## Background Materials and Research

**Topic Summary:** The 1987 Montana Legislature created the Montana Growth Through Agriculture Act with a purpose

to strengthen and diversify Montana’s agricultural industry by establishing a public-private sector partnership to assist the development of innovative agricultural business organizational improvements and the commercialization and marketing of new agricultural products in order to keep pace with a transforming agricultural industry and to create new jobs and expand small business opportunities.<sup>1</sup>

In practice, this support takes the form of grants and loans administered by the Department of Agriculture.<sup>2</sup> A seven-member, governor-appointed Montana Agricultural Development Council establishes policies and awards grants and loans. In 2018, for example, the council awarded funding and assistance for grain bin equipment, breweries, hydroponics, and the production of baked goods, cider, cricket cookies, fermented foods, goat’s milk soap, hops, ice cream, malted grain, wool socks, and yoghurt.

The program also works on developing foreign markets. Under the act, the council and department are involved with the Japan trade office and trade missions to other countries.
