1 definition, creation, storage, and security of the data associated with the application system. The security
2 aspects of the plan must address but are not limited to authentication and granting of system privileges,
3 safeguards against unauthorized access to or disclosure of sensitive information, and, consistent with state
4 records retention policies, plans for the removal of sensitive data from the system when it is no longer needed.
5 It is the intent of this subsection that specific consideration be given to the potential sharing of data with other
6 state agencies in the design, definition, creation, storage, and security of the data. This plan must be approved
7 by the chief information officer and the budget director prior to releasing a request for proposal or similar
8 procurement document.

9 (2) Funds may not be released for a project until the chief information officer and the budget
10 director approve the plans described in subsection (1) and have reviewed and approved results from requests
11 for proposals or similar procurement procedures and contract documents.

12 (3) The following money is appropriated to the department of administration to be used only for the
13 indicated information technology capital projects:
