8/17/11	WRD	MRO	EA Checklist	Application To Change A Water Right 76M 30049645	NA	Bar 1 Ranch	Bar 1 Ranch submitted an Application to Change a Water Right to DNRC requesting authorization to change the point of diversion for its portion of water right 76M 111122 from NWNWSW Section 27, T16N, R23W to NWSENE Section 34, T16N, R23W, Missoula County. The water will continue to be used for irrigation purposes over a 14 acre place of use. The Applicant proposes to divert water directly from Ninemile Creek through a 3-inch intake pipe connected to a 5.5 hp gas powered pump located at least 10 feet from the edge of the creek. Water will be conveyed through the irrigation mainline to supply two Nelson Big Gun sprinkler heads.	34	16N	23W		Missoula	7/1/11	8/19/11	Amy Groen	NA	Ninemile Creek
8/17/11	WRD	MRO	EA Checklist	Application To Change A Water Right 76M 30049647	NA	Bar 1 Ranch	temporarily change the place of use for water right claim number 76M 111122. The Applicant was ordered by the Environmental Protection Agency (EPA) to restore 23 acres of riparian and wetland vegetation that was previously disturbed during construction of several unauthorized ponds. The Applicant has removed the ponds, restored the topography of the project site, and completed a portion of the planting. The EPA mandated restoration includes replanting the disturbed site with native vegetation which requires irrigation to become established. The Applicant previously submitted and was granted a change in place of use and point of diversion for water right 76M 210614 for Cedar Creek to irrigate the restored area, however supplemental water is needed late in the season when Cedar Creek water is no longer available. As the new	34	16N	23W		Missoula	7/1/11		Amy Groen	NA	Ninemile Creek

7/20/11	WRD	GUO	EA Checklist	76LJ 30050670	NA	Flathead County Road and Bridge Department	This application is to obtain a water use permit for two points of diversion from the North Fork of the Flathead River for the purpose of road dust abatement. The Flathead County Road and Bridge Department utilizes 3,500 gallon trucks for dust abatement, which over the period requested appropriation, April 16 – July 15, will result in the use of 2.79 acre-feet (AF) at a rate of 800 gallons per minute (GPM). The requested flow rate was determined by each truck having the ability to divert water at a rate of 400 gpm, and there being a possibility of two trucks pumping simultaneously, thus totaling a diversion rate of 800 gpm.	1 24 32 22	36N 36N 36N 35N	22W 22W 22W 21W		Flathead	7/7/11	7/21/11	Denise Biggar	NA	N Fork Flathead River

8/17/11	WRD	BRO	EA Checklist	Water Right Permit Application 42C 30050134	NA	St Labre Educational Association	This application proposes to withdraw water from an alluvial aquifer within the Tongue River valley for the purpose of providing institutional water for the St. Labre Indian School near Ashland, MT. Two supply wells located in the NESWNE of Section 3, Township 3S, Range 44E have been constructed to produce the requested flow rate of 100 gpm and annual volume of up to 62.29 AF. Water is to be diverted year round (January 1 to December 31), treated, and stored in a water tank; from there, water is gravity fed to the school. Currently, the school serves approximately 600 students and staff; including 92 residences and dormitory housing for an additional 125 students.	3	3S	44E		Rosebud	8/2/11	8/19/11	Brad Bennett	NA	Groundwater - Tongue River alluvial valley
8/17/11	WRD	SWPB	EA Notice of Decision	Martinsdale North Dam	9/1/11	DNRC - SWPB	The repair and improvement of the existing drain system and the installation of automated instrumentation at the Martinsdale North Dam will allow for enhanced monitoring of seepage, sedimentation, reservoir water levels and outflows from the dam. Improved monitoring of these conditions will enhance the early detection of potentially unsafe conditions and reduce the response time needed to correct problems.	18	8N	12E		Wheatland	8/2/11	8/19/11	James Domino Tim Davis	NA	NA
