17 (11) "New enhanced recovery project" means an enhanced recovery project that began development  
18 after December 31, 1993.

19 (12) "Nonworking interest owner" means any interest owner who does not share in the exploration,  
20 development, and operation costs of the lease or unit, except for production taxes.

21 (13) "Oil" means crude petroleum or mineral oil and other hydrocarbons, regardless of gravity, that are  
22 produced at the wellhead in liquid form and that are not the result of condensation of gas after it leaves the  
23 wellhead.

1 more than 3 barrels but fewer than 15 barrels a day for the calendar year immediately preceding the current  
2 year if the average price for a barrel of crude oil reported and received by the producer for Montana oil  
3 marketed during a calendar quarter is less than \$30. If the price of oil is equal to or greater than \$30 a barrel in  
4 a calendar quarter, there is no stripper tax rate in that quarter.

5 (b) The average price for a barrel is computed by dividing the sum of the daily price for a barrel of  
6 west Texas intermediate crude oil for the calendar quarter by the number of days on which the price was  
7 reported in the quarter.

8 (c) Production must be determined by dividing the amount of production from a lease or unitized area  
9 for the year immediately preceding the current calendar year by the number of producing wells in the lease or  
10 unitized area and then dividing the resulting quotient by 365.

11 (16) "Post-1999 well" means an oil or natural gas well drilled on or after January 1, 1999, that  
12 produces oil or natural gas or a well that has not produced oil or natural gas during the 5 years immediately  
13 preceding the first month of qualifying as a post-1999 well.

14 (17) (a) "Pre-1999 stripper well" means an oil well that was drilled before January 1, 1999, that  
15 produces more than 3 barrels a day but fewer than 10 barrels a day.

16 (b) Production must be determined by dividing the amount of production from a lease or unitized area  
17 for the year immediately preceding the current calendar year by the number of producing wells in the lease or  
18 unitized area and then dividing the resulting quotient by 365.

19 (18) "Pre-1999 well" means an oil or natural gas well that was drilled before January 1, 1999.

20 (19) "Primary recovery" means the displacement of oil from the earth into the wellbore by means of the  
21 natural pressure of the oil reservoir and includes artificial lift.

22 (20) "Production decline rate" means the projected rate of future oil production, extrapolated by a  
23 method approved by the board, that must be determined for a project area prior to commencing a new or  
24 expanded enhanced recovery project or the recompletion of a well as a horizontally completed well or the  
25 recompletion of an existing horizontal well. The approved production decline rate must be certified in writing to  
26 the department by the board. In that certification, the board shall identify the project area and shall specify the  
27 projected rate of future oil production by calendar year and by calendar quarter within each year. The certified

1 rate of future oil production must be used to determine the volume of incremental production that qualifies for  
2 the tax rate imposed under 15-36-304(5)(e).

3 (21) (a) "Qualifying production" means the first 12 months of production of oil or natural gas from a  
4 well drilled after December 31, 1998, or the first 18 months of production of oil or natural gas from a horizontally  
5 completed well drilled after December 31, 1998, or from a well that has not produced oil or natural gas during  
6 the 5 years immediately preceding the first month of qualifying production.

7 (b) Qualifying production does not include oil production from a horizontally recompleted well.

8 (22) "Secondary recovery project" means an enhanced recovery project, other than a tertiary recovery  
9 project, that commenced or was expanded after December 31, 1993, and meets each of the following  
10 requirements:

11 (a) The project must be certified as a secondary recovery project to the department by the board. The  
12 certification may be extended only after notice and hearing in accordance with Title 2, chapter 4.

13 (b) The property to be affected by the project must be adequately delineated according to the  
14 specifications required by the board.

15 (c) The project must involve the application of secondary recovery methods that can reasonably be  
16 expected to result in an increase, determined by the board to be significant in light of all the facts and  
17 circumstances, in the amount of oil that may potentially be recovered. For purposes of this part, secondary  
18 recovery methods include but are not limited to:

19 (i) the injection of water into the producing formation for the purposes of maintaining pressure in that  
20 formation or for the purpose of increasing the flow of oil from the producing formation to a producing wellbore;

21 or

22 (ii) any other method approved by the board as a secondary recovery method.

23 (23) "Stripper natural gas" means the natural gas produced from any well that produces less than  
24 60,000 cubic feet of natural gas a day during the calendar year immediately preceding the current year.

25 Production must be determined by dividing the amount of production from a lease or unitized area for the year  
26 immediately preceding the current calendar year by the number of producing wells in the lease or unitized area  
27 and by dividing the resulting quotient by 365.

1 (24) "Stripper well exemption" or "stripper well bonus" means petroleum and other mineral or crude oil  
2 produced by a stripper well that produces 3 barrels a day or less. Production from this type of well must be  
3 determined as provided in subsection (15)(c).

4 (25) "Tertiary recovery project" means an enhanced recovery project, other than a secondary recovery  
5 project, using a tertiary recovery method that meets the following requirements:

6 (a) The project must be certified as a tertiary recovery project to the department by the board. The  
7 certification may be extended only after notice and hearing in accordance with Title 2, chapter 4.

8 (b) The property to be affected by the project must be adequately delineated in the certification  
9 according to the specifications required by the board.

10 (c) The project must involve the application of one or more tertiary recovery methods that can  
11 reasonably be expected to result in an increase, determined by the board to be significant in light of all the facts  
12 and circumstances, in the amount of crude oil that may potentially be recovered. For purposes of this part,  
13 tertiary recovery methods include but are not limited to:

14 (i) miscible fluid displacement;

15 (ii) steam drive injection;

16 (iii) micellar/emulsion flooding;

17 (iv) in situ combustion;

19 (vi) cyclic steam injection;

20 (vii) alkaline or caustic flooding;

21 (viii) carbon dioxide water flooding;

22 (ix) immiscible carbon dioxide displacement; and

23 (x) any other method approved by the board as a tertiary recovery method.

24 (26) "Well" or "wells" means a single well or a group of wells in one field or production unit and under  
25 the control of one operator or producer.

26 (27) "Working interest owner" means the owner of an interest in an oil or natural gas well or wells who  
27 bears any portion of the exploration, development, and operating costs of the well or wells."
