11 BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF MONTANA:

12
13 SECTION 1. SECTION 75-5-301, MCA, IS AMENDED TO READ:

14 **"75-5-301. Classification and standards for state waters.** Consistent with the provisions of 80-15-
15 201 and this chapter, the department shall:

16 (1) establish the classification of all state waters in accordance with their present and future most
17 beneficial uses, creating an appropriate classification for streams that, due to sporadic flow, do not support an
18 aquatic ecosystem that includes salmonid or nonsalmonid fish;

19 (2) formulate and adopt standards of water quality, considering the economics of waste treatment
20 and prevention. When rules are adopted regarding temporary standards, they must conform with the
21 requirements of 75-5-312. Standards must meet the following requirements:

22 (a) for carcinogens, the water quality standard for protection of human health must be the value
23 associated with an excess lifetime cancer risk level, assuming continuous lifetime exposure, not to exceed $1 \times$
24 10^{-3} in the case of arsenic and 1×10^{-5} for other carcinogens. However, if a standard established at a risk level
25 of 1×10^{-3} for arsenic or 1×10^{-5} for other carcinogens violates the maximum contaminant level obtained from
26 40 CFR, part 141, then the maximum contaminant level must be adopted as the standard for that carcinogen.

27 (b) standards for the protection of aquatic life do not apply to ground water.

- 1 (3) review, from time to time at intervals of not more than 3 years and, to the extent permitted by
2 this chapter, revise established classifications of waters and adopted standards of water quality;
- 3 (4) adopt rules governing the granting of mixing zones, requiring that mixing zones granted by the
4 department be specifically identified and requiring that mixing zones have:
- 5 (a) the smallest practicable size;
- 6 (b) a minimum practicable effect on water uses; and
- 7 (c) definable boundaries;
- 8 (5) adopt rules implementing the nondegradation policy established in 75-5-303, including but not
9 limited to rules that:
- 10 (a) provide a procedure for department review and authorization of degradation;
- 11 (b) establish criteria for the following:
- 12 (i) determining important economic or social development; and
- 13 (ii) weighing the social and economic importance to the public of allowing the proposed project
14 against the cost to society associated with a loss of water quality;
- 15 (c) establish criteria for determining whether a proposed activity or class of activities, in addition to
16 those activities identified in 75-5-317, will result in nonsignificant changes in water quality for any parameter in
17 order that those activities are not required to undergo review under 75-5-303(3). These criteria must be
18 established in a manner that generally:
- 19 (i) equates significance with the potential for harm to human health, a beneficial use, or the
20 environment;
- 21 (ii) considers both the quantity and the strength of the pollutant;
- 22 (iii) considers the length of time the degradation will occur;
- 23 (iv) considers the character of the pollutant so that greater significance is associated with
24 carcinogens and toxins that bioaccumulate or biomagnify and lesser significance is associated with substances
25 that are less harmful or less persistent.
- 26 (d) provide that changes of nitrate as nitrogen in ground water are nonsignificant if the discharge
27 will not cause degradation of surface water and the predicted concentration of nitrate as nitrogen at the

2 (i) 7.5 milligrams per liter from sources other than sewage;

3 (ii) 5.0 milligrams per liter from sewage discharged from a system that does not use level two
4 treatment in an area where the ground water nitrate as nitrogen is 5.0 milligrams per liter or less;

5 (iii) 7.5 milligrams per liter from sewage discharged from a system using level two treatment, which
6 must be defined in the rules; or

7 (iv) 7.5 milligrams per liter from sewage discharged from a system in areas where the ground water
8 nitrate as nitrogen level exceeds 5.0 milligrams per liter primarily from sources other than human waste; and

9 (e) for septic system discharges that are not subject to ground water permitting requirements
10 under 75-5-401, establish criteria to determine when the discharges result in nonsignificant changes in surface
11 water quality in order that those discharges are not required to undergo review under 75-5-303(3) and no
12 further analysis under law or rule is required. The criteria must:

13 (i) be adopted by rule before July 1, 2024; and

14 (ii) be developed in a manner that generally considers soil type, mixing zone dilution and nitrogen
15 credits, horizontal distance between the discharge and the surface water in the direction of ground water flow,
16 and elevation, including:

17 (A) adopt surface water impacts for low flow conditions based on mixing zone dilution
18 concentrations and other credits for nitrogen;

19 (B) credit nitrogen degradation at the drainfield and riparian zone attenuation based on soil type;

20 (C) exempt surface water body impacts when drainfield is lower in elevation than the waterbody;

21 (D) limit the adjacent to surface water trigger analysis to a maximum of 1/4 or 1/2 mile from the
22 drainfield to a surface water, depending on soil type; and

23 (E) create nonsignificant surface water impact categories of 500 or more feet from the surface
24 water that consider soil texture, ground water depths and other pertinent information.

25 (6) to the extent practicable, ensure that the rules adopted under subsection (5) establish objective
26 and quantifiable criteria for various parameters. These criteria must, to the extent practicable, constitute
27 guidelines for granting or denying applications for authorization to degrade high-quality waters under the policy

3 (d) adequate evidence that a sewage disposal facility is sufficient in terms of capacity and

1 ~~(8)~~(9) The department shall:

2 (a) conduct a biennial review of experimental wastewater system components that have been
3 granted a waiver or deviation as provided in subsection ~~(6)~~(7)(j);

4 (b) utilize relevant analysis of wastewater system components approved in other states and data

11 approved.

12 ~~(9)~~(10) Review and certification or denial of certification that a division of land is not subject to
13 sanitary restrictions under this part may occur only under those rules in effect when a complete application is
14 submitted to the reviewing authority, except that in cases in which current rules would preclude the use for

27 **Section 4.** Section 76-4-108, MCA, is amended to read:

1 **"76-4-108. Enforcement.** (1) If the reviewing authority has reason to believe that a violation of this
2 part or a rule adopted or an order issued under this part has occurred, the reviewing authority may have written
3 notice and an order served personally or by certified mail on the alleged violator or the alleged violator's agent.
4 The notice must state the provision alleged to be violated, the facts alleged to constitute the violation, the
5 corrective action required by the reviewing authority, and the time within which the action is to be taken. A
6 notice and order issued by the department under this section may also assess an administrative penalty as
7 provided in 76-4-109. The alleged violator may, no later than 30 days after service of a notice and order under
8 this section, request a hearing before the local reviewing authority if it issued the notice of violation or the board
9 if the department issued the notice of violation. A request for a hearing must be filed in writing with the
10 appropriate entity and must state the reason for the request. If a request is filed, a hearing must be held within a
11 reasonable time.

12 (2) In addition to or instead of issuing an order, the reviewing authority may initiate any other
13 appropriate action to compel compliance with this part.

14 (3) The provisions of this part may be enforced by a reviewing authority other than the department
15 or board only for those divisions described in ~~76-4-104(3)~~. 76-4-104(4). If a local reviewing authority fails to
16 adequately enforce the provisions of this part, the department or the board may compel compliance with this
17 part under the provisions of this section.

18 (4) When a local reviewing authority exercises the authority delegated to it by this section, the local
19 reviewing authority is legally responsible for its actions under this part.

20 (5) If the department or a local reviewing authority determines that a violation of this part, a rule
21 adopted under this part, or an order issued under this part has occurred, the department or the local reviewing
22 authority may revoke its certificate of approval for the subdivision and reimpose sanitary restrictions following
23 written notice to the alleged violator. Upon revocation of a certificate, the person aggrieved by revocation may
24 request a hearing. A hearing request must be filed in writing within 30 days after receipt of the notice of
25 revocation and must state the reason for the request. The hearing is before the board if the department revoked
26 the certificate or before the local reviewing authority if the local reviewing authority revoked the certificate.

27 (6) The contested case provisions of the Montana Administrative Procedure Act, Title 2, chapter 4,

1 part 6, apply to a hearing held under this section."

6 required under rules adopted pursuant to this chapter, and any additional information the applicant feels
7 necessary.

8 (2) In addition to the information required for the submission of the application under subsection
9 (1), before the reviewing authority makes a final decision on the application, the applicant shall provide:
