**Description of fiscal impact:** This bill has a positive fiscal impact to the Montanan Department of Transportation (MDT), Department of Justice (DOJ), and local governments throughout the state of Montana. The additional funding provided to MDT and the local governments will be used to deliver infrastructure projects as well as fund DOJ operations.

# FISCAL ANALYSIS

### **Assumptions:**

- Revenue generated is based on projected gallons of gasoline and special fuel sold in the state of Montana. Projected gallons of gas: FY 2018 is 559,702,235; FY 2019 is 567,675,022; FY 2020 is 573,924,376; and FY 2021 is 580,484,745. Projected gallons of special fuel: FY 2018 is 285,450,591; FY 2019 is 285,342,539; FY 2020 is 284,402,189; and FY 2021 is 285,619,384.
- 2. Gross revenues are calculated by multiplying the projected annual gallons sold for gasoline and special fuel by the increase in the respective tax per gallon. The \$0.08 per gallon increase in gasoline tax and the \$0.0725

# Fiscal Note Request - As Introduced

per gallon increase in special fuel tax generates additional revenues net of the 1% petroleum distributor allowance (15-70-410, MCA), statutory allocations (60-3-201, MCA), refunds (15-70-432, MCA), and tribal revenue sharing agreements (18-11-112, MCA).

- 3. Statutory allocations are calculated based on ratios per 60-3-201, MCA. Refunds are calculated based on a 3-year average of total gasoline and special fuel refunds to total gasoline and special fuel revenues (gasoline refunds 1,686,691 / 140,247,673 = 1.20% and special fuel refunds 3,158,510 / 80,719,219 = 3.91%). Tribal revenue sharing distributions are calculated based on a 3-year average of total tribal distributions to total gasoline revenues (4,908,849 / 140,247,673 = 3.5%).

- 4. The net increase in funding will be allocated and distributed as follows:

- 5. MDT will set up a new state special revenue fund and utilize its allocation provided by this bill as state match to the federal aid construction program as revenues are received. The match rate is assumed to be 13% state and 87% federal. DOJ's share will be allocated to a new DOJ state special revenue fund as revenues are received. The local government's share will be allocated to a new special revenue fund created in New Section 3 by September 1 following the year it was earned. Expenditures from this local government state special revenue fund will be statutorily appropriated.
- 6. MDT assumes the entire local government allocation will be fully distributed in the year available. These distributions will be accounted for as grants from state to local governments.
- 7. HB 2 will contain sufficient federal budget authority for MDT to deliver all participating federal aid.
- 8. MDT's Administration Division will administer the new areas in Section 1, 2, and portions of Section 3, 4, 5, 6, and 8.
- 9. The Rail, Transit and Planning Division will be responsible for developing and implementing an application/review process for local projects under the new local government road construction and maintenance match program, per New Section 3. These activities include determining the allocation of funds for 185 entities, reviewing applications and approving requests for funds, tracking allocation balances and year of allocation of funds, tracking reservation of funds, tracking change in project prioritization, and tracking project completion and remaining funds for re-allocation.
- 10. Under New Section 5, the Rail, Transit and Planning Division will be responsible for developing and maintaining a project website for the local government road construction and maintenance match program

created in New Section 3. This will include obtaining and compiling account related information from various sources (MDT, DOJ, local recipients) in an ongoing manner.

- 11. It is estimated that 2.00 FTE will be required to administer this bill. FTE expenditures are based upon a 1.00 FTE accountant in the Administration Division of General Operations and 1.00 FTE Planner in the Rail, Transit & Planning Division. Estimated salary and benefits are \$160,005 annually.
- 12. Operating costs associated for the FTE is based on \$3,200 of initial costs (1<sup>st</sup> year) for office set up, \$2,400 of initial costs for new computer equipment, and \$1,000 for annual computer and phone connectivity costs. It is assumed that operating costs will increase at a 1.5% inflation factor for FY 2020 and FY 2012.
- 13. MDT will incur additional costs in the highway state special revenue unrestricted account to pay Legislative Audit Division for the audit outlined in Section 4. The cost of this audit is not quantified, but will need to be funded in HB 2.
- 14. The amounts remaining in fund balance in the state special revenue account (02 New) represents the change in annual revenues collected for locals in the current year compared to the previous year. Revenue collected for locals each year is distributed in the subsequent year. This balance is only available for local government distribution.
- 15.Below is the statutory template for Section 2(2) (c). 17-1-508, MCA, requires analysis of the statutory appropriation relative to the guidance in 17-1-508(3), MCA, to be published in the fiscal note. In reviewing and establishing statutory appropriations, the legislature shall consider the following guidelines.

### **Effect on County or Other Local Revenues or Expenditures:**

State Special Revenue (02 - HSSRA)

- 1. Local Montana cities, towns, counties, and/or consolidated city/county governments will earn additional fuel tax revenues starting in fiscal year 2018. The fiscal year 2018 revenues will be allocated and available for distribution starting in fiscal year 2019. Additional fuel tax revenues will be available for distribution the year after it is earned.
- 2. Funds distributed to each local government must be matched with \$1 of local government funds for every \$5 requested from MDT.

### **Long-Term Impacts:**

1. MDT will continue to leverage federal funding and administer the entire federal aid program appropriated to the agency from FHWA for construction into the foreseeable future.
