground will be disturbed. The work area in front of the bench face is previously disturbed pit floor used as a livestock feeding area.

All application materials required under the Opencut Mining Act and the Rules adopted thereunder have been submitted. Proponent commits to properly conducting opencut operations and reclaiming the site to a postmining land use of sloped open-face bench, graded pit floor, and livestock winter feed area. It is hoped that the Department can manage operations at this site over time so that, when the resource is exhausted, the site will be left in an aesthetically pleasing and useful condition.

Proponent will be legally bound by their permit to reclaim the site as well as site conditions and available resources allow.

A = significant unavoidable impacts. B = insignificant as a result of conditioned mitigation. C = insignificant as proposed.
