Montana Community Reinvestment Plan

Montana Community Reinvestment Plan

CREATING STABILITY.
CHANGING LIVES.

The Montana Community Reinvestment Plan ("Plan") is an innovative public-private platform to help middle-class income earners find an attainable pathway to owning their own home. The State would provide a One Time Only (OTO) appropriation from the budget surplus that will be made available to the Montana Community Reinvestment Plan Fund.

The Plan requires an opt-in decision at a regional level. The OTO Appropriation from the MCRP Fund is distributed to regional "Community Reinvestment Organizations" (CROs) based on each region's percentage of gross domestic product (GDP). Each CRO will then set up a revolving fund with its share of the money. That revolving fund, minus up to a 5% set aside to cover administrative expenses, is then used to buy down up to 30% of the purchase price of a home for an eligible buyer.

Each home will be deed restricted to limit the equity and future sales price of the home to ensure the taxpayer-funded dollars stay with the home and the cost of the home remains attainable for the workforce in the future. An employee can buy out the deed restriction or sell the home with the proceeds going back into the CRO's revolving fund to be used for another eligible employee buydown opportunity.

The Plan proposes creating and utilizing an employer pool to leverage private sector involvement and investment to effectively "reload" the MCRP Fund so that the Plan can grow without requiring additional public funds. It also includes a mechanism for local governmental bodies to contribute additional funds to the CRO revolving fund to further bolster the program's success.

30yr Impact 500+ Permanent Homeownership Opportunities Generated for Montana's Workforce.

Matching Private Sector Reload Doubles the Impact

- 1** **145M+** Household Savings Est. \$12k per household savings/per year
- 2** **\$158M** Estimated Real Estate and Banking-Related Economic Activity within the First 5 Yrs of the Program
- 3** **\$109M** Revolving Fund Cash Value
- 4** **\$64M** Estimated Local Property Tax Generated
- 5** **\$2.5M** Estimated Local Community Operating Cashflows

The initial beneficiaries of the Montana Community Reinvestment Plan will be those in the banking, construction, and real estate-related industries throughout Montana.

