Amendment - 1st Reading/2nd House-blue - Requested by: Mike Lang - (S) Natural Resources - 2023					
-	Legislature 2023	Drafter	: Casey Pallister, (4	06) 444-3067	HB0576.001.007
1			HOUSE BILL NO.	. 576	
2	INTRODUCED	BY R. KNUDSEN, J. F	HINKLE, S. GUNDE	RSON, S. VINTON, S.	GIST, K. WALSH, M.
3			BINKLEY, G. PAI	RRY	
4					
5	A BILL FOR AN ACT	ENTITLED: "AN ACT	REVISING LAWS	RELATED TO WATER	AND COAL MINING;
6	PROVIDING THAT N	IONSIGNIFICANT CH	IANGES IN WATER	QUALITY INCLUDE C	COAL OPERATIONS
7	ADJACENT TO EPH	EMERAL DRAINAGE	WAYS AND INTER	MITTENT STREAMS U	INDER CERTAIN
8	CONDITIONS; REVI	SING THE DEFINITIC	ON OF "MATERIAL I	DAMAGE" TO INCLUD	E THE EFFECT OF
9	COAL MINING ON T	HE HYDROLOGIC BA	ALANCE; PROVIDI	NG RULEMAKING AUT	HORITY; DIRECTING
10	AN AMENDMENT T	O 17.24.301 TO REMO	OVE CERTAIN DEF	INITIONS; AMENDING	SECTIONS 75-5-317
11	AND SECTION 82-4	-203, MCA; PROVIDIN	NG FOR CONTING	ENT VOIDNESS; AND	PROVIDING AN
12	IMMEDIATE EFFEC	TIVE DATE AND A RE	ETROACTIVE APPL	LICABILITY DATE."	
13					
14	BE IT ENACTED BY	THE LEGISLATURE	OF THE STATE OF	MONTANA:	
15					
16	NEW SECTI	ON. Section 1. Depa	artment to amend	rule. The department o	f environmental quality
17	shall amend ARM 17	.24.301 to remove the	two subsections de	efining "material damage	e" and the subsection
18	defining "materially d	lamage the quantity or	quality of water".		
19					
20	Section 2. S	ection 75-5-317, MCA	, is amended to rea	d:	
21	"75-5-317.	Nonsignificant activi	i <mark>ties.</mark> (1) The catego	pries or classes of activi	ities identified in
22	subsection (2) cause	⊢ changes in water qua	lity that are nonsign	ificant because of their	low potential for harm to
23	human health or the	environment and their	conformance with t	he guidance found in 7	5-5-301(5)(c).
24	(2) The	following categories or	r classes of activitie	s are not subject to the	provisions of 75-5-303:
25	(a) exis i	ing activities that are r	nonpoint sources of	pollution as of April 29,	-1993;
26	(b) activ	ities that are nonpoint	sources of pollution	⊢initiated after April 29,	1993, when reasonable
27	land, soil, and water	conservation practices	are applied and ex	isting and anticipated b	eneficial uses will be fully

- 2023 68th Legislature 2023		Drafter: Casey Pallister, (406) 444-3067	HB0576.001.007
1	protected;		
2	. (c)	use of agricultural chemicals in accordance with a specific agricultural chemic	al ground water
3	management p	plan promulgated under 80-15-212, if applicable, or in accordance with an enviro	
4	protection ager	ncy-approved label and when existing and anticipated uses will be fully protecte	vd;
5	(d)	- changes in existing water quality resulting from an emergency or remedial act	ivity that is
6	designed to pro	otect public health or the environment and is approved, authorized, or required	by the
7	department;		
8	(e)	- changes in existing ground water quality resulting from treatment of a public w	vater supply
9	system, as def	ined in 75-6-102, or a public sewage system, as defined in 75-6-102, by chlorin	ation or other
10	similar means t	that is designed to protect the public health or the environment and that is appr	oved, authorized,
11	or required by	the department;	
12	(f)	the use of drilling fluids, sealants, additives, disinfectants, and rehabilitation cl	hemicals in water
13	well or monitor	ing well drilling, development, or abandonment, if used according to departmen	t-approved water
14	quality protection	on practices and if no discharge to surface water will occur;	
15	(g)	short-term changes in existing water quality resulting from activities authorized	d by the
16	department pu	rsuant to 75-5-308;	
17	(h)	land application of animal waste, domestic septage, or waste from public sew	age treatment
18	systems contai	ining nutrients when the wastes are applied to the land in a beneficial manner, a	application rates
19	are based on a	agronomic uptake of applied nutrients, and other parameters will not cause degr	adation;
20	(i)	use of gray water, as defined in 75-5-325, from nonpublic gray water reuse sy	stems for
21	irrigation durine	g the growing season in accordance with gray water reuse rules adopted pursu	ant to 75-5-305;
22	(j)	incidental leakage of water from a public water supply system, as defined in 7	5-6-102, or from
23	a public sewag	e system, as defined in 75-6-102, utilizing best practicable control technology d	lesigned and
24	constructed in	accordance with Title 75, chapter 6;	
25	(k)	discharges of water to ground water from water well or monitoring well tests, H	nydrostatic
26	pressure and le	eakage tests, or wastewater from the disinfection or flushing of water mains and	l storage
27	reservoirs, con	ducted in accordance with department-approved water quality protection praction	COS;

- 2023 68th Le	egislature 2023	Drafter: Casey Pallister, (406) 444-3067	HB0576.001.007
1	(I)	oil and gas drilling, production, abandonment, plugging, and restoration activit	ies that do not
2	result in discha	arges to surface water and that are performed in accordance with Title 82, chap	er 10, or Title 82,
3	chapter 11;		
4	(m)	short-term changes in existing water quality resulting from ordinary and every	d ay activities of
5	humans or dor	mesticated animals, including but not limited to:	
6	(i)	such recreational activities as boating, hiking, hunting, fishing, wading, swimm	iing, and
7	camping;		
8	(ii)	fording of streams or other bodies of water by vehicular or other means; and	
9	(iii)	drinking from or fording of streams or other bodies of water by livestock and o	ther domesticated
10	animals;		
11	(n)	coal and uranium prospecting that does not result in a discharge to surface w	ater, that does not
12	involve a test p	pit located in surface water or that may affect surface water, and that is performe)d in accordance
13	with Title 82, c	hapter 4;	
14	(0)	solid waste management systems, motor vehicle wrecking facilities, and coun	t y motor vehicle
15	graveyards lice	ensed and operating in accordance with Title 75, chapter 10, part 2, or Title 75,	shapter 10, part
16	5;		
17	(p)	hazardous waste management facilities permitted and operated in accordance	ə with Title 75,
18	chapter 10, pa	rt 4;	
19	(q)	metallic and nonmetallic mineral exploration that does not result in a discharge	ə to surface water
20	and that is per	mitted under and performed in accordance with Title 82, chapter 4, parts 3 and	4 ;
21	(r)	stream-related construction projects or stream enhancement projects that res	ult in temporary
22	changes to wa	ter quality but do not result in long-term detrimental effects and that have been	authorized
23	pursuant to 75	-5-318;	
24	(s)	diversions or withdrawals of water established and recognized under Title 85,	chapter 2;
25	(t)	the maintenance, repair, or replacement of dams, diversions, weirs, or other c	onstructed works
26	that are related	d to existing water rights and that are within wilderness areas so long as existing	, and anticipated
27	beneficial uses	s are protected and as long as the changes in existing water quality relative to th	le project are
1			

- 202	ources		
	egislature 2023	Drafter: Casey Pallister, (406) 444-3067	HB0576.001.007
1	short term;		
2	(u) d	ischarges of total phosphorus or total nitrogen that do not:	
3	(i) G	reate conditions that are toxic or harmful to human, animal, plant, and aqua	atic life;
4	(ii) c i	reate conditions that produce undesirable aquatic life; or	
5	(iii) c	ause measurable changes in aquatic life; and	
6	<u>(v)</u> c	pal mining and reclamation activities that may affect the water quality of an	<u>adjacent</u>
7	<u>ephemeral</u> draina	geway or intermittent stream for which the nonanthropogenic condition of t	<u>he drainageway or</u>
8	<u>stream exceeds</u> <u>t</u>	ne water quality standard and for which an applicant has prepared an acce	<u>ptable hydrologic</u>
9	reclamation plan (developed under Title 82, chapter 4, part 2, that demonstrates no change in	<u>ı the water quality</u>
10	classification for t	ne affected drainageway or stream. For the purposes of this subsection (2)	(v), "ephemeral
11	drainageway" and	"intermittent stream" have the meanings provided in 82-4-203.	
12	<u>(v)(w)</u> a	ny other activity that is nonsignficant <u>nonsignificant</u> because of its low pote	ntial for harm to
13	human health or t	o the environment and its conformance with the guidance found in 75-5-30	1(5)(c)."
14			
15	Section 2	2. Section 82-4-203, MCA, is amended to read:	
16	"82-4-203	. Definitions. Unless the context requires otherwise, in this part, the follo	wing definitions
17	apply:		
18	(1) "/	Abandoned" means an operation in which a mineral is not being produced a	and that the
19	department deterr	nines will not continue or resume operation.	
20	(2) "/	Adjacent area" means the area outside the permit area where a resource o	r resources,
21	determined in the	context in which the term is used, are or could reasonably be expected to	be adversely
22	affected by propos	sed mining operations, including probable impacts from underground worki	ngs.
23	(3) "4	Affected drainage basin" means an area of land where surface water and g	round water quality
24	and quantity are a	ffected by mining activities and where they drain to a common point.	
25	(4) (a	a) "Alluvial valley floor" means the unconsolidated stream-laid deposits hold	ling streams where
26	water availability i	s sufficient for subirrigation or flood irrigation agricultural activities.	
27	(b) T	he term does not include upland areas that are generally overlain by a thin	veneer of colluvial

- 2023 68th Legislature 2023 Drafter: Casey Pallister, (406) 444-3067 HB0576.001.007

1 deposits composed chiefly of debris from sheet erosion and deposits by unconcentrated runoff or slope wash,

2 together with talus, other mass movement accumulation, and windblown deposits.

3 (5) "Approximate original contour" means that surface configuration achieved by backfilling and 4 grading of the mined area so that the reclaimed area, including any terracing or access roads, closely 5 resembles the general surface configuration of the land prior to mining and blends into and complements the 6 drainage pattern of the surrounding terrain, with all highwalls, spoil piles, and coal refuse piles eliminated, so 7 that:

8 (a) the reclaimed terrain closely resembles the general surface configuration if it is comparable to 9 the premine terrain. For example, if the area was basically level or gently rolling before mining, it should retain 10 these features after mining, recognizing that rolls and dips need not be restored to their original locations and 11 that level areas may be increased.

(b) the reclaimed area blends with and complements the drainage pattern of the surrounding area
 so that water intercepted within or from the surrounding terrain flows through and from the reclaimed area in an
 unobstructed and controlled manner;

15 (c) postmining drainage basins may differ in size, location, configuration, orientation, and density 16 of ephemeral drainageways compared to the premining topography if they are hydrologically stable, soil erosion 17 is controlled to the extent appropriate for the postmining land use, and the hydrologic balance is protected; and

18 (d) the reclaimed surface configuration is appropriate for the postmining land use.

(6) "Aquifer" means any geologic formation or natural zone beneath the earth's surface that
 contains or stores water and transmits it from one point to another in quantities that permit or have the potential

21 to permit economic development as a water source.

(7) (a) "Area of land affected" means the area of land from which overburden is to be or has been
removed and upon which the overburden is to be or has been deposited.

24 (b) The term includes:

25 (i) all land overlying any tunnels, shafts, or other excavations used to extract the mineral;

26 (ii) lands affected by the construction of new railroad loops and roads or the improvement or use 27 of existing railroad loops and roads to gain access and to haul the mineral;

Resources - 2023 68th Legislature 2023 Drafter: Casey Pallister, (406) 444-3067 HB0576.001.007 1 (iii) processing facilities at or near the mine site or other mine-associated facilities, waste 2 deposition areas, treatment ponds, and any other surface or subsurface disturbance associated with strip 3 mining or underground mining; and 4 all activities necessary and incident to the reclamation of the mining operations. (iv) 5 (8) "Bench" means the ledge, shelf, table, or terrace formed in the contour method of strip mining. 6 "Board" means the board of environmental review provided for in 2-15-3502. (9) 7 "Coal conservation plan" means the planned course of conduct of a strip- or underground-(10)8 mining operation and includes plans for the removal and use of minable and marketable coal located within the 9 area planned to be mined. 10 (11)(a) "Coal preparation" means the chemical or physical processing of coal and its cleaning, 11 concentrating, or other processing or preparation. 12 The term does not mean the conversion of coal to another energy form or to a gaseous or (b) liquid hydrocarbon, except for incidental amounts that do not leave the plant, nor does the term mean 13 14 processing for other than commercial purposes. "Coal preparation plant" means a commercial facility where coal is subject to coal preparation. 15 (12) 16 The term includes commercial facilities associated with coal preparation activities but is not limited to loading 17 buildings, water treatment facilities, water storage facilities, settling basins and impoundments, and coal 18 processing and other waste disposal areas. 19 (13)"Contour strip mining" means that strip-mining method commonly carried out in areas of rough 20 and hilly topography in which the coal or mineral seam outcrops along the side of the slope and entrance are 21 made to the seam by excavating a bench or table cut at and along the site of the seam outcropping, with the 22 excavated overburden commonly being cast down the slope below the mineral seam and the operating bench. 23 (14)"Cropland" means land used for the production of adapted crops for harvest, alone or in 24 rotation with grasses and legumes, that include row crops, small grain crops, hay crops, nursery crops, orchard 25 crops, and other similar crops. 26 (15)"Degree" means a measurement from the horizontal. In each case, the measurement is subject

27 to a tolerance of 5% error.

Authorized Print Version - HB 576

Amendment - 1st Reading/2nd House-blue - Requested by: Mike Lang - (S) Natural Resources - 2023 68th Legislature 2023 Drafter: Casey Pallister, (406) 444-3067 HB0576.001.007 1 (16)"Department" means the department of environmental quality provided for in 2-15-3501. 2 (17) "Developed water resources" means land used for storing water for beneficial uses, such as 3 stockponds, irrigation, fire protection, flood control, and water supply. 4 (18)"Ephemeral drainageway" means a drainageway that flows only in response to precipitation in 5 the immediate watershed or in response to the melting of snow or ice and is always above the local water table. 6 "Failure to conserve coal" means the nonremoval or nonuse of minable and marketable coal by (19)7 an operation. However, the nonremoval or nonuse of minable and marketable coal that occurs because of 8 compliance with reclamation standards established by the department is not considered failure to conserve 9 coal. 10 (20) "Fill bench" means that portion of a bench or table that is formed by depositing overburden 11 beyond or downslope from the cut section as formed in the contour method of strip mining. 12 "Fish and wildlife habitat" means land dedicated wholly or partially to the production, protection, (21)13 or management of species of fish or wildlife. 14 (22) "Forestry" means land used or managed for the long-term production of wood, wood fiber, or 15 wood-derived products. 16 (23) "Grazing land" means land used for grasslands and forest lands where the indigenous 17 vegetation is actively managed for livestock grazing or browsing or occasional hay production. 18 (24) "Higher or better uses" means postmining land uses that have a higher economic value or 19 noneconomic benefit to the landowner or the community than the premining land uses.

(25) "Hydrologic balance" means the relationship between the quality and quantity of water inflow
to, water outflow from, and water storage in a hydrologic unit, such as a drainage basin, aquifer, soil zone, lake,
or reservoir, and encompasses the dynamic relationships among precipitation, runoff, evaporation, and
changes in ground water and surface water storage.

(26) "Imminent danger to the health and safety of the public" means the existence of any condition
 or practice or any violation of a permit or other requirement of this part in a strip- or underground-coal-mining
 and reclamation operation that could reasonably be expected to cause substantial physical harm to persons
 outside the permit area before the condition, practice, or violation can be abated. A reasonable expectation of

- 2023 68th Legislature 2023 Drafter: Casey Pallister, (406) 444-3067 HB0576.001.007

1 death or serious injury before abatement exists if a rational person, subjected to the same conditions or

2 practices giving rise to the peril, would not willingly be exposed to the danger during the time necessary for

3 abatement.

4 (27) "Industrial or commercial" means land used for:

5 (a) extraction or transformation of materials for fabrication of products, wholesaling of products, or
6 long-term storage of products. This includes all heavy and light manufacturing facilities.

7 (b) retail or trade of goods or services, including hotels, motels, stores, restaurants, and other
8 commercial establishments.

9 (28) (a) "In situ coal gasification" means a method of in-place coal mining where limited quantities of 10 overburden are disturbed to install a conduit or well and coal is mined by injecting or recovering a liquid, solid,

11 sludge, or gas that causes the leaching, dissolution, gasification, liquefaction, or extraction of the coal.

(b) In situ coal gasification does not include the storage of carbon dioxide in a geologic storage
 reservoir, the primary or enhanced recovery of naturally occurring oil and gas, or any related process regulated
 by the board of oil and gas conservation pursuant to Title 82, chapter 11.

15 (29) "Intermittent stream" means a stream or reach of a stream that is below the water table for at 16 least some part of the year and that obtains its flow from both ground water discharge and surface runoff.

17 (30) "Land use" means specific uses or management-related activities, rather than the vegetative

18 cover of the land. Land uses may be identified in combination when joint or seasonal uses occur and may

19 include land used for support facilities that are an integral part of the land use. Land use categories include

20 cropland, developed water resources, fish and wildlife habitat, forestry, grazing land, industrial or commercial,

21 pastureland, land occasionally cut for hay, recreation, or residential.

(31) "Marketable coal" means a minable coal that is economically feasible to mine and is fit for sale
in the usual course of trade.

24 (32) "Material damage" means,:

25 (a) with respect to protection of the hydrologic balance, significant long-term or permanent

26 degradation or reduction by coal mining and reclamation operations of the quality or quantity of water outside of

27 the permit area in a manner or to an extent that land uses or beneficial uses of water are adversely affected $\frac{1}{27}$

- 202. 68th L	egislature 2023	Drafter: Casey Pallister, (406) 444-3067	HB0576.001.007
1	water quality s	tandards are violated, <u>water quality standards are violated,</u> or water rights are	• impacted <u>:-</u>
2	Violation of a v	vater quality standard, whether or not an existing water use is affected, is mai	erial damage.
3	<u>(b)</u>	with respect to an alluvial valley floor, changes in the quality or quantity of t	he water supply to
4	any portion of	the <u>alluvial valley floor</u> <u>when the</u> <u>changes are caused by coal mining and reck</u>	amation operations
5	<u>and result in fu</u>	<u>rther changes that significantly decrease the capability of the alluvial valley fl</u>	o or to support
6	subirrigation or	r flood irrigation for agricultural activities degradation or reduction by coal min	ing and reclamation
7	operations of the	he water quality or quantity supplied to the alluvial valley floor that significantl	<u>y decreases the</u>
8	capability of the	e alluvial valley floor to support agricultural activities;	
9	<u>(c)</u>	with respect to water bodies for which the water quality standard is more st	<u>ingent than the</u>
10	nonanthropoge	enic condition and in accordance with 75-5-222, significant long-term or perm	anent degradation
11	or reduction by	coal mining and reclamation operations of the quality or quantity of water ou	tside of the permit
12	<u>area in a manr</u>	ner and to an extent that land use, beneficial uses of water, or water rights are	adversely affected;
13	and		
14	(c) (d)	with respect to subsidence caused by an underground coal mining operation	<u>n:</u>
15	<u>(i)</u>	any functional impairment of surface lands, features, or structures;	
16	<u>(ii)</u>	any physical change that has a significant adverse impact on the affected la	and's capability to
17	support any cu	rrent or reasonably foreseeable uses or causes significant loss in production	<u>or income; or</u>
18	<u>(iii)</u>	any significant change in the condition, appearance, or utility of any structure	<u>e or facility from its</u>
19	presubsidence	condition.	
20	(33)	"Method of operation" means the method or manner by which the cut, open	pit, shaft, or
21	excavation is n	nade, the overburden is placed or handled, water is controlled, and other acts	are performed by
22	the operator in	the process of uncovering and removing the minerals that affect the reclama	tion of the area of
23	land affected.		
24	(34)	"Minable coal" means that coal that can be removed through strip- or under	ground-mining
25	methods adapt	table to the location that coal is being mined or is planned to be mined.	
26	(35)	"Mineral" means coal and uranium.	
27	(36)	"Operation" means:	

