I	Amendment - 1st Reading/2nd House-blue - Requested by: Mike Lang - (S) Natural Resources - 2023						
		egislature 2023	Drafter: J	ason Mohr, 406-444-	1640	HB0576.001.006	
	1		НС	OUSE BILL NO. 576			
	2	INTRODUCED BY R. KNU	JDSEN, J. HINK	LE, S. GUNDERSON	I, S. VINTON, S. GIST, K.	WALSH, M.	
	3		BI	NKLEY, G. PARRY			
	4						
	5	A BILL FOR AN ACT ENTITLE	D: "AN ACT RE\	/ISING LAWS RELA	TED TO WATER AND CC	AL MINING;	
ĺ	6	PROVIDING THAT NONSIGNI	FICANT CHANC	SES IN WATER QUA	LITY INCLUDE COAL OP	ERATIONS	
	7	ADJACENT TO EPHEMERAL	DRAINAGEWAY	S AND INTERMITTE	ENT STREAMS UNDER C	ERTAIN	
	8	CONDITIONS; REVISING THE	DEFINITION O	F "MATERIAL DAMA	GE" TO INCLUDE THE E	FFECT OF	
I	9	COAL MINING ON THE HYDR	OLOGIC BALAN	ICE; PROVIDING RU	JLEMAKING AUTHORITY	; DIRECTING	
	10	AN AMENDMENT TO 17.24.30	1 TO REMOVE	CERTAIN DEFINITION	ONS; AMENDING <mark>SECTIO</mark>	DNS 75-5-317	
	11	AND SECTION 82-4-203, MCA; PROVIDING FOR CONTINGENT VOIDNESS; AND PROVIDING AN					
I	12	IMMEDIATE EFFECTIVE DATI	E AND A RETRO	DACTIVE APPLICAB	ILITY DATE."		
	13						
	14	BE IT ENACTED BY THE LEG	ISLATURE OF T	THE STATE OF MON	TANA:		
	15						
	16	NEW SECTION. Section	on 1. Departm	ent to amend rule. T	The department of environ	mental quality	
	17	shall amend ARM 17.24.301 to	remove the two	subsections defining	"material damage" and th	e subsection	
	18	defining "materially damage the	e quantity or qua	lity of water".			
	19						
I	20	Section 2. Section 75-	5-317, MCA, is a	mended to read:			
	21	"75-5-317. Nonsignif	icant activities.	. (1) The categories o	r classes of activities iden	tified in	
	22	subsection (2) cause changes i	n water quality t	hat are nonsignificant	because of their low pote	ntial for harm to	
	23	human health or the environme	nt and their conf	ormance with the gui	dance found in 75-5-301({	5)(c).	
	24	(2) The following c	ategories or cla	sses of activities are r	not subject to the provisior	ns of 75-5-303:	
	25	(a) existing activition	es that are nonp	oint sources of polluti	ion as of April 29, 1993;		
	26	(b) activities that a	re nonpoint sour	ces of pollution initiat	ted after April 29, 1993, wl	hen reasonable	
	27	land, soil, and water conservati	on practices are	applied and existing	and anticipated beneficial	uses will be fully	
I							

- 2023			
68th L	egislature 2023	Drafter: Jason Mohr, 406-444-1640	HB0576.001.006
1	protected;		
2	(c)	use of agricultural chemicals in accordance with a specific agricultural chemic	al ground water
3	management p	plan promulgated under 80-15-212, if applicable, or in accordance with an envir	ənmental
4	protection age	ncy-approved label and when existing and anticipated uses will be fully protecte)d;
5	(d)	changes in existing water quality resulting from an emergency or remedial act	ivity that is
6	designed to pro	otect public health or the environment and is approved, authorized, or required	by the
7	department;		
8	(e)	 changes in existing ground water quality resulting from treatment of a public v 	vater supply
9	system, as def	ined in 75-6-102, or a public sewage system, as defined in 75-6-102, by chlorin	ation or other
10	similar means	that is designed to protect the public health or the environment and that is appr	ə ved, authorized,
11	or required by	the department;	
12	(f)	the use of drilling fluids, sealants, additives, disinfectants, and rehabilitation c	hemicals in water
13	well or monitor	ing well drilling, development, or abandonment, if used according to departmen	t-approved water
14	quality protecti	on practices and if no discharge to surface water will occur;	
15	(g)	short-term changes in existing water quality resulting from activities authorize	d by the
16	department pu	rsuant to 75-5-308;	
17	(h)	land application of animal waste, domestic septage, or waste from public sew	age treatment
18	systems conta	ining nutrients when the wastes are applied to the land in a beneficial manner, a	application rates
19	are based on a	agronomic uptake of applied nutrients, and other parameters will not cause degr	adation;
20	(i)	use of gray water, as defined in 75-5-325, from nonpublic gray water reuse sy	stems for
21	irrigation during	g the growing season in accordance with gray water reuse rules adopted pursu	ant to 75-5-305;
22	(j)	incidental leakage of water from a public water supply system, as defined in 7	5-6-102, or from
23	a public sewag	e system, as defined in 75-6-102, utilizing best practicable control technology c	lesigned and
24	constructed in	accordance with Title 75, chapter 6;	
25	(k)	discharges of water to ground water from water well or monitoring well tests, I	ydrostatic
26	pressure and l	eakage tests, or wastewater from the disinfection or flushing of water mains and	l storage
27	reservoirs, con	ducted in accordance with department-approved water quality protection practi	c es;
•			

- 2023 68th Le	egislature 2023	Drafter: Jason Mohr, 406-444-1640	IB0576.001.006
1	(I)	oil and gas drilling, production, abandonment, plugging, and restoration activitie	s that do not
2	result in discha	arges to surface water and that are performed in accordance with Title 82, chapter	- 10, or Title 82,
3	chapter 11;		
4	(m)	short-term changes in existing water quality resulting from ordinary and everyda	y activities of
5	humans or dor	mesticated animals, including but not limited to:	
6	(i)	such recreational activities as boating, hiking, hunting, fishing, wading, swimmir	i g, and
7	camping;		
8	(ii)	fording of streams or other bodies of water by vehicular or other means; and	
9	(iii)	drinking from or fording of streams or other bodies of water by livestock and oth	er domesticated
10	animals;		
11	(n)	coal and uranium prospecting that does not result in a discharge to surface wate	ər, that does not
12	involve a test p	pit located in surface water or that may affect surface water, and that is performed	in accordance
13	with Title 82, c	shapter 4;	
14	(o)	solid waste management systems, motor vehicle wrecking facilities, and county	motor vehicle
15	graveyards lice	ensed and operating in accordance with Title 75, chapter 10, part 2, or Title 75, ch	apter 10, part
16	5;		
17	(p)	hazardous waste management facilities permitted and operated in accordance	with Title 75,
18	chapter 10, pa	art 4;	
19	(q)	metallic and nonmetallic mineral exploration that does not result in a discharge	o surface water
20	and that is per	rmitted under and performed in accordance with Title 82, chapter 4, parts 3 and 4;	
21	(r)	stream-related construction projects or stream enhancement projects that result	in temporary:
22	changes to wa	ater quality but do not result in long-term detrimental effects and that have been au	Ithorized
23	pursuant to 75	5 -5-318;	
24	(s)	diversions or withdrawals of water established and recognized under Title 85, cl	napter 2;
25	(t)	the maintenance, repair, or replacement of dams, diversions, weirs, or other cor	nstructed works
26	that are related	d to existing water rights and that are within wilderness areas so long as existing a	anticipated
27	beneficial uses	s are protected and as long as the changes in existing water quality relative to the	project are

