BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF MONTANA:

NEW SECTION. Section 1. Short title. [Sections 1 through 13], [sections 14 through 17], and [section
19] may be cited as the "Montana Health and Economic Livelihood Partnership (HELP) Act".

NEW SECTION. Section 2. Montana HELP Act program -- legislative findings and purpose. (1)
There is a Montana Health and Economic Livelihood Partnership Act program established through a collaborative
effort of the department of public health and human services and the department of labor and industry to:
(a) provide coverage of health care services for low-income Montanans;
(b) improve the readiness of program participants to enter the workforce or obtain better-paying jobs;
and
(c) reduce the dependence of Montanans on public assistance programs.
(2) The legislature finds that improving the delivery of health care services to Montanans requires state
government, health care providers, patient advocates, and other parties interested in high-quality, affordable
health care to collaborate in order to:

(a) increase the availability of high-quality health care to Montanans;
(b) provide greater value for the tax dollars spent on the Montana medicaid program;
(c) reduce health care costs;
(d) provide incentives that encourage Montanans to take greater responsibility for their personal health;
(e) boost Montana's economy by reducing the costs of uncompensated care; and
(f) reduce or minimize the shifting of payment for unreimbursed health care costs to patients with health
insurance.

(3) The legislature further finds that providing greater value for the dollars spent on the medicaid program
requires considering options for delivering services in a more efficient and cost-effective manner, including but
not limited to:

(a) offering incentives to encourage health care providers to achieve measurable performance outcomes;
(b) improving the coordination of care among health care providers who participate in the medicaid
program;
(c) reducing preventable hospital readmissions; and
(d) exploring methods of medicaid payment that promote quality of care and efficiencies.

(4) The legislature further finds that assessing workforce readiness and providing necessary job training
or skill development for individuals who need assistance with health care costs could help those individuals obtain
employment that has health care coverage benefits or that would allow them to purchase their own health
insurance coverage.

(5) The legislature further finds that:

(a) it is important to implement additional fraud, waste, and abuse safeguards to protect and preserve
the integrity of the medicaid program and the unemployment insurance program for individuals who qualify for
the programs; and
(b) state policymakers have an interest in testing the effectiveness of wellness incentives in order to
collect and analyze information about the correlation between wellness incentives and health status.

(6) The purposes of the act are to:

(a) modify and enhance Montana's health care delivery system to provide access to high-quality,
affordable health care for all Montana citizens; and

(b) provide low-income Montanans with opportunities to improve their readiness for work or to obtain higher-paying jobs.

(7) The department of labor and industry and the department of public health and human services shall maximize the use of existing resources in administering the program.
