Background Materials and Research

Topic Summary:

Unlike temporary appropriations, statutory appropriations are codified and do not require reauthorization every two years. A statutory appropriation appropriates money from an account for an identified function and remains valid until repealed or altered by new legislation. Because statutory appropriations are not regularly examined every two years, the legislature has established guidelines that should be considered prior to including a statutory appropriation in proposed legislation.

In general, the use of a statutory appropriation is limited to those cases where a two-year appropriation impractical. A statutory appropriation must be listed in [17-7-502](#), MCA. Guidelines for statutory appropriation are contained in [17-1-508](#), MCA. A proposed statutory appropriation may not be considered appropriate if:

- (a) the money is from a continuing, reliable, and estimable source;
- (b) the use of the appropriation or the expenditure occurrence is predictable and reliable;
- (c) the authority exists elsewhere;
- (d) an alternative appropriation method is available, practical, or effective;
- (e) it appropriates state general fund money for purposes other than paying for emergency services;
- (f) the money is used for general purposes;

(g) the legislature wishes to review expenditure and appropriation levels each biennium; and

(h) an expenditure cap and sunset date are excluded.