- 202	ources			
	egislature 2023		Drafter: Jason Mohr, 406-444-1640	HB0576.001.006
1	short term;			
2	(u)	discharges o	of total phosphorus or total nitrogen that do not:	
3	(i)	create condi	tions that are toxic or harmful to human, animal, plant, an	d aquatic life;
4	(ii)	create condi	tions that produce undesirable aquatic life; or	
5	(iii)	cause meas	urable changes in aquatic life; and	
6	<u>(v)</u>	coal mining	and reclamation activities that may affect the water quality	y of an adjacent
7	ephemeral drai	nageway or ir	ntermittent stream for which the nonanthropogenic conditi	on of the drainageway or
8	stream exceed	<u>s the water qu</u>	ality standard and for which an applicant has prepared a	n acceptable hydrologic
9	reclamation pla	in developed i	under Title 82, chapter 4, part 2, that demonstrates no ch	<u>ange in the water quality</u>
10	classification fo	r the affected	drainageway or stream. For the purposes of this subsect	ion (2)(v), "ephemeral
11	<u>drainageway" a</u>	and "intermitte	ont stream" have the meanings provided in 82-4-203.	
12	(v)<u>(w)</u>	any other ac	tivity that is nonsignficant <u>nonsignificant</u> because of its lo	w potential for harm to
13	human health o	or to the enviro	onment and its conformance with the guidance found in 7	5-5-301(5)(c)."
14				
15	Sectio	n 2. Section 8	82-4-203, MCA, is amended to read:	
16	"82-4-2	203. Definiti	ons. Unless the context requires otherwise, in this part, the	ne following definitions
17	apply:			
18	(1)	"Abandoned	" means an operation in which a mineral is not being proc	luced and that the
19	department def	ermines will n	not continue or resume operation.	
20	(2)	"Adjacent ar	ea" means the area outside the permit area where a reso	urce or resources,
21	determined in t	he context in	which the term is used, are or could reasonably be expec	ted to be adversely
22	affected by pro	posed mining	operations, including probable impacts from underground	d workings.
23	(3)	"Affected dra	ainage basin" means an area of land where surface water	and ground water quality
24	and quantity ar	e affected by	mining activities and where they drain to a common point	
25	(4)	(a) "Alluvial v	valley floor" means the unconsolidated stream-laid depos	its holding streams where
26	water availabili	ty is sufficient	for subirrigation or flood irrigation agricultural activities.	
27	(b)	The term do	es not include upland areas that are generally overlain by	a thin veneer of colluvial

- 2023 68th Legislature 2023 Drafter: Jason Mohr, 406-444-1640 HB0576.001.006

1 deposits composed chiefly of debris from sheet erosion and deposits by unconcentrated runoff or slope wash,

2 together with talus, other mass movement accumulation, and windblown deposits.

3 (5) "Approximate original contour" means that surface configuration achieved by backfilling and 4 grading of the mined area so that the reclaimed area, including any terracing or access roads, closely 5 resembles the general surface configuration of the land prior to mining and blends into and complements the 6 drainage pattern of the surrounding terrain, with all highwalls, spoil piles, and coal refuse piles eliminated, so 7 that:

8 (a) the reclaimed terrain closely resembles the general surface configuration if it is comparable to 9 the premine terrain. For example, if the area was basically level or gently rolling before mining, it should retain 10 these features after mining, recognizing that rolls and dips need not be restored to their original locations and 11 that level areas may be increased.

(b) the reclaimed area blends with and complements the drainage pattern of the surrounding area
 so that water intercepted within or from the surrounding terrain flows through and from the reclaimed area in an
 unobstructed and controlled manner;

15 (c) postmining drainage basins may differ in size, location, configuration, orientation, and density 16 of ephemeral drainageways compared to the premining topography if they are hydrologically stable, soil erosion 17 is controlled to the extent appropriate for the postmining land use, and the hydrologic balance is protected; and

18 (d) the reclaimed surface configuration is appropriate for the postmining land use.

(6) "Aquifer" means any geologic formation or natural zone beneath the earth's surface that
 contains or stores water and transmits it from one point to another in quantities that permit or have the potential

21 to permit economic development as a water source.

(7) (a) "Area of land affected" means the area of land from which overburden is to be or has been
removed and upon which the overburden is to be or has been deposited.

24 (b) The term includes:

25 (i) all land overlying any tunnels, shafts, or other excavations used to extract the mineral;

26 (ii) lands affected by the construction of new railroad loops and roads or the improvement or use 27 of existing railroad loops and roads to gain access and to haul the mineral;

Resources - 2023 68th Legislature 2023 Drafter: Jason Mohr, 406-444-1640 HB0576.001.006 1 (iii) processing facilities at or near the mine site or other mine-associated facilities, waste 2 deposition areas, treatment ponds, and any other surface or subsurface disturbance associated with strip 3 mining or underground mining; and 4 all activities necessary and incident to the reclamation of the mining operations. (iv) 5 (8) "Bench" means the ledge, shelf, table, or terrace formed in the contour method of strip mining. 6 "Board" means the board of environmental review provided for in 2-15-3502. (9) 7 "Coal conservation plan" means the planned course of conduct of a strip- or underground-(10)8 mining operation and includes plans for the removal and use of minable and marketable coal located within the 9 area planned to be mined. 10 (11)(a) "Coal preparation" means the chemical or physical processing of coal and its cleaning, 11 concentrating, or other processing or preparation. 12 The term does not mean the conversion of coal to another energy form or to a gaseous or (b) liquid hydrocarbon, except for incidental amounts that do not leave the plant, nor does the term mean 13 14 processing for other than commercial purposes. "Coal preparation plant" means a commercial facility where coal is subject to coal preparation. 15 (12) 16 The term includes commercial facilities associated with coal preparation activities but is not limited to loading 17 buildings, water treatment facilities, water storage facilities, settling basins and impoundments, and coal 18 processing and other waste disposal areas. 19 (13)"Contour strip mining" means that strip-mining method commonly carried out in areas of rough 20 and hilly topography in which the coal or mineral seam outcrops along the side of the slope and entrance are 21 made to the seam by excavating a bench or table cut at and along the site of the seam outcropping, with the 22 excavated overburden commonly being cast down the slope below the mineral seam and the operating bench. 23 (14)"Cropland" means land used for the production of adapted crops for harvest, alone or in 24 rotation with grasses and legumes, that include row crops, small grain crops, hay crops, nursery crops, orchard 25 crops, and other similar crops. 26 (15)"Degree" means a measurement from the horizontal. In each case, the measurement is subject

27 to a tolerance of 5% error.

Resources - 2023 68th Legislature 2023 Drafter: Jason Mohr, 406-444-1640 HB0576.001.006 1 (16)"Department" means the department of environmental quality provided for in 2-15-3501. 2 (17) "Developed water resources" means land used for storing water for beneficial uses, such as 3 stockponds, irrigation, fire protection, flood control, and water supply. 4 (18)"Ephemeral drainageway" means a drainageway that flows only in response to precipitation in 5 the immediate watershed or in response to the melting of snow or ice and is always above the local water table. 6 "Failure to conserve coal" means the nonremoval or nonuse of minable and marketable coal by (19)7 an operation. However, the nonremoval or nonuse of minable and marketable coal that occurs because of 8 compliance with reclamation standards established by the department is not considered failure to conserve 9 coal. 10 (20) "Fill bench" means that portion of a bench or table that is formed by depositing overburden 11 beyond or downslope from the cut section as formed in the contour method of strip mining. 12 "Fish and wildlife habitat" means land dedicated wholly or partially to the production, protection, (21)13 or management of species of fish or wildlife. 14 (22) "Forestry" means land used or managed for the long-term production of wood, wood fiber, or 15 wood-derived products. 16 (23) "Grazing land" means land used for grasslands and forest lands where the indigenous 17 vegetation is actively managed for livestock grazing or browsing or occasional hay production. 18 (24) "Higher or better uses" means postmining land uses that have a higher economic value or 19 noneconomic benefit to the landowner or the community than the premining land uses. 20 (25) "Hydrologic balance" means the relationship between the quality and quantity of water inflow 21 to, water outflow from, and water storage in a hydrologic unit, such as a drainage basin, aquifer, soil zone, lake, 22 or reservoir, and encompasses the dynamic relationships among precipitation, runoff, evaporation, and 23 changes in ground water and surface water storage. 24 (26)"Imminent danger to the health and safety of the public" means the existence of any condition 25 or practice or any violation of a permit or other requirement of this part in a strip- or underground-coal-mining 26 and reclamation operation that could reasonably be expected to cause substantial physical harm to persons 27 outside the permit area before the condition, practice, or violation can be abated. A reasonable expectation of

- 2023 68th Legislature 2023 Drafter: Jason Mohr, 406-444-1640 HB0576.001.006

1 death or serious injury before abatement exists if a rational person, subjected to the same conditions or

2 practices giving rise to the peril, would not willingly be exposed to the danger during the time necessary for

3 abatement.

4 (27) "Industrial or commercial" means land used for:

6 long-term storage of products. This includes all heavy and light manufacturing facilities.

7 (b) retail or trade of goods or services, including hotels, motels, stores, restaurants, and other
8 commercial establishments.

9 (28) (a) "In situ coal gasification" means a method of in-place coal mining where limited quantities of 10 overburden are disturbed to install a conduit or well and coal is mined by injecting or recovering a liquid, solid,

11 sludge, or gas that causes the leaching, dissolution, gasification, liquefaction, or extraction of the coal.

(b) In situ coal gasification does not include the storage of carbon dioxide in a geologic storage
 reservoir, the primary or enhanced recovery of naturally occurring oil and gas, or any related process regulated
 by the board of oil and gas conservation pursuant to Title 82, chapter 11.

15 (29) "Intermittent stream" means a stream or reach of a stream that is below the water table for at 16 least some part of the year and that obtains its flow from both ground water discharge and surface runoff.

(30) "Land use" means specific uses or management-related activities, rather than the vegetative
cover of the land. Land uses may be identified in combination when joint or seasonal uses occur and may
include land used for support facilities that are an integral part of the land use. Land use categories include

20 cropland, developed water resources, fish and wildlife habitat, forestry, grazing land, industrial or commercial,

21 pastureland, land occasionally cut for hay, recreation, or residential.

(31) "Marketable coal" means a minable coal that is economically feasible to mine and is fit for sale
in the usual course of trade.

24 (32) "Material damage" means,:

25 (a) with respect to protection of the hydrologic balance, significant long-term or permanent

26 degradation or reduction by coal mining and reclamation operations of the quality or quantity of water outside of

27 the permit area in a manner or to an extent that land uses or beneficial uses of water are adversely affected $\frac{1}{27}$

- 2023 68th L	3 egislature 2023	Drafter: Jason Mohr, 406-444-1640	HB0576.001.006		
1	water quality s	tandards are violated, <u>water quality standards are violated,</u> or water rights are i	mpacted <u>;-</u>		
2	Violation of a v	vater quality standard, whether or not an existing water use is affected, is mate	r ial damage.		
3	<u>(b)</u>	with respect to an alluvial valley floor, changes in the quality or quantity of the	water supply to		
4	any portion of	<u>the alluvial valley floor when the changes are caused by coal mining and reclar</u>	nation operations		
5	and result in fu	<u>irther</u> <u>changes that</u> <u>significantly</u> <u>decrease the capability of the alluvial valley floo</u>	or to support		
6	subirrigation or	r flood irrigation for agricultural activities;			
7	<u>(c)</u>	with respect to water bodies for which the water quality standard is more strin	igent than the		
8	nonanthropoge	enic condition and in accordance with 75-5-222, significant long-term or permar	<u>ent degradation</u>		
9	or reduction by	v coal mining and reclamation operations of the quality or quantity of water outs	ide of the permit		
10	area in a manner and to an extent that land use, beneficial uses of water, or water rights are adversely affected;				
11	and				
12	<u>(c)(d)</u>	with respect to subsidence caused by an underground coal mining operation:			
13	<u>(i)</u>	any functional impairment of surface lands, features, or structures;			
14	<u>(ii)</u>	any physical change that has a significant adverse impact on the affected lan	<u>d's capability to</u>		
15	support any cu	<u>irrent or reasonably foreseeable uses or causes significant loss in production o</u>	<u>r income; or</u>		
16	<u>(iii)</u>	any significant change in the condition, appearance, or utility of any structure	or facility from its		
17	presubsidence	e condition.			
18	(33)	"Method of operation" means the method or manner by which the cut, open p	it, shaft, or		
19	excavation is n	nade, the overburden is placed or handled, water is controlled, and other acts a	are performed by		
20	the operator in	the process of uncovering and removing the minerals that affect the reclamation	on of the area of		
21	land affected.				
22	(34)	"Minable coal" means that coal that can be removed through strip- or underg	ound-mining		
23	methods adapt	table to the location that coal is being mined or is planned to be mined.			
24	(35)	"Mineral" means coal and uranium.			
25	(36)	"Operation" means:			
26	(a)	all of the premises, facilities, railroad loops, roads, and equipment used in the	process of		
27	producing and	removing mineral from and reclaiming a designated strip-mine or underground	-mine area,		

Amondment - 1st Reading/2nd House-blue - Requested by: Mike I and - (S) Natural

Amendment - 1st Reading/2nd House-blue - Requested by: Mike Lang - (S) Natural Resources						
- 2023 68th L	3 egislature 2023	Drafter: Jason Mohr, 406-444-1640 HB0576.001.006				
1	1 including coal preparation plants; and					
2	(b)	all activities, including excavation incident to operations, or prospecting for the purpose of				
3	determining the	e location, quality, or quantity of a natural mineral deposit.				
4	(37)	"Operator" means a person engaged in:				
5	(a)	strip mining or underground mining who removes or intends to remove more than 10,000 cubic				
6	yards of minera	al or overburden;				
7	(b)	coal mining who removes or intends to remove more than 250 tons of coal from the earth by				
8	mining within 1	2 consecutive calendar months in any one location;				
9	(c)	operating a coal preparation plant; or				
10	(d)	uranium mining using in situ methods.				
11	(38)	"Overburden" means:				
12	(a)	all of the earth and other materials that lie above a natural mineral deposit; and				
13	(b)	the earth and other material after removal from their natural state in the process of mining.				
14	(39)	"Pastureland" means land used primarily for the long-term production of adapted, domesticated				
15	forage plants to	b be grazed by livestock or occasionally cut and cured for livestock feed.				
16	(40)	"Perennial stream" means a stream or part of a stream that flows continuously during all of the				
17	calendar year a	as a result of ground water discharge or surface runoff.				
18	(41)	"Person" means a person, partnership, corporation, association, or other legal entity or any				
19	political subdiv	ision or agency of the state or federal government.				
20	(42)	"Prime farmland" means land that:				
21	(a)	meets the criteria for prime farmland prescribed by the United States secretary of agriculture in				
22	the Federal Re	gister; and				
23	(b)	historically has been used for intensive agricultural purposes.				
24	(43)	"Prospecting" means:				
25	(a)	the gathering of surface or subsurface geologic, physical, or chemical data by mapping,				
26	trenching, or g	eophysical or other techniques necessary to determine:				
27	(i)	the quality and quantity of overburden in an area; or				

- 2023 68th Legislature 2023 Drafter: Jason Mohr, 406-444-1640 HB0576.001.006

- 1 (ii) the location, quantity, or quality of a mineral deposit; or
- 2 (b) the gathering of environmental data to establish the conditions of an area before beginning
 3 strip- or underground-coal-mining and reclamation operations under this part.
- 4 (44) "Reclamation" means backfilling, subsidence stabilization, water control, grading, highwall 5 reduction, topsoiling, planting, revegetation, and other work conducted on lands affected by strip mining or 6 underground mining under a plan approved by the department to make those lands capable of supporting the

7 uses that those lands were capable of supporting prior to any mining or to higher or better uses.