- 2023		
68th L	egislature 2023.	Drafter: Casey Pallister, (406) 444-3067 HB0576.001.00
1	(a)	all of the premises, facilities, railroad loops, roads, and equipment used in the process of
2	producing and	removing mineral from and reclaiming a designated strip-mine or underground-mine area,
3	including coal	preparation plants; and
4	(b)	all activities, including excavation incident to operations, or prospecting for the purpose of
5	determining the	e location, quality, or quantity of a natural mineral deposit.
6	(37)	"Operator" means a person engaged in:
7	(a)	strip mining or underground mining who removes or intends to remove more than 10,000 cubic
8	yards of minera	al or overburden;
9	(b)	coal mining who removes or intends to remove more than 250 tons of coal from the earth by
10	mining within 1	2 consecutive calendar months in any one location;
11	(c)	operating a coal preparation plant; or
12	(d)	uranium mining using in situ methods.
13	(38)	"Overburden" means:
14	(a)	all of the earth and other materials that lie above a natural mineral deposit; and
15	(b)	the earth and other material after removal from their natural state in the process of mining.
16	(39)	"Pastureland" means land used primarily for the long-term production of adapted, domesticated
17	forage plants to	o be grazed by livestock or occasionally cut and cured for livestock feed.
18	(40)	"Perennial stream" means a stream or part of a stream that flows continuously during all of the
19	calendar year a	as a result of ground water discharge or surface runoff.
20	(41)	"Person" means a person, partnership, corporation, association, or other legal entity or any
21	political subdiv	ision or agency of the state or federal government.
22	(42)	"Prime farmland" means land that:
23	(a)	meets the criteria for prime farmland prescribed by the United States secretary of agriculture in
24	the Federal Re	gister; and
25	(b)	historically has been used for intensive agricultural purposes.
26	(43)	"Prospecting" means:
27	(a)	the gathering of surface or subsurface geologic, physical, or chemical data by mapping,

Resources - 2023 68th Legislature 2023 Drafter: Casey Pallister, (406) 444-3067 HB0576.001.007 1 trenching, or geophysical or other techniques necessary to determine: 2 (i) the quality and quantity of overburden in an area; or 3 (ii) the location, quantity, or quality of a mineral deposit; or 4 the gathering of environmental data to establish the conditions of an area before beginning (b) 5 strip- or underground-coal-mining and reclamation operations under this part. 6 "Reclamation" means backfilling, subsidence stabilization, water control, grading, highwall (44)7 reduction, topsoiling, planting, revegetation, and other work conducted on lands affected by strip mining or 8 underground mining under a plan approved by the department to make those lands capable of supporting the 9 uses that those lands were capable of supporting prior to any mining or to higher or better uses. 10 (45) "Recovery fluid" means any material that flows or moves, whether in semisolid, liquid, sludge, 11 gas, or some other form or state, used to dissolve, leach, gasify, or extract coal. 12 "Recreation" means land used for public or private leisure-time activities, including developed (46)13 recreation facilities, such as parks, camps, and amusement areas, as well as areas for less intensive uses, 14 such as hiking, canoeing, and other undeveloped recreational uses. 15 (47) "Reference area" means a land unit maintained under appropriate management for the 16 purpose of measuring vegetation ground cover, productivity, and plant species diversity that are produced 17 naturally or by crop production methods approved by the department. Reference areas must be representative 18 of geology, soil, slope, and vegetation in the permit area. 19 (48) "Remining" means conducting surface coal mining and reclamation operations that affect 20 previously mined areas (for example, the recovery of additional mineral from existing gob or tailings piles). 21 (49) "Residential" means land used for single- and multiple-family housing, mobile home parks, or 22 other residential lodgings. 23 (50)"Restore" or "restoration" means reestablishment after mining and reclamation of the land use 24 that existed prior to mining or to higher or better uses. 25 (51)(a) "Strip mining" means any part of the process followed in the production of mineral by the 26 opencut method, including mining by the auger method or any similar method that penetrates a mineral deposit 27 and removes mineral directly through a series of openings made by a machine that enters the deposit from a

Amendment - 1st Reading/2nd House-blue - Requested by: Mike Lang - (S) Natural Resources - 2023 68th Legislature 2023 Drafter: Casey Pallister, (406) 444-3067 HB0576.001.007 1 surface excavation or any other mining method or process in which the strata or overburden is removed or 2 displaced in order to recover the mineral. 3 (b) For the purposes of this part only, strip mining also includes remining and coal preparation. 4 The terms "remining" and "coal preparation" are not included in the definition of "strip mining" (c) 5 for purposes of Title 15, chapter 35, part 1. 6 "Subsidence" means a vertically downward movement of overburden materials resulting from (52) 7 the actual mining of an underlying mineral deposit or associated underground excavations. 8 (53) "Surface owner" means: 9 a person who holds legal or equitable title to the land surface; (a) 10 (b) a person who personally conducts farming or ranching operations upon a farm or ranch unit to 11 be directly affected by strip-mining operations or who receives directly a significant portion of income from 12 farming or ranching operations: the state of Montana when the state owns the surface: or 13 (c) 14 (d) the appropriate federal land management agency when the United States government owns 15 the surface. 16 (54) "Topsoil" means the unconsolidated mineral matter that is naturally present on the surface of the earth, that has been subjected to and influenced by genetic and environmental factors of parent material, 17 18 climate, macroorganisms and microorganisms, and topography, all acting over a period of time, and that is 19 necessary for the growth and regeneration of vegetation on the surface of the earth. 20 "Underground mining" means any part of the process that is followed in the production of a (55)21 mineral and that uses vertical or horizontal shafts, slopes, drifts, or incline planes connected with excavations 22 penetrating the mineral stratum or strata. The term includes mining by in situ methods. 23 (56)"Unwarranted failure to comply" means: 24 (a) the failure of a permittee to prevent the occurrence of any violation of a permit or any 25 requirement of this part because of indifference, lack of diligence, or lack of reasonable care; or 26 (b) the failure to abate any violation of a permit or of this part because of indifference, lack of 27 diligence, or lack of reasonable care.

- 2023 68th Legislature 2023 Drafter: Casey Pallister, (406) 444-3067 HB0576.001.007 1 (57) "Waiver" means a document that demonstrates the clear intention to release rights in the 2 surface estate for the purpose of permitting the extraction of subsurface minerals by strip-mining methods. 3 (58)"Wildlife habitat enhancement feature" means a component of the reclaimed landscape, 4 established in conjunction with land uses other than fish and wildlife habitat, for the benefit of wildlife species, 5 including but not limited to tree and shrub plantings, food plots, wetland areas, water sources, rock outcrops, 6 microtopography, or raptor perches. 7 "Written consent" means a statement that is executed by the owner of the surface estate and (59)8 that is written on a form approved by the department to demonstrate that the owner consents to entry of an 9 operator for the purpose of conducting strip-mining operations and that the consent is given only to strip-mining 10 and reclamation operations that fully comply with the terms and requirements of this part." 11 12 NEW SECTION. Section 3. Severability. If a part of [this act] is invalid, all valid parts that are 13 severable from the invalid part remain in effect. If a part of [this act] is invalid in one or more of its applications, 14 the part remains in effect in all valid applications that are severable from the invalid applications. 15 NEW SECTION. Section 4. Contingent voidness. (1) If the United States secretary of the interior 16 17 disapproves any provision of [this act] pursuant to 30 CFR 732, then that portion of [this act] is void. 18 (2) The department of environmental quality shall notify the code commissioner of a disapproval 19 under subsection (1) within 15 days of the effective date of the disapproval. 20 21 <u>NEW SECTION.</u> Section 5. Effective date. [This act] is effective on passage and approval. 22 23 NEW SECTION. Section 6. Retroactive applicability. [This act] applies retroactively, within the 24 meaning of 1-2-109, to actions for judicial review or other causes of action challenging the issuance of a permit 25 petition for review, amendment, license, arbitration, action, certificate, or inspection that are pending but not yet 26 decided on or after [the effective date of this act]. 27 - END -