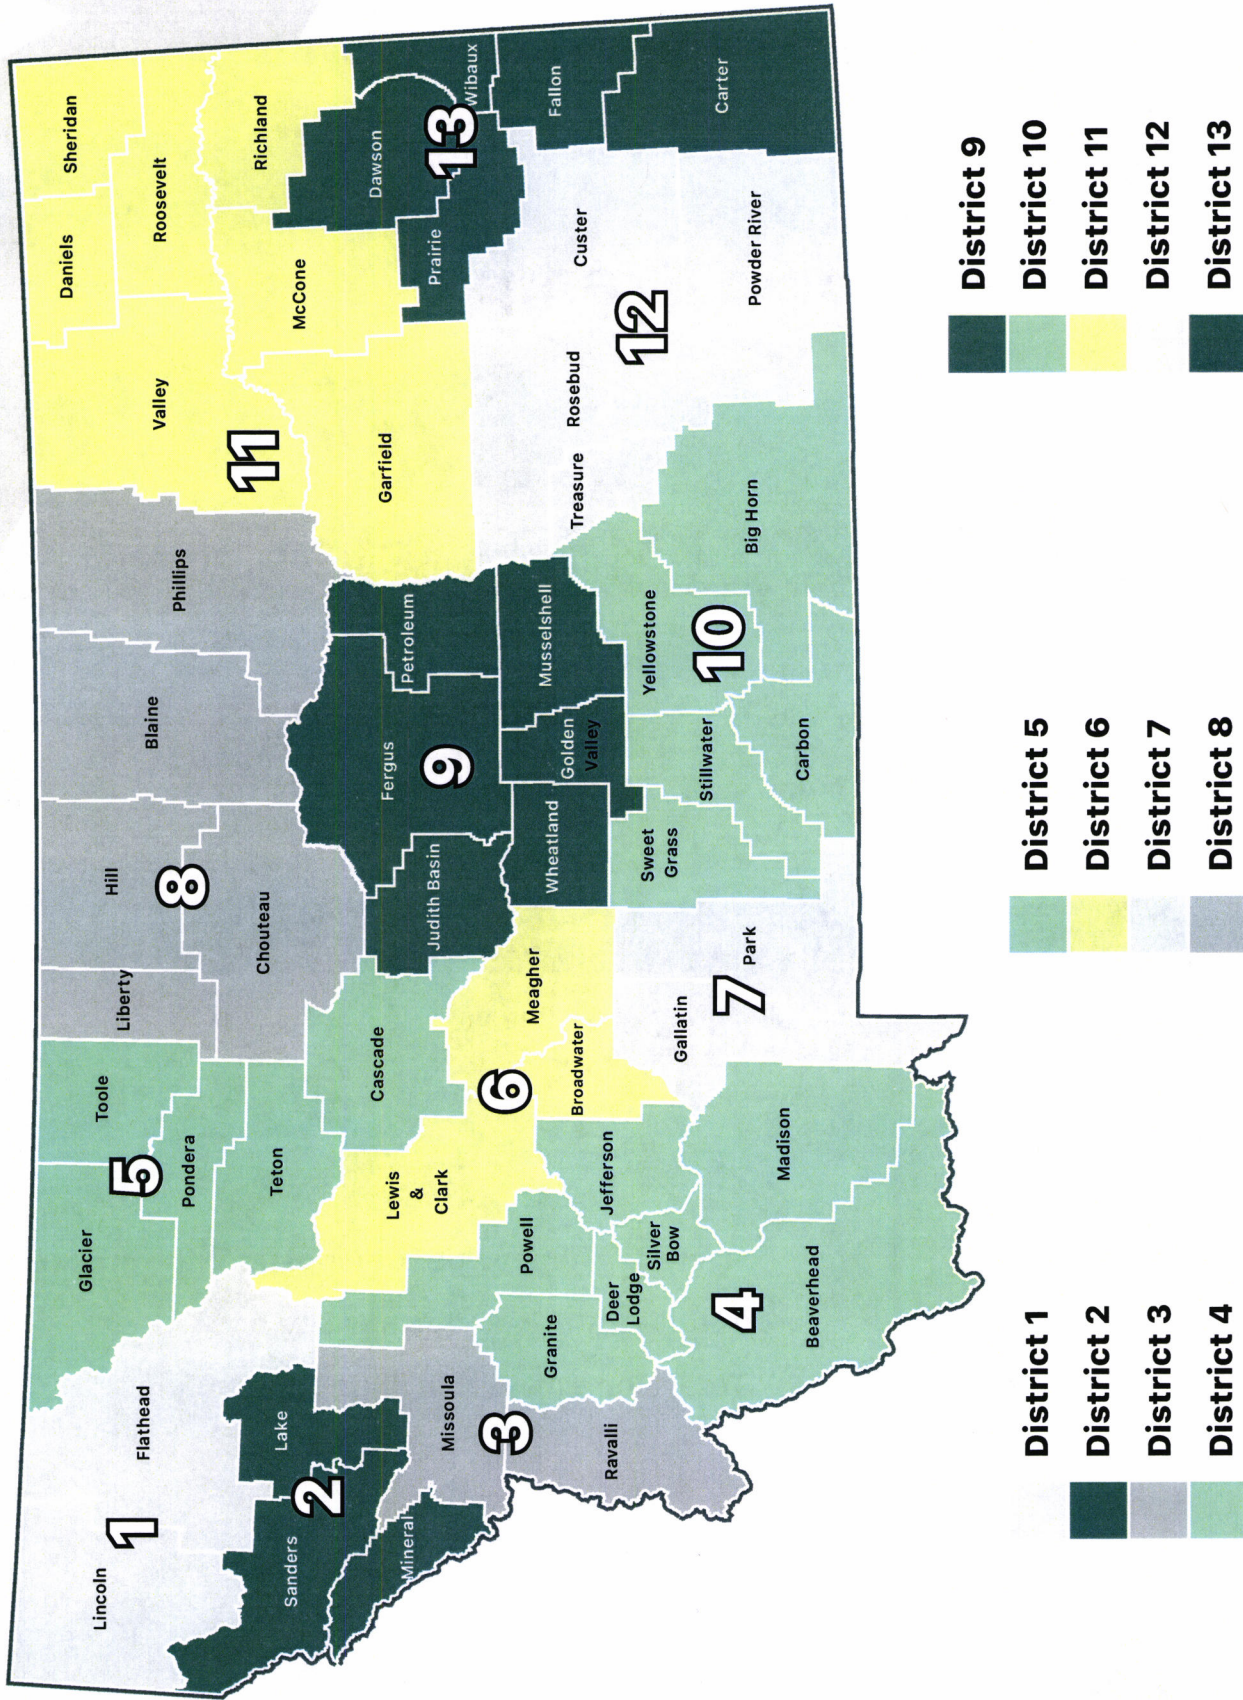

The combination of profitability and decreased risk allows the various participants within those industries to prioritize their business activities to create the needed workforce housing product throughout Montana.

HAP HOMEOWNER ASSISTANCE PROGRAM PROGRAMMING FOLLOWING LEGISLATION

The Homeowner Assistance Program (HAP) will be administered by a centralized community collaboration entity known as a CRO or Community Reinvestment Organization on behalf of the participating counties within the region.

The One Time Only (OTO) State Appropriation and Private Sector Investment to “reload” the program in accordance with the MCRP will flow to each CRO for the program’s administration.

The available funds will be deposited in restricted controlled accounts designated for Homeowner Assistance distributions into the participating county regions. These monies will be available for use on day one of the program.

HAP distributions will be made by the administrators of the CROs to qualified households earning between 60%-140% of the Average Median Income for Montana. The use of funds is limited to reducing the cost of occupancy-ready homes to qualified families.

A deed restriction will be put in place at the time of purchase by a qualified household limiting any future sale price to equal the purchase cost after the assistance amount has been applied (limited appreciation will also apply). The homeowner maintains the option of buying out the deed restriction with the proceeds flowing to the CRO revolving fund to be used for a future eligible homebuyer buydown opportunity.

Montana Community Reinvestment Plan

Q & A HIGH-LEVEL QUESTION & ANSWER

Attainable housing is an emergency in Montana, impacting individuals across all spectrums. Some have been born and raised here, many are newcomers, and many are packing up to leave the State as they cannot find work at an income level that can match escalating housing costs. Employers struggle to keep their workforce, and leaders in large and small communities see construction, manufacturing, retail, teachers, police, and healthcare providers—critical middle-income citizens—leave for more affordable places.

The Montana Community Reinvestment Plan (“MCRP”) proposes to fund and procure attainable workforce housing in Montana to address the workforce housing crisis facing the State. The MCRP will facilitate the establishment of regional collaboration entities (called Community Reinvestment Organizations or “CROs”) throughout the State and is aimed to provide guidance in attaining the needed resources and structure for leaders and policymakers to use in making immediate and long-term decisions.

Applying regional solutions concerning housing is necessary. Since housing challenges are shared, including job markets, commuting areas, commerce, services, institutions, and amenities, resources should be shared to create housing opportunities that exceed individual communities attempting to bridge the gap in isolation.

The MCRP provides a pathway for thousands of middle-income families to attain permanent homeownership. The creation of permanent human, financial and physical infrastructure will have a profound beneficial impact on Montana.

In addition to the policy and decision-making structures, the plan incorporates financial and logistical support to the Community Reinvestment Organizations to ensure maximum operational success. These housing toolkits will provide mechanisms, policies and practices local communities can use to meet their housing needs at a local level.

Montana Community Reinvestment Plan

Q & A HIGH-LEVEL QUESTION & ANSWER

8

Q: What is the Montana Community Reinvestment Plan?

A: The Montana Community Reinvestment Plan ("MCRP") is a statewide plan to address attainable workforce housing in Montana. The homes essentially become a new type of infrastructure—attainable workforce housing—that is deed restricted to keep the cost of the homes at a level attainable for middle-income earners by keeping the publicly invested dollars with the home in perpetuity.

Q: How is the MCRP Funded?

A: The MCRP creates a funding mechanism that includes a One Time Only (OTO) payment from the State and Private Sector Involvement/Investment. The MCRP Funds are then made available to a regional Community Reinvestment Organization ("CRO") to procure the homes for Montana's workforce.

Q: What is the benefit to the State?

A: The MCRP will create attainable housing infrastructure in every region and begin to address the workforce housing crisis facing the State. The dollars spent in the local community will also ensure a strong construction industry for at least the next three to five years—even while most experts predict an economic downturn. Retaining and stabilizing the State's critical workforce is vital to essential services, businesses and the State economy. The positive ripple effect on all sectors of the State's economic health and sustainability today will ensure the same well into the future. While many of these indirect economic benefits have not yet been calculated, they will likely be significant.

Q: What is a Community Reinvestment Organization ("CRO")?

A: The CROs are the regional collaboration entities that receive a share of the MCRP Fund's dollars for attainable housing. The CROs will consist of multiple counties with a plan tailored to each region to achieve that region's attainable housing goals.

Q: Is this opportunity limited only to the most populated areas of the State?

A: No. The MCRP proposes up to 15 regional CRO districts, providing opportunities for all 56 counties. The regional CROs are comprised of multiple county groupings. Each county can opt-in to participate in the CRO.

Q: What do the CROs do?

A: The CRO will coordinate and manage various procedures for procuring the homes and create requirements regarding eligibility for the purchase of an attainable home. The CRO will be responsible for any additional funding required to meet the statutory infrastructure threshold to participate in the Program.

Montana Community Reinvestment Plan

Q & A HIGH-LEVEL QUESTION & ANSWER

Q: Who is eligible to purchase the attainable housing created by the MCRP?

A: Each CRO will establish purchaser qualifications, but generally, eligible purchasers would include members of the workforce – police officers, nurses, teachers, etc. – who qualify based on middle-income standards (between 60% and 140% of Area Median Income) and qualify for a mortgage through a local financial institution. The eligible purchasers may apply to the CRO to participate in the Program to purchase a qualified home.

Q: How does the MCRP ensure these assets remain part of the attainable housing infrastructure pool?

A: When an individual is approved by the CRO and a financial institution for purchasing a home through the Program, the CRO will contribute to the purchase price to allow them to buy the home within their means. The individual will be responsible for all ongoing mortgage payments. The property and home will be deed restricted to ensure that when the home is sold, the home's listing price minus the allowed homeowner equity is paid to the revolving fund to be used by future participants in the Program.

Q: Why is equity building limited in an MCRP home?

A: Homeowners are allowed to build equity in the home, but due to the shared investment and deed restrictions to benefit future Program buyers, the equity acquired is limited. The limited equity for the homeowner reflects the benefit they received at the time of purchase in conjunction with the cost buydown, whereas the equity from the public investment stays with the home upon the eventual sale. Since the homeowner did not pay for the initial buydown funded publicly through the MCRP, the homeowner does not receive that value at the time of sale. The deed restriction allows us to create and preserve attainable workforce housing in Montana for years to come.

MCRP homeowners benefit in several ways that help offset this limitation. The decreased cost of housing puts money in homeowners' pockets each month. These retained earnings over time directly offset any contemplated equity gained through a non-deed restricted scenario. For example, the average equity/retained cash per year on a \$400K home using \$100K from the MCRP and financing \$300K equates to \$13,500. This is an effective 4.5% annual return on the \$300,000 purchase of the home with little to no money down. In addition, the homeowner builds equity as they reduce the principal balance on their loan through affordable payments. Lastly, MCRP Homeowners maintain the ability to buy-out the deed restriction at their election.
