18 associations organized under the laws of Montana, except property owned by cooperative organizations  
19 described in 15-6-137(1)(a);

20 (b) air and water pollution control and carbon capture equipment as defined in this section;

21 (c) new industrial property as defined in this section;

22 (d) any personal or real property used primarily in the production of ethanol-blended gasoline  
23 during construction and for the first 3 years of its operation;

24 (e) all land and improvements and all personal property owned by a research and development  
25 firm, provided that the property is actively devoted to research and development;

26 (f) machinery and equipment used in electrolytic reduction facilities;

27 (g) all property used and owned by persons, firms, corporations, or other organizations that are  
28 engaged in the business of furnishing telecommunications services exclusively to rural areas or to rural areas

1 and cities and towns of 1,200 permanent residents or less.

2 (2) (a) "Air and water pollution control and carbon capture equipment" means that portion of  
3 identifiable property, facilities, machinery, devices, or equipment certified as provided in subsections (2)(b) and  
4 (2)(c) and designed, constructed, under construction, or operated for removing, disposing, abating, treating,  
5 eliminating, destroying, neutralizing, stabilizing, rendering inert, storing, or preventing the creation of air or  
6 water pollutants that, except for the use of the item, would be released to the environment. This includes  
7 machinery, devices, or equipment used to capture carbon dioxide or other greenhouse gases. Reduction in  
8 pollutants obtained through operational techniques without specific facilities, machinery, devices, or equipment  
9 is not eligible for certification under this section.

10 (b) Requests for certification must be made on forms available from the department of revenue.  
11 Certification may not be granted unless the applicant is in substantial compliance with all applicable rules, laws,  
12 orders, or permit conditions. Certification remains in effect only as long as substantial compliance continues.

13 (c) The department of environmental quality shall promulgate rules specifying procedures,  
14 including timeframes for certification application, and definitions necessary to identify air and water pollution  
15 control and carbon capture equipment for certification and compliance. The department of revenue shall  
16 promulgate rules pertaining to the valuation of qualifying air and water pollution control and carbon capture  
17 equipment. The department of environmental quality shall identify and track compliance in the use of certified  
18 air and water pollution control and carbon capture equipment and report continuous acts or patterns of  
19 noncompliance at a facility to the department of revenue. Casual or isolated incidents of noncompliance at a  
20 facility do not affect certification.

21 (d) To qualify for the exemption under subsection (5)(b)(i), the air and water pollution control and  
22 carbon capture equipment must be placed into service after January 1, 2014, for the purposes of environmental  
23 benefit or to comply with state or federal pollution control regulations. If the air or water pollution control and  
24 carbon capture equipment enhances the performance of existing air and water pollution control and carbon  
25 capture equipment, only the market value of the enhancement is subject to the exemption under subsection  
26 (5)(b)(i).

27 (e) Except as provided in subsection (2)(d), equipment that does not qualify for the exemption  
28 under subsection (5)(b)(i) includes but is not limited to equipment placed into service to maintain, replace, or

1 repair equipment installed on or before January 1, 2014.

2 (f) A person may appeal the certification, classification, and valuation of the property to the  
3 Montana tax appeal board. Appeals on the property certification must name the department of environmental  
4 quality as the respondent, and appeals on the classification or valuation of the equipment must name the  
5 department of revenue as the respondent.

6 (3) (a) "New industrial property" means any new industrial plant, including land, buildings,  
7 machinery, and fixtures, used by new industries during the first 3 years of their operation. The property may not

16 group that establishes a new plant in Montana for the operation of a new industrial endeavor, as distinguished  
17 from a mere expansion, reorganization, or merger of an existing industry.

18 (b) New industry includes only those industries that:

19 (i) manufacture, mill, mine, produce, process, or fabricate materials;

20 (ii) do similar work, employing capital and labor, in which materials unserviceable in their natural  
21 state are extracted, processed, or made fit for use or are substantially altered or treated so as to create  
22 commercial products or materials;

23 (iii) engage in the mechanical or chemical transformation of materials or substances into new  
24 products in the manner defined as manufacturing in the North American Industry Classification System Manual  
25 prepared by the United States office of management and budget;
