Environmental Assessment

Name of Project: Parkside at Fisher River

Type of Project: Subdivision E.Q. #08-1226

Location of Project: Sec 14 & 34, T27N, R28W

County: Lincoln

Description of Project: 42 Lot Subdivision. *Served by onsite water supply and onsite sewage disposal.*

Summary of Issues: *Include issues and concerns / resource conflicts identified by staff and the public.*

Affected Environment & Impacts of the Proposed Project:

Key: Summarize impacts as follows: NA - Not applicable, N - No impact, B - potentially beneficial impact, A - potentially adverse impact, M mitigation required, P - additional permits required (when additional DEQ permits are required, this review must be coordinated between bureaus)

Under Comment below include frequency, duration (long or short term) magnitude (quantify or qualify) and context for any impacts identified (Each category includes a tickler list of items to consider - this does not mean each one needs to be addressed.

Rather, if an issue related to that topic has been raised then provide some additional information. Address impacts related to issues and concerns. Identify reasonable feasible mitigation measures where significant impacts could be avoided and note impacts which are irreversible, irretrievable. Relate discussion to issues. Include background information on affected environment if necessary to discussion. Utilize negative declarations where appropriate (wetlands, T&E, Cultural Resources)

Key	PHYSICAL AND BIOLOGICAL ENVIRONMENT

A	<p>11. DEMANDS ON/ CHANGES IN ENVIRONMENTAL RESOURCES INCLUDING LAND, WATER, AIR OR ENERGY USE (need for new or</p>

	upgraded energy sources, potential for recycling, etc) will put a demand on the aquifer and air quality with more wood burning. (See #8, #4, #5) COMMENTS AND SOURCE OF INFORMATION:
