FISCAL ANALYSIS

Assumptions:

- Section 2 of HB 758 requires the Public Service Commission (PSC) to “develop procedures to determine the difference between” two values, which are described in Section 1. When that difference meets the criteria in Section 2 (b), the PSC must assess a fee on the utility.
- One of the values the PSC is required to determine under Section 1 is described as “the estimated and assumed costs included in the valuation of a coal-fired generating unit accrued annually.” Until the PSC develops the procedures under Section 2 and further defines how the values under Section 1 will be calculated, the PSC is unable to estimate a reasonable amount of any fee that might be collected under Section 2.