- 8 (45) "Recovery fluid" means any material that flows or moves, whether in semisolid, liquid, sludge,
 9 gas, or some other form or state, used to dissolve, leach, gasify, or extract coal.
- (46) "Recreation" means land used for public or private leisure-time activities, including developed
 recreation facilities, such as parks, camps, and amusement areas, as well as areas for less intensive uses,

12 such as hiking, canoeing, and other undeveloped recreational uses.

- (47) "Reference area" means a land unit maintained under appropriate management for the
 purpose of measuring vegetation ground cover, productivity, and plant species diversity that are produced
 naturally or by crop production methods approved by the department. Reference areas must be representative
 of geology, soil, slope, and vegetation in the permit area.
- 17 (48) "Remining" means conducting surface coal mining and reclamation operations that affect
 18 previously mined areas (for example, the recovery of additional mineral from existing gob or tailings piles).
- (49) "Residential" means land used for single- and multiple-family housing, mobile home parks, or
 other residential lodgings.
- (50) "Restore" or "restoration" means reestablishment after mining and reclamation of the land use
 that existed prior to mining or to higher or better uses.
- (51) (a) "Strip mining" means any part of the process followed in the production of mineral by the
 opencut method, including mining by the auger method or any similar method that penetrates a mineral deposit
 and removes mineral directly through a series of openings made by a machine that enters the deposit from a
 surface excavation or any other mining method or process in which the strata or overburden is removed or
 displaced in order to recover the mineral.

Amendment - 1st Reading/2nd House-blue - Requested by: Mike Lang - (S) Natural Resources - 2023					
68th Legislature 2023		Drafter: Jason Mohr, 406-444-1640 HB0576.001.00	6		
4	(1.)				
1	(b)	For the purposes of this part only, strip mining also includes remining and coal preparation.			
2	(c)	The terms "remining" and "coal preparation" are not included in the definition of "strip mining"			
3	for purposes of	Title 15, chapter 35, part 1.			
4	(52)	"Subsidence" means a vertically downward movement of overburden materials resulting from			
5	the actual minir	ng of an underlying mineral deposit or associated underground excavations.			
6	(53)	"Surface owner" means:			
7	(a)	a person who holds legal or equitable title to the land surface;			
8	(b)	a person who personally conducts farming or ranching operations upon a farm or ranch unit to			
9	be directly affe	cted by strip-mining operations or who receives directly a significant portion of income from			
10	farming or ranc	hing operations;			
11	(c)	the state of Montana when the state owns the surface; or			
12	(d)	the appropriate federal land management agency when the United States government owns			
13	the surface.				
14	(54)	"Topsoil" means the unconsolidated mineral matter that is naturally present on the surface of			
15	the earth, that h	nas been subjected to and influenced by genetic and environmental factors of parent material,			
16	climate, macro	organisms and microorganisms, and topography, all acting over a period of time, and that is			
17	necessary for t	he growth and regeneration of vegetation on the surface of the earth.			
18	(55)	"Underground mining" means any part of the process that is followed in the production of a			
19	mineral and that	at uses vertical or horizontal shafts, slopes, drifts, or incline planes connected with excavations			
20	penetrating the	mineral stratum or strata. The term includes mining by in situ methods.			
21	(56)	"Unwarranted failure to comply" means:			
22	(a)	the failure of a permittee to prevent the occurrence of any violation of a permit or any			
23	requirement of	this part because of indifference, lack of diligence, or lack of reasonable care; or			
24	(b)	the failure to abate any violation of a permit or of this part because of indifference, lack of			
25	diligence, or lac	ck of reasonable care.			
26	(57)	"Waiver" means a document that demonstrates the clear intention to release rights in the			
27	surface estate	for the purpose of permitting the extraction of subsurface minerals by strip-mining methods.
