A BILL FOR AN ACT ENTITLED: "AN ACT RELATING TO PREVENTION AND REDUCTION OF ADVERSE CHILDHOOD EXPERIENCES IN STATE PREVENTION EFFORTS; REQUIRING FUNDING OF ONE OR MORE PILOT PROJECTS; PROVIDING AN APPROPRIATION; PROVIDING DEFINITIONS; AMENDING SECTION 2-15-225, MCA; AND PROVIDING AN EFFECTIVE DATE."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF MONTANA:

NEW SECTION. **Section 1. Legislative findings -- intent.** (1) The legislature finds that adverse childhood experiences are a powerful common determinant of a child's ability to be successful at school and, as an adult, to be successful at work, to avoid behavioral and chronic physical health conditions, to avoid encounters with the criminal justice system, and to build healthy relationships.

(2) The legislature finds that increased awareness of the consequences of adverse childhood experiences at the state and local levels may allow for development of cooperative strategies to prevent or reduce these experiences. The legislature further finds that preventing or reducing adverse childhood experiences may improve the long-term physical and mental health of Montanans.

(3) It is the intent of [sections 1 through 4] to identify the primary causes of adverse childhood experiences in Montana communities and to mobilize broad public and private support in order not only to prevent harm to young children, but also to reduce the accumulated harm of adverse childhood experiences and lead to improved health and well-being for Montanans during both their childhood and adult years. [Sections 1 through 4] seek to create a focused effort to:

- (a) increase awareness and understanding of adverse childhood experiences and the role they play in an individual's development, both as a child and as an adult;
- (b) identify and promote the use of innovative strategies to prevent or reduce adverse childhood experiences and their long-term effects; and
- (c) review public and private policies and funding sources to align those policies and funding sources with approaches and strategies that have demonstrated effectiveness.

(4) The legislature further intends that efforts to improve the response to adverse childhood experiences

1 should seek to coordinate existing community efforts to effectively respond to the challenge of reducing and
 2 preventing adverse childhood experiences while providing flexibility for communities to design responses that are
 3 appropriate for each community.

4

 6 apply:
